NEED EXTRA TRUCKS FAST ?

as replacements...for rush jobs

RENT THEM FROM HERTZ!

When you need trucks—and need them fast—call Hertz! Hertz is America's largest, most experienced truck rental company. That means you get Chevrolet, GMC and other sturdy trucks *when* you want them—and the *way* you want them! Van, stake, panel, pickup, or walk-in—whatever your need, you can rent it from Hertz! Tractors and trailers for long or local hauls are also available from Hertz in many cities.

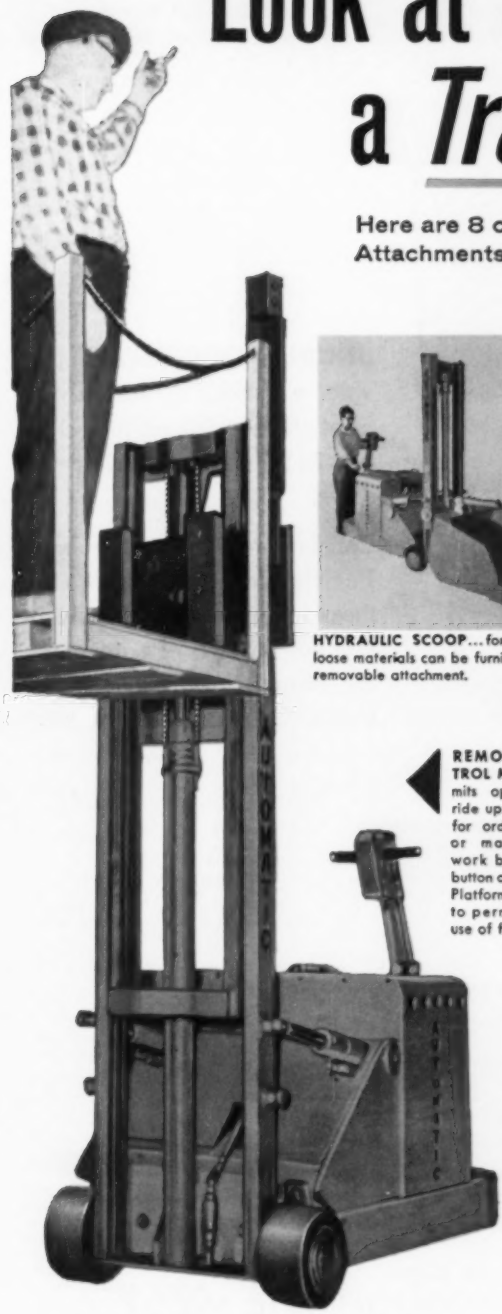
Hertz low rates include insurance and gas and oil (even if bought on the road). And you can rent Hertz trucks for any length of time: by the hour, day or week—as long as you wish! Remember to call Hertz whenever you need a truck . . . fast! Hertz also offers long-term no investment, no upkeep truck leasing for economical year-round operation.

HERTZ
TRUCK RENTAL ®

Look at all these things a *Transporter* can do!

Here are 8 cost-cutting ways Automatic's Standard Attachments can turn Transporters into Specialists

These specially designed standard attachments can add job flexibility to your Transporter Stacker. Now, a variety of jobs can be performed at considerable cost savings.

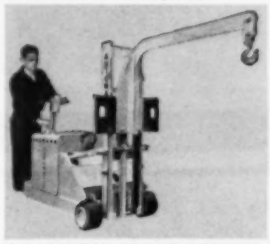


HYDRAULIC SCOOP...for handling loose materials can be furnished as a removable attachment.

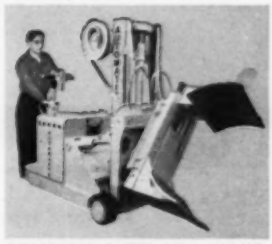
REMOTE CONTROL MAST permits operator to ride up and down for order picking or maintenance work by pushing button on carriage. Platform folds back to permit normal use of forks.

UTILITY CLAMPING DEVICE...Clamp arms can be attached to forks for handling cartons, etc. Clamp arms can be removed to handle pallets.

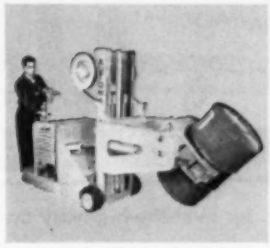
MECHANICAL GRAVITY DRUM DUMPER...Removable attachment to fit on forks.



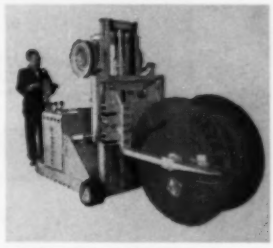
GOOSENECK CRANE ATTACHMENT...for items too bulky or too irregular in shape to be palletized.



REVOLVING PAPER ROLL CLAMP ...handles rolls vertically or horizontally...revolves 360° right or left.



HYDRAULIC DRUM HANDLER... picks up and carries any standard drum ...180° controlled forward dumping.



CABLE REEL HANDLER...lifts and transports wire and cable reels.

Performance Proof No. 125

P-S Compartmentizer

From ocean floor to warehouse door, it's smooth sailing for...

SNOW'S CLAM PRODUCTS

ADJUSTABILITY. One man easily handles Compartmentizer gates which move on roller bearings and can be locked at 1½" intervals to hold load tight. Individual locking handles insure positive, easy action. Compartmentizer gates open flat and out of the way against sides of car.

FAST AND EASY LOADING. B-end loading begins just as soon as car side door and Compartmentizer gates are opened. With the Compartmentizer there are no loose parts to move, no headroom restrictions, no interference with manual or mechanical loading equipment.

NO WASTED SPACE. After A and B car ends are loaded and P-S Compartmentizer gates closed, center section lading is fully protected between gates. Compartmentizers always offer maximum protection, with no extra dunnage, no guesswork and minimum manpower.

SHIPPER ACCEPTANCE. Mr. G. R. Pendergrass, Snow's Portland representative, checks condition of A-end load upon car's arrival. Although lading consisted of many different sizes of cases (an added invitation to damage), there was no damage whatever.

Protects Canned Goods Saves Manpower Hours

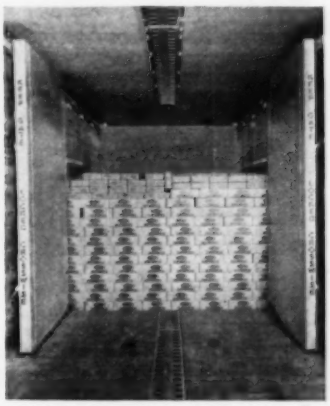
400,000 lbs. of clams each day! That's the average catch of the F. H. Snow Canning Co., Inc., in North Atlantic off-shore waters. Volume and quality have made Snow's Clam Products popular favorites the country over. "We always try to ship 100% P-S Compartmentizer," says H. A. Bucklin, Traffic Manager at Snow's Pine Point, Maine, headquarters. "Compartmentizer-equipped cars protect our shipments from damage and reduce lading handling man-hours."

This is another user who speaks from experience. In 1959, Snow shipped 121 P-S Compartmentizer-equipped cars—all containing canned goods and nearly all handled under stop-off privileges. "Our use of P-S Compartmentizer-equipped cars has practically eliminated damage claims," says William Kleb, manager of Snow's Wildwood, N. J., plant. "Before we specified P-S Compartmentizers, our damage was high and the cost of claims tremendous."

The accompanying photographs illustrate a typical Snow cross-country transload and stop-off shipment, from Wildwood, N. J., to Seattle. This particular car—P-S Compartmentizer-equipped UP 499477—was loaded with 2435 cases (77,585 lbs. load weight). The doorway portion was transloaded at Reno. With the balance of the load still protected behind sealed Compartmentizer gates, the car then moved to Portland, Oregon, where a stop-off was made and the A-end unloaded. With the next consignee's lading still safely stowed behind B-end gates, the car moved to final destination, Seattle. Here, too, the load was found in claim-free condition . . . not a single case damaged!

ASK FOR THEM BY NAME . . . COMPARTMENTIZER-EQUIPPED BOX CARS! The following shipper-conscious carriers now have P-S Compartmentizer Cars in operation:

- Atchison, Topeka & Santa Fe
- Baltimore & Ohio
- Bangor & Aroostook
- Central of Georgia
- Chesapeake & Ohio
- Chicago, Burlington & Quincy
- Chicago Great Western
- Chicago & North Western
- Fruit Growers Express
- Great Northern
- Merchants Despatch Transportation
- Milwaukee Road
- Minneapolis & St. Louis
- New York Central
- Norfolk & Western
- North American Car Corp.
- Northern Pacific
- Pacific Fruit Express
- Pennsylvania
- St. Louis Southwestern
- Seaboard Air Line
- Southern Pacific
- Texas & Pacific
- Union Pacific
- Western Pacific



PERFORMANCE PROOF. Illustration at left shows last of 700 cases for Seattle being loaded in the B-end. At right is this same B-end lading as P-S Compartmentizer gates were opened at Seattle. Car had traveled 3,987 miles via PRSL, PRR, IC, UP, SP, and UP from New Jersey to Washington State with only minor lateral shifting of load. Opposite end of car held 740 cases that were unloaded at Portland. Center area contained 995 cases transloaded at Reno. All arrived at their destinations in 100% perfect condition.

ASK FOR THIS NEW BOOKLET. Shows how P-S Compartmentizer reduces damage claims, speeds loading and unloading, cuts shipping costs. Sixteen pages of interesting and profitable reading.

CHUTING THE NEWS

MHI Central States Show Set For Nov. 1-3 at Louisville

Two major events of this year's materials handling calendar will take place in Louisville, Ky., Nov. 1-3, at the Kentucky Fair and Exposition Center.

The Material Handling Institute, Inc., will present its Central States Show and the American Material Handling Society, Inc., will hold four Technical Conferences around the theme "Progress Through Knowledge." Some 1000 men from the materials handling industry are expected to attend the conferences.

Region 4 of the AMHS is the Conference sponsor. Thirty-three speakers will cover various phases of materials handling and protective packaging.

U.S. Public's Transportation Bill Hit $92 Billion in '59, TAA Reports

The American public spent nearly $92 billion for passenger and freight transportation last year, according to the Transportation Association of America.

This figure, which includes both for-hire and private carriage, represents about 19 per cent of the nation's total output of goods and services. It exceeds by $9 billion the transportation bill for 1958.

The TAA Research Division broke down the freight bill this way: Total expenditures amounted to nearly $42 billion. Of this $27 billion bought urban and intercity highway transportation service. Railroads received $9.5 billion. Expenditures for water transportation were $2.4 billion with another billion being spent for petroleum pipeline service.

The nation's passenger bill amounted to nearly $50 billion. Of this total, private automobiles accounted for over $43 billion. Intercity commercial carriers—air, bus, and rail—were paid $3 billion. Local transit lines received $2.3 billion.

—DA—

There were 959 vessels of 1000 gross tons and over in the active oceangoing U. S. merchant fleet on June 1, 1960, one more than the number active on May 1, 1960, according to the Maritime Administration, U. S. Department of Commerce.

—DA—

I'm sure you must have noticed DA's new cover this month. But did you realize that the DA "package" was redesigned not only on the outside but also inside. This issue is held together without staples. Pages should open wider and stay open with less effort. We like it. How do you like it? Why not write to the editor telling him how you like the change?—The Staff.

(Please Turn Page)

Restricted Commodities Via Piggy-Back

The Chicago and North Western Railway Co. is the first railroad to win AAR authorization to handle highway tank trucks loaded with "restricted" commodities in piggy-back service. The railroad association's Bureau of Explosives conducted a series of tests with tank trucks mounted on flatcars. In-the-yard and road tests were made. This opens the door for Plan I and Plan III movement of tank trucks by rail. Restricted commodities include flammable or volatile acids or petroleum products and tank trucks of LP gas

(Continued from Preceding Page)

Class 1 Railroads Ask General Increase In Freight Rates to Meet Rising Costs

An across-the-board increase in railroad freight rates will be filed with the ICC by the nation's Class 1 railroads.

In announcing the request the chief traffic officers of the carriers said that no percentage increases of any kind are sought. In addition, the increases are "the smallest that have ever been sought."

The increase is broken down in the following way:

Line-haul rates on all commodities on which rates are quoted in cents per 100 lb are to be increased one-half cent per 100 lb if the present rates are 65 cents and under. The increase will be one cent per 100 lb where rates exceed 65 cents. Coal and lignite are exceptions to this provision.

Rates which are quoted on a ton basis also will be increased. The rate will go up 10 cents per net ton and 11 cents per gross ton on rates not exceeding $13. When the rate is higher than $13 per ton, the increase would be 20 cents per net ton and 22 cents per gross ton.

On most rates quoted per car the increase would be $3. Exceptions range from a $2 increase on fruits and vegetables to a $5 increase on wood. Piggy-back rates will be increased in the same proportion as other rates.

The first general increase since 1958, it is intended to meet increasing costs, the traffic officers said.

—DA—

Highway User Taxes Top $5 Billion

State highway user taxes set a new record during 1959. Federal Highway Administrator B. D. Tallamy has announced collections of more than $5.1 billion. This was a gain of 8.3 per cent over the 1958 figure. Motor-fuel taxes (net adjusted) produced $3,265,000,000. Registration fees brought in $1,449,000,000. Other motor-vehicle and carrier fees produced $377,000,000.

—DA—

Science Points to Transport Unity, Allen Tells Academy

All of the new scientific discoveries are leading toward a unity of transportation, according to John J. Allen, Jr., under secretary of commerce for transportation.

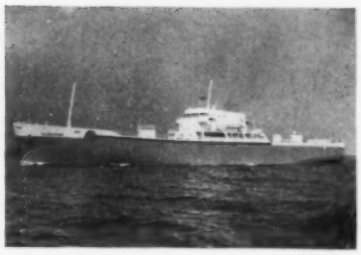
Allen, speaking before the Transportation Conference of the National Academy of Sciences, said that diversity was a part of the development stage for the various modes of transport. However, it is no longer the main emphasis of scientific work in the field.

Among the discoveries bringing unity are new sources of power, new developments in vehicles and service devices, new methods of systems control, and new processes of management. Application of all these elements can be extended to all modes, giving emphasis to transportation as a single function.

As an example Allen mentioned atomic energy to power ships, aircraft, locomotives, and highway vehicles. New freight containers are designed for use interchangeably, he said.

Edward V. Kiley, director of research for the American Trucking Associations, Inc., told the Academy's National Research Council that a new standard of transportation measurement is needed.

He said that the new standard must measure time, safety of cargo, and the related value of transportation to overall manufacturing and marketing. He called the ton-mile "inadequate as a means of measuring relative transportation service."



ATA Group Suggests Standard For Transport of Perishables

New standards for preserving the quality of frozen foods while in transit have been proposed by an ATA committee.

The group, the Committee on the Transportation of Perishables by Motor Freight, will present this standard to the Frozen Foods All-Industry Coordinating Committee.

Under the proposal, vehicles used in such service would be equipped with a combination of insulation and mechanical or other refrigerating facilities which would maintain temperatures of 10 deg F or lower. An uninterrupted period of two and one-half hours would be allowed for loading trailers. For each additional hour that the loading takes, two degrees will be added to the basic allowance of 10 deg.

—DA—

$2.9 Billion in U. S. Funds Available to States for Roads

Secretary of Commerce Frederick H. Mueller has announced that $2,873,613,000 in federal funds will be available to the states for highway work during the fiscal year of 1961.

The 1960 figure for this purpose was $2.7 billion while the similar figure for 1959 was $3.2 billion.

CONTAINERSHIPS OPEN ATLANTIC COAST SUPER SEAWAY—The New Yorker and Floridian are the new containerships placed into operation along the New York to Jacksonville, Fla., route by Erie and St. Lawrence Corp. There are two sailings weekly from each end of the run. Each ship holds 190 metal containers, 8 ft in height and width; 158 17 ft-long containers; 32 half containers; and 50 automobiles on deck. Arrival: Third day

Eastern Railroads Reduce Rates on Pallet Return

The Eastern Railroads have established a mileage scale of rates on used pallets, platforms, and skids, subject to minimum weights of 15,000, 20,000 and 30,000 lb.

This scale provides for the economical return of pallets without accumulating 40,000 lb, the minimum weight formerly prescribed. Reductions in cost to the shipper at 15,000 lb range up to 36 per cent at 250 miles. For example, for 300 miles a 15,000 lb shipment under the 40,000-lb minimum would cost $1.44 per cwt. The new rate is 97 cents. At 600 miles, the former rate was $2.03 and the new rate is $1.43.

—DA—

Fibre Box Association Plans For 21st Annual Meeting

The Fibre Box Association will meet October 11 and 12 at the Waldorf Astoria in New York.

In announcing the 21st Annual Meeting, President Clarence F. Smith outlined features of the program. The first day's program will cover the marketing phases of the industry. On the second day, Bengt Samson will report on the corrugated box business in Sweden. He is managing director of the Swedish Corrugated Box Association.

Low-Cost Air Freight by July Is Predicted at Sixth Annual Conference

Low-cost air freight service will be a reality by next July.

This is the prediction of Frank B. Lynott, of The Flying Tiger Line. Lynott, a speaker at the Air Freight Cargo Conference held recently in Chicago, forecasted rates at least 40 per cent below existing rates.

The swing-tail Canadair CL-44 is credited with making this reduction possible. This plane will have direct operating costs of 4 cents a ton mile. Flying Tiger's present fleet has a cost of 9 cents a ton mile.

The speaker warned cartage men that low rates in the air would call for reductions in pick-up and delivery rates.

Emery Johnson opened the conference by pointing out that air freight was in an era of unprecedented opportunity. Capacity has been increased tremendously by the conversion of planes for cargo work. These planes, only two years ago, were the finest in the airlines' inventory. Johnson was general chairman of the conference.

John T. Thompson, general manager of the Distributor Products Division, The Raytheon Corp., spoke on his company's distribution system.

An exhibit of air freight ground handling equipment was held in connection with this year's conference.

(*Please Turn to Page* 12)

—DA—

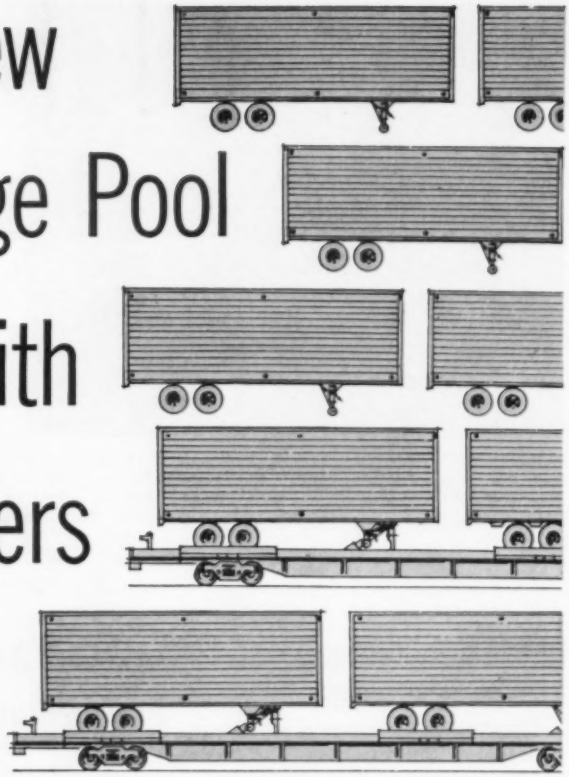
Intercity freight tonnage hauled by truck during May of this year was 1.8 per cent less than the volume hauled in May 1959 the American Trucking Associations reported. May truck tonnage was 1.6 per cent above that of April 1960. The 416 reporting carriers, more than one-third of all general freight carriers, transported 6,421,540 tons as compared with 6,537,934 tons in May 1959 and 6,318,250 tons in April 1960.

—DA—

Pallet Users' Conference

The Second Annual Western Pallet Users' Conference will be held at the Statler-Hilton Hotel in Los Angeles, Nov. 17-18. Under sponsorship of the National Wooden Pallet Manufacturers Association, it will feature talks by industry leaders on pallet pools, maintenance, and purchase.

T. I. P. – the new Trailer Interchange Pool for piggyback – with payment for trailers keyed to usage!



T.I.P., the Trailer Interchange Pool, is a Rail-Trailer program that brings a vital new definition of efficiency to piggyback . . . with its dual-per-diem standard and flexible carrier interchange features which establish a cost application based on trailer use.

Here is a modern fleet of trailers ready for your immediate use, placed at strategic nationwide Pool Points. Under the T.I.P. dual-per-diem standard, full charges for trailers are made only when trailers are in use . . . and member-carriers, who have subscribed to a specified number of trailers, may place their idle trailers in the Trailer Interchange Pool for use by other members. When the trailers are so used, the daily charge is assumed by the user.

When traffic movements occur over the lines of two or more member-carriers, the daily trailer charge is paid to the Pool by the member-carrier in possession of the trailer.

Immediate economies of T.I.P. are apparent where traffic unbalance, irregular use of piggyback, or "peak" volume demand a flexible trailer equipment supply.

Check these other vital features of T. I. P.

- ✓ Trailers in sizes and styles to suit your needs
- ✓ Absorption of trailer damages over $100
- ✓ Nationwide tire replacement program
- ✓ Centralized collection and administration
- ✓ Relief from costly capital investment
- ✓ Elimination of licensing expense
- ✓ Fully tested preventive maintenance
- ✓ Financial resources for anticipated growth
- ✓ Network of convenient regional offices

Put T.I.P. savings to work for you—act now to join the Trailer Interchange Pool. *Get the full details from Rail-Trailer!*

Trailer INTER CHANGE Pool

On the Line—

Everybody Wants to be a VP

During the past month we had some very interesting talks with experts in several fields—purchasing agents, materials handling engineers, marketing specialists, packaging designers, research and development scientists, personnel managers, traffic managers, and many other people with well-known as well as little-known job titles.

Naturally, each man believes that his function is very important to the company for which he works. Some of these people are active in their professional associations. All seem to be very ambitious.

One purchasing agent, for example, said, "Do you realize that purchasing agents in this country control the buying of over $500 billion in raw materials, equipment, and components?

"The old concept of purchasing by price chiseling and badgering is passé. We are in an area of materials management that considers future as well as present needs. It often means long-range commitments, obligating the company for millions of dollars.

"Such great responsibility should be handled only on the corporate level. As such, a purchasing executive should have top management status—specifically on the vice president level."

Then we'll listen to a marketing man who will say, "The lifeblood of any industry is marketing. Without markets, a company soon would go out of business.

"Salesmen always aim for the big name prospects, ignoring countless others whose buying collectively may amount to greater gross volumes. More than that, marketing seeks competitive advantages. It finds the reasons why people buy and why they don't. Using these reasons, it builds up a red hot sales pitch for the salesmen.

"Marketing sets production goals. It builds small business into large business. But, to be most effective, the marketing executive must have the authority to put his findings into action. He should have vice presidential status."

And so on and on. Each man in each group can think of dozens of high-powered reasons for being promoted to vice president. Wouldn't surprise us a bit if the shop's union steward could present the same kind of argument.

Maybe this is good. We are inclined to think it is not. We see the value of having key corporate functions represented at the company conference table. But, away from that table, we favor their integration into broader areas. This makes for good management.

Too many chiefs make good management very difficult. Worse, each chief tends to build a bigger tribe than the next. This is bad.

Liability Becomes An Asset

Every industry has experienced a certain amount of aches, pains, and confusion because of obsolescence of its equipment. In some cases, there have been serious financial problems until depreciation and tax write-offs could be taken.

Today, a paradox, almost without parallel, is developing in the air transportation industry.

The rapid acceptance of jet aircraft by the public has reduced bookings on the big piston engine planes. As a result, many of them have been idled. This has created a surplus of the propeller-driven craft—excluding, of course, the jet props.

A surplus of airplanes can be a real bad problem. The worst is the tie-up of millions of dollars from which no income is produced. An equally bad result is the loss of business.

To make matters worse, there is no "used market" for these airliners. There is a nice little business in remodelling smaller planes. But nobody, or hardly anybody, is shopping around for DC7s or superconnies.

But the problem has been solved. Those big airliners are being converted into all-cargo planes. Airline after airline, among the trunk lines, is quietly but rapidly engaged in such a conversion program. Even airlines that never solicited air freight have plans for going into this end of the business in a big way. And about a dozen foreign flag airlines are in the act.

This is an interesting switch of a liability, in a sense, to an asset. And the timing is in the airlines' favor. Air freight has been showing a steady gain. With more planes, more carriers, and more frequent service, the cargo end of the business should show a real boom.

H. W. Greene — EDITOR

smart truck users choose

NationaLease

the PREFERRED way to lease trucks

because it's national in experience and service—local in costs and controls

NationaLease supplies everything but the driver at flexible, local-level costs. On-the-spot management provides highest efficiency; full service, one-invoice truckleasing—the LEASE-FOR-PROFIT way.

NationaLease service doesn't add to your cost . . . it saves. Saves the capital and management time you now spend on trucks so you can put yourself—and your money—back into your own business.

Lease for Profit

Lease a new Chevrolet, or other fine truck, operate it as your own with no investment, no up-keep.

THIS IS THE SIGN OF ADT

The world's most reliable automatic protection services against fire, burglary, holdup and other hazards.

ADT subscribers are proud to display this monogram on their premises. It is a promise to their employees, customers and neighbors that they have provided the most dependable and modern service available to protect their lives, their property and their jobs.

The reputation of this symbol stems from the unmatched efficiency of the organization behind it, the American District Telegraph Company. Superior *service* is responsible for this position of leadership. All ADT systems are regularly inspected, tested and always ready for reliable operation.

Is your property 99.99% immune to losses by fire or burglary? If not, call the ADT office listed in your telephone directory and find out how you can be better protected and (as is often the case) save money, too!

Drug firm discovers a

prescription for curing warehousing headaches

MAKING THE ROUNDS. In a matter of minutes, Link-Belt in-the-floor Trukveyor travels through warehouse of Narco Drug Co., Inc., wholesale drug firm, St. Louis, Missouri. Operating mechanism is in the floor . . . out of the way, yet easily accessible for routine maintenance.

LINK-BELT Trukveyor system speeds and simplifies order-filling at Narco Drug Co., warehouse

You *CAN* have fast, efficient order-filling when you've got more than 20,000 different products . . . scattered over 16,000 sq. ft. of shelving! Narco Drug Co. proves it can be done with a Link-Belt in-the-floor Trukveyor system.

The Trukveyor moves swiftly through the warehouse . . . can convey 400 double-deck carts per hour. Carts are tagged with shelving code letters to alert stock pickers along the route. When orders are completed, carts are removed from Trukveyor at packaging department. Orders are checked and packaged, carts are returned to Trukveyor.

In *any* warehouse, Trukveyors mean speed in stock handling and efficiency in overall operation. They move merchandise quickly, safely, orderly . . . eliminate congestion, reduce physical effort, minimize errors and damage.

Link-Belt Trukveyors can be custom-tailored to practically any layout or capacity requirement. And all components are standardized and available from stock. For full details, contact your nearest Link-Belt office.

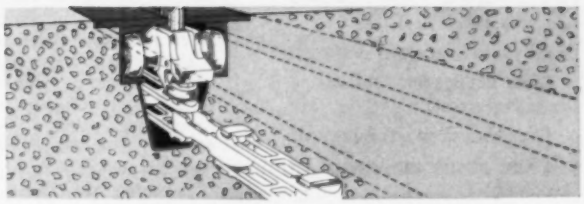

DIAGRAM of in-the-floor Trukveyor mechanism.

COLOR-SOUND FILM AVAILABLE!

Fifteen-minute, 16-mm film, "Pathway to Profits," shows Link-Belt Trukveyors in action . . . reveals how they solve handling problems, reduce costs. For film and Trukveyor Data Book 2497, *WRITE LINK-BELT EXECUTIVE OFFICES TODAY!*

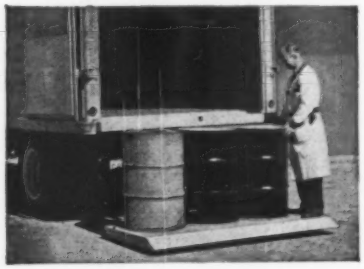
FOR FASTER, SAFER LOAD HANDLING:

WATSON WEIGHTLIFTER

ELEVATING TAILGATES

* SERIES 1100 (1100 lb. capacity)
* SERIES 1300 (1300 lb. capacity)



FOR STAKE & VAN TRUCKS ¾ TO 2½ TONS

Check these important features:

* Power closing, automatic locking standard equipment!
* Single lever, single cylinder control!
* Greater capacity per pound of installed weight!
* Fast operation—full load lift to 45½" in 11 seconds (1100), to 51" in 13 seconds (1300).
* Added safety—maximum lowering rate positively controlled to prevent "crashing"; load stops instantly if lever is released; all platforms of safety plate.
* Low cost—only $584 for largest series 1100 model, $613 for series 1300 (f.o.b. Emeryville; you install—it's easy!)

WATSON WEIGHTLIFTERS also available for all pickups. Write today for free literature; please address Dept. 26.

. . . News

(Continued from Page 12)

News Briefs

The first scheduled all-cargo air freighter service direct from midwestern United States to key cities in Europe has been inaugurated by **Pan American Airways.**

Air Cargo Inspections Inc., New York, has been formed to provide inspection services for all airlines seeking to investigate claims of damaged air cargo and luggage. This company will maintain a staff of specially trained investigators having a thorough knowledge of air cargo.

Combining highway, sea, and rail movement, **The Florida East Coast Railway** has an arrangement with **Sea-Land Service, Inc.,** whereby demountable truck-trailers, brought into Jacksonville, Fla., by ship, are being piggybacked by rail to South Florida destinations.

A six-man American inland waterways delegation recently inspected Soviet port operations, shipbuilding, major locks and lock systems, and operations of research and training facilities. A similar Soviet group will tour this country as part of the U. S. State Department's cultural exchange program. The exchange is being coordinated by **The American Waterways Operators, Inc.**

The New York Central System inaugurated Super-Van Service between Boston, Worcester, Springfield, and Chicago on a fast freight schedule recently.

United Fruit has terminated its weekly sailings to Havana and Santiago, Cuba, from New York, Baltimore and New Orleans.

United Air Lines now offers overnight all-cargo flights from San Francisco to Chicago and New York. Cargoliner service is also offered between the Pacific Northwest and San Francisco.

Eastern Air Lines and **Valencia Baxt Express, Inc.,** of San Juan, Puerto Rico, are coordinating their air and ground transportation facilities to provide door-to-door pick-up and delivery service for air freight throughout the Commonwealth.

A new airplane type hydraulic cylinder, developed and tested by **The Bendix Corp.,** is being used successfully on railroad cars. The new cylinders are expected to reduce costly cargo damage and save railroads considerable dollars in claims.

American Airlines now offers transcontinental airfreighter service between New York and the west coast. Airfreight service also links United States and Mexico.

A million dollar expansion and development program has been announced by **North American Car Corp.** for its Sag Junction Terminal, located southwest of Chicago.

Folding cartons and plastics packaging problems were the subjects of two different seminars sponsored recently by **The Packaging Institute, Inc.**

An 80-acre Transportation Exhibit Section at the New York World's Fair will be developed and operated on a self-supporting basis by **The Port of New York Authority.**

World-wide commercial banking is added to **American Express Services** for U. S. firms here and abroad and for foreign concerns in their own countries. The service becomes part of a package that also includes foreign freight forwarding, field warehousing, overseas car rentals and a variety of travel and credit facilities.

A new ocean cargo documentation system which expedites cargo delivery at reduced labor costs has been developed by the **U. S. Navy Supply System.**

Truckmen in New York City are being offered by **Mercury Service Systems** a new service on air freight shipments which eliminates their trips to the airport while providing immediate payment to them of charges.

A cargo pact signed by **Delta Air Lines** and the **Railway Express Agency** enables shippers living in areas not served by airports to send their products directly by airfreight.

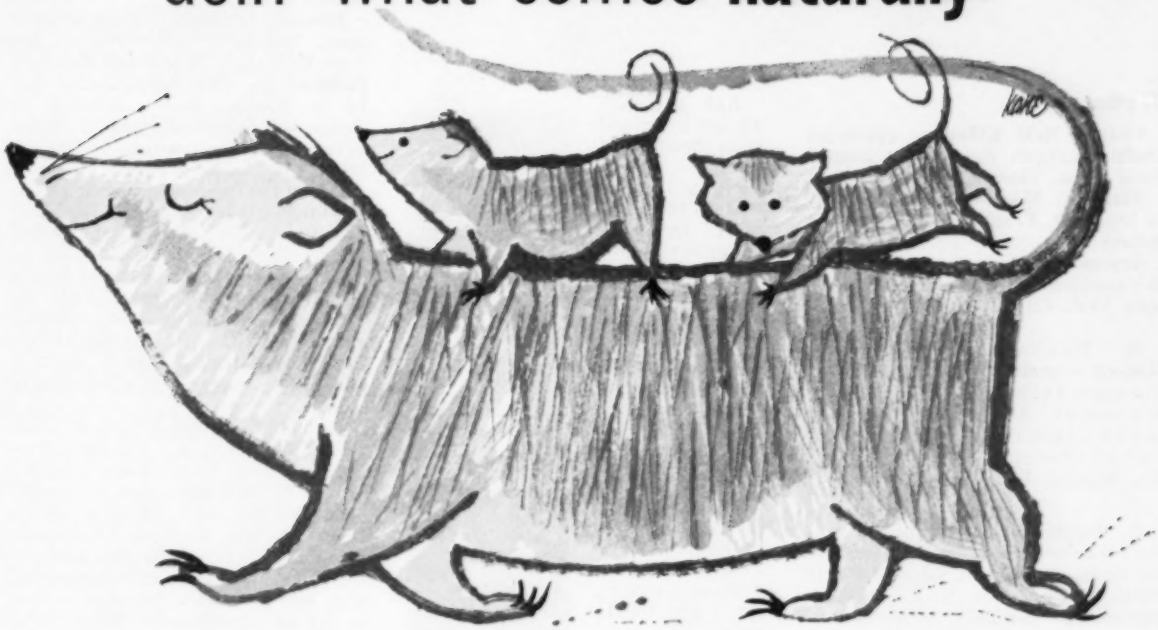
doin' what comes **naturally**



The G-85 was conceived and engineered exclusively for efficient piggybacking

Sure, you can piggyback on a converted flatcar. But this makeshift has many shortcomings. That's why General American developed a real piggyback car, the G-85.

The G-85 does an outstanding job. Securing the trailer is a one-man operation done from within the cab. Center guide rails assure automatic alignment. It loads and unloads faster, weighs less, carries more payload, carries containers, vans, auto carriers and trailers . . . in any combination. It gives better protection against shock, provides lower clearance, needs no expensive loading equipment—and is compatible with all other piggyback cars.

No other piggyback car gives you so many money-saving features. No other piggyback car costs so little in the long run. Get full information from your nearest General American office. In piggybacking, *it pays to plan with General American.*

Men in the News

Traffic

Charles McD. Gillan — appointed traffic manager, Harry T. Campbell Sons' Corp., Towson, Md.

Vernon C. Moss—promoted to traffic manager, Frigidaire Div., General Motors Corp.

George Pasch—new general traffic manager, General Cable Corp., New York City.

O. Denton Hudson — named transportation manager, Armour Agricultural Chemical Co., Atlanta, Ga.

J. Harold Wright—named manager, transportation development for the traffic department, General Foods Corp., White Plains, N. Y. **Jack M. Carter**—new manager, motor carrier transportation; **John W. Gilius**—manager, rail transportation; **Robert E. Fox**—manager, traffic services, and **Leonard V. Simms**—assistant to the director, distribution services.

Dr. Leon N. Moses—appointed director of research, Transportation Center, Northwestern University, Evanston, Ill.

Bernard H. Ways—new treasurer-assistant secretary of The Associated Traffic Clubs of America. Ways is vice president, Fleet Transfer Co., Baltimore, Md.

William E. Allen — named traffic manager, Milwaukee Crane Div., Novo Industrial Corp., Cudahy, Wis.

F. B. Cartlidge —appointed eastern general traffic manager, Colorado Fuel and Iron Corp., Trenton, N. J.

Col. Richard M. Ludlow—appointed director of services, Military Traffic Management Agency. This agency is responsible for the procurement of all commercial transportation for the movement of freight and passengers of the Armed Forces within the continental United States.

R. A. Gosline—now traffic manager, Rilco Laminated Products Div., Weyerhaeuser Co., St. Paul, Minn.

Transportation—Air

William H. Clarke — now staff supervisor, airfreight tariffs for American Airlines.

John M. Clampitt—appointed director of advertising, United Air Lines.

Jack Dicker — named general sales manager of recently - formed Packaging and Freight Div., Aircraft Dynamics International Corp.

—Highway

Finley S. Lake—named chairman, 1961 program committee of ATA Council of Safety Supervisors. Lake is safety director, Interstate Motor Freight System, Inc., Grand Rapids, Mich.

Thomas C. Farrel—general sales manager, Mercury Motor Freight Lines, Inc., St. Paul, Minn.

Gail H. Crawford—named chairman, newly created Motor Carrier Committee, Denver Chamber of Commerce. He is executive vice-president and general manager, Ringsby Truck Lines, Denver.

Fred S. Ball—promoted to sales manager in San Francisco, Calif., for Interstate Motor Lines, Inc.

John Barr—assistant director of safety, East Texas Motor Freight Lines, Dallas.

Frank H. Bond —new traffic representative, New England headquarters, Branch Motor Express, Providence, R. I.

M. D. Livengood — elected vice president-treasurer; **John L. Bunce**—vice president-secretary; and **Peter A. Kalloway**, assistant secretary-treasurer, Watson Brothers Transportation Co., Inc.

Gillis L. Kalb—safety director, Motor Cargo Div., Consolidated Freightways, Inc.

Joseph F. Sloan—promoted to general traffic manager and **Robert Gates**—assistant traffic manager, Denver Chicago Transport Co., Inc.

—Rail

Frank E. Barnett—elected director, Railway Express Agency, Inc. Barnett is vice president and Eastern general counsel, Union Pacific Railroad Co.

Harold E. Shipley—appointed Eastern Regional marketing manager, Railway Express Agency, New York City. **David E. Fackler**—named director, Advertising and Public Relations Div.

Edward J. Barrett—general manager, Industrial Development, The New York, New Haven and Hartford Railroad Co. His headquarters will be in Boston, Mass. **Bernard G. Pugar** — appointed general traffic agent, with headquarters in Detroit, Mich.

Larry L. Jones—new sales manager—trailers for the Sparton Railway Equipment Div., Jackson, Mich.

Harry L. Eddy—to head Transportation Library, Association of American Railroads, Washington, D. C.

Norman L. Schultz—named assistant freight traffic manager-rates, Rock Island Lines. **Don J. Smith**—general manager, the Alaska Railroad.

Arthur E. Baylis — named vice-president-marketing, Freight Marketing Dept., New York Central. **Wayne M. Hoffman**—new vice-president—freight sales, Freight Sales Dept. **William A. Newman**—named foreign freight sales manager. **Douglass Campbell**—New York Central vice-president, Chicago, placed in charge of railroad's Public Relations and Advertising Depts.

—Water

Peter Schauffler—new deputy director of commerce, Port of Philadelphia.

Hendryk S. Weeks—appointed assistant manager, Port of New York Trade Development Office in London, and **Louis F. Zwartverwer**—assistant manager of the port's Continental Trade Development Office in Zurich.

Frank B. Hawkinson—named manager, sales promotion, advertising and public relations, Sea-Land of Puerto Rico (Div. of Sea-Land Service), Port Newark, N. J.

Materials Handling—

John W. Carlson—assistant general manager, Allis-Chalmers Construction Machinery Div.

Harold O. Perlman — new sales manager, Industrial Div., Lathrop Paulson Co., Chicago.

Charles W. Massie, Jr.—vice president - sales, Clark Equipment International, C. A.

Obituary—

William J. Stebler—past president, General American Transportation Corp., died recently in Evanston, Ind.

John R. Horne—director of traffic, Ryder Truck Lines, Inc., Great Southern Div. died recently after a long illness.

Burlington

KANSAS CITY

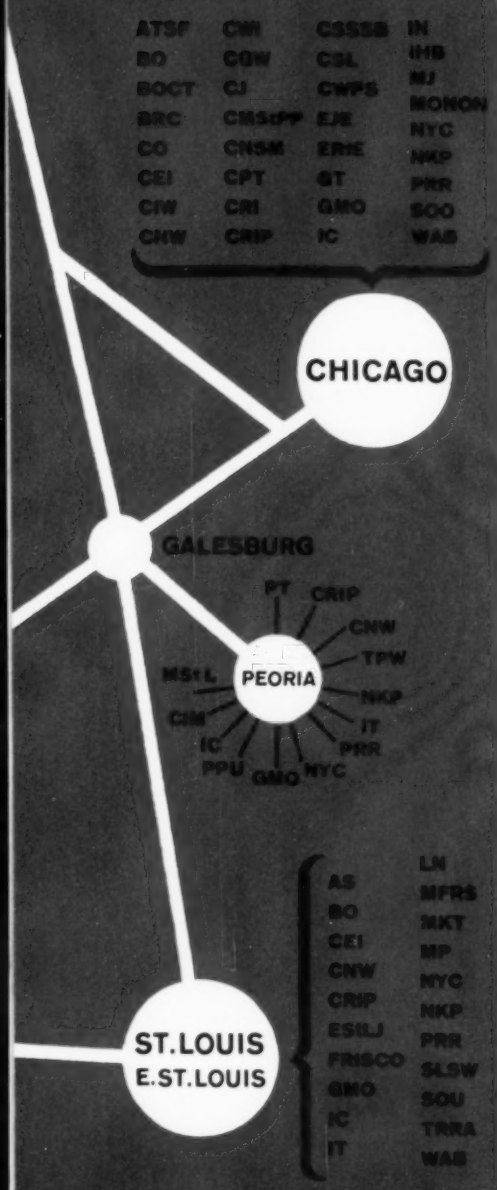
next day DELIVERY

at KANSAS CITY
from Chicago,
St. Louis or Omaha



Here's why SMART SHIPPERS specify Burlington to, from and via KANSAS CITY

A glance at the map shows you why: Kansas City is at the heart of the nation. Radiating out from it are the transportation arteries of America. One of the greatest of these arteries is the Burlington... your best routing *to or from Kansas City.*

When you ship *via Kansas City*, you select a direct route to many markets. And when you specify *via Burlington*, you select a railroad with roadway, facilities and manpower which guarantee you prompt service, without unnecessary delay.

Remember: It's good business to ship *via Kansas City*...and *via Burlington!*

from CHICAGO, ST. LOUIS or OMAHA via KANSAS CITY

TO	DELIVERY
Fort Worth—Dallas	Fourth morning
Houston—San Antonio	Fourth morning
Tulsa—Oklahoma City	Third morning

Corresponding schedules to and from intermediate points

Whatever your freight transportation need—carload or less-carload movements, piggyback, over-the-highway trucking, or a combination of several types—the Burlington is ready, willing, and able to serve you.

From the Great Lakes to the Rockies... from the Canadian border states to the Gulf of Mexico... *you ship better when you ship Burlington.*

WASHINGTON DA

By Neil R. Regeimbal, *Chilton Washington News Bureau*

TRUCK DEMURRAGE READIED — The ICC is sifting comments on a proposed new uniform truck demurrage rule. The proposal is aimed at ending the present variety of truck demurrage charges in the East. It was drafted by the truckers and is supported by the Eastern Industrial Traffic League. Major provisions would allow free time of from four hours for a truck of billed weight of 24,000 lb to six hours for one of 36,000 lb or more. Demurrage charges would run five dollars for each half hour over the free time, except when trailers are spotted by consignee or consignor without the carrier's power units or employes. Present demurrage charges are frequently not paid or collected. In some cases don't apply.

MILITARY STORAGE STEADY—Use of commercial storage space by the military agencies will remain about at present levels, Defense Department planners reveal. General purpose storage requirements, involving space for weapons, supporting goods, and spare parts, is slipping. This material is now stored almost exclusively in government warehouses, and the inventory is shrinking due to improved inventory management and changes in weapons purchasing.

RAIL PRODUCTIVITY RISES — Railroad workers are increasing in productivity, the U. S. Labor Department reports. Output per man-hour in terms of revenue traffic last year was 35 per cent higher than the base period of 1947, compared with 27 per cent higher the previous year. Output in terms of car miles for each employe was 39 per cent higher than the base period last year, compared with 33 per cent the previous year.

RAILS LOSE BIDS—Railroad efforts to win back business by lowering rates selectively are running into trouble. An ICC examiner has recommended that Plans III and IV piggy-back be found unlawful and unreasonable. They are used mostly by freight forwarders. In Plan III, the shipper provides all service except a flatcar; in Plan IV, even the car is supplied by the shipper. Examiner ruled they unfairly divert traffic from trucks, divert trade which railroads would probably get anyway, but at higher rates. (Earlier, another examiner had upheld Plan IV service, so the final outcome is in doubt.) In another recent action, an examiner ruled railroad "contract rates" were commendable but illegal under present antitrust laws and the ICC Act.

ROAD FUNDS READY — The Commerce Department is ready to pass out to the states the full $2.9 billion in federal highway building funds provided by Congress for the 12 months beginning July 1, 1961. This includes the $2.2 billion authorized by Congress for the 41,000 mile interstate highway system, and 75 per cent of the $925 authorized for primary, secondary, and urban (ABC) federal-aid roads. Apportionment of the rest of the ABC authorization will follow the final census count, on which distribution in part depends. Advance apportionment gives states time to plan the use of their funds.

LABOR LAW CLAMPS DOWN—Labor and management officials are feeling the bite of some sharp teeth in last year's Landrum-Griffin Labor Reform law. Government officials have already used the law several times to block union picketing practices outlawed for the first time by the new act. The U. S. Labor Department has filed a precedent-setting court suit under the Act to nullify a union election. Involved is a union representation election by employes of a major oil company, where both an independent union and the Teamsters Union sought to represent them. The suit charges proper election procedures were not followed.

RAISE GRAIN STORAGE — The government is going to increase its stocks of grain stored along the Eastern Seaboard to promote civil defense readiness. Most of the increase will be dumped into the government's mothballed ships. But use of commercial storage facilities will be increased about 5 per cent. Wheat stored in ships will be doubled to 30 million bushels. An increase of 20 to 25 million bushels of other types of grain is scheduled along the Eastern Seaboard from Virginia through New England in both government and commercial facilities.

DELAY UNION DUES PROTEST—Use of compulsory union dues for political purposes by unions will continue to be legal—at least until after the fall elections. The U. S. Supreme Court will hold more arguments on the controversy next fall, delaying a decision until sometime next winter. The case stems from a section of the Railway Labor Act which sanctions union shops in the rail industry. Six employes of the Southern Railway complained that a part of the union dues they are compelled to pay under a closed-shop contract are used to support candidates and political doctrines which they oppose. The Georgia State Supreme Court upheld the workers.

Needed: A nomenclature for container shipping

The term containerization has meant many things to many people. However, with the advance of standards, a clearly defined container nomenclature is developing

By A. W. Greene, *Editor, Distribution Age*

IN EVERY discussion of new developments in transportation, one relatively new word is bound to come up. The word is containerization. But, sooner or later, there comes an awareness to those taking part in the discourse that they are not talking about exactly the same thing.

Some people think of any unitized load of packaged goods on a skid or pallet, bound together with some kind of strapping. Others think of large, metal hopper boxes for carrying bulk commodities or raw material. Still others have in mind highway trailers, with or without demountable chassis, in piggy-back or fishy-back service.

In principle, all are correct in their assumption. Containerization merely is an extension of unitization—the unit load principle. The main difference is that the product, or products, lie in a container rather than on it. In addition, the container may be reusable.

The container concept has several advantages over the unitized load. Some of these are:

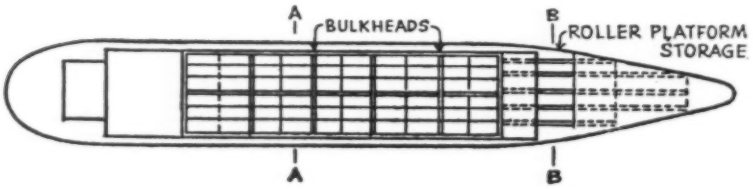
a. Permits larger units than those on standard skids or pallets.

b. Affords greater ease and speed in assembling shipments.

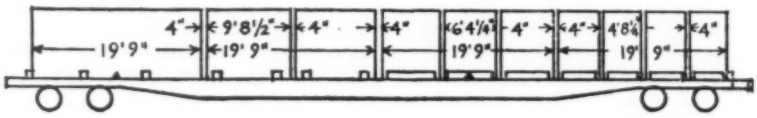
c. Maximum cube of vehicle or vessel may be utilized without sacrifice of load stability.

d. Provides greater protection from impact damage.

e. Some types make pilferage almost impossible.

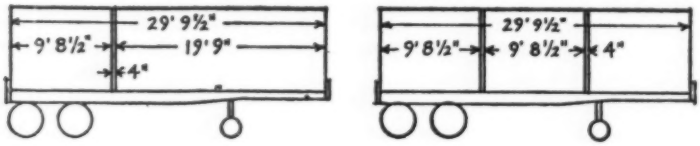


Overhead view of ship shows below-deck arrangement of containers. Containers, 20-ft long, pass easily through 40 and 30-ft hatches. Power plant is aft



On 80-ft flatcar, above combinations can be carried. Also a 30-ft, a 20-ft and two 15-ft containers will make a load. Two 40's also can be carried

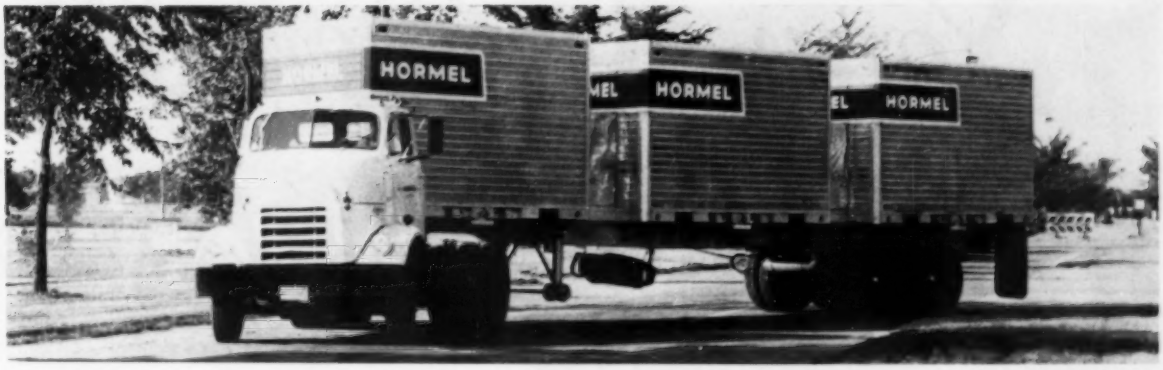
Combinations of various container sizes permit maximum utilization of a 30-ft trailer. Two 6-ft 4-in. containers with a 4-ft box make up a 20-ft load



Types of Containers

Between the largest unitized load and the largest "box" that can be moved on highways, there are many types of containers. However, these can be readily classified into four or five categories: Integrated pallet containers, jumbo pallet containers, cargo containers, bulk freight containers, and van containers. They have a wide range of application. from in-plant use to general freight transportation.

Except for the jumbo pallet and van containers, these are standard production items. The jumbos usually are a custom design item. And, while certain types of van containers are available, their design must be care-



fully considered to insure the desired degree of interchangeability between the types of transportation to be used.

Most of these containers are designed to be moved, stacked, loaded, or unloaded into vehicles by fork trucks. However, if they are to be loaded or unloaded from gondola cars or barges, mobile cranes may be required.

Before any application of containers can be considered, it will be necessary to understand the characteristics of each. The following basic data will cover their principal features.

Integrated Pallet Containers

These are the smallest of all types. They employ a skid or pallet base, although some models have stands, and their sides can be rigid or collapsible. The sides can be made of a variety of materials; such as wood panels, wood slats, metal, wire mesh, and so on.

Three sizes can be standardized for interchange between air, highway, rail and water transportation. Their outside length and width dimensions, and the loading characteristics would be as follows:

54 x 44 in. Two of these could be loaded into the standard 110-in.-wide boxcar, and two into a standard highway van.

44 x 336 in. Three of these can be loaded into a boxcar, and two into a highway van.

36 x 29 in. Three of these can be loaded into a boxcar, and three into a highway van.

These containers would be based on the standard 48 x 40-in., 40 x 32-in., and 32 x 24-in. pallets.

For maximum stacking in vans or boxcars, the height of these containers should be:

27 in. Three of these would stack to a height of 81 in. in a highway van, and four to a height of 108 in. in a boxcar.

40 in. Two of these could be stacked in a van, and three in a boxcar.

60 in. These would stack two high in a boxcar, but only one in a van.

82 in. Stacking would not be possible with containers of this height.

Jumbo Pallet Containers

These containers have been used mostly for highway transportation, also some are being shipped by rail. For highway use, they also are known as truck liners or bins.

Some are made of wood, with plywood sides, although aluminum and perforated metal also are used. They are used mostly for bulk materials of low density, light weight components, odd-shape sheet metal stampings or castings.

One of their characteristics is mobility; in that they usually are equipped with rollers, skate wheels, or casters. However, some are moved by fork truck and loaded into vans or cars whose floors are equipped with narrow roller conveyors. In transit, they are braced with cross bars that fit into tracks mounted on the walls.

The recommended size is 88 in. long and 54 in. wide. This would permit broadside loading into a van, or two endwise in a railroad car.

Cargo Containers

Cargo containers differ from pallet containers in that they are fully enclosed, of heavier construction, and of weatherproof design. They can be transported in gondolas, flatcars, on ship deck or open barges, and on flatbed trucks and trailers. If the cargo is not perishable, these containers may be used for outdoor storage.

A major advantage, from the shipper's standpoint, is that, loaded or empty, they are exempt from freight charges.

Most of these containers are being made in 8-ft lengths, 76-in. widths, and 82- and 96-in. heights. These dimensions are recommended for maximum interchangeability between the different modes of transportation.

Many models are equipped with skids and stands for fork-truck handling. Doors can be locked or completely sealed. Most designs also have built-in eyes for crane and other overhead handling. Most models also can be stacked. Insulated types are available for shipping refrigerated products.

Bulk Freight Containers

An increasingly popular application of containers is for shipping bulk materials and raw products; liquid or dry, coarse or fine. They are loaded at the top and unloaded from the bottom. Many types are available, with special features to handle a wide variety of materials. ●

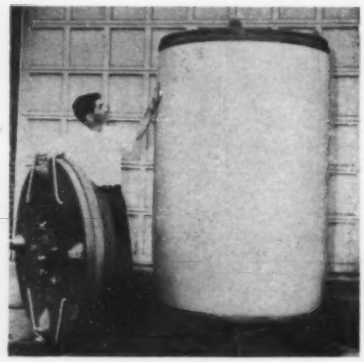
DA NEW PRODUCTS

. . . . FOR FURTHER INFORMATION

Collapsible Plastic Drum

A new aid to cargo movement is this collapsible plastic container. **Highway Trailer Industries, Inc.,** makes it. The collapsible drum can carry grains in one direction, liquid



chemicals on the return trip. It may prove valuable in ltl and lcl quantities. Named Flexi-Drum, the unit uses thin disposable plastic liners. Your fork lift, hoist, or crane can handle the drums.

Circle 35 on Card, Facing Page 144

Outdoor Fork-Lift Truck

New entry in the outdoor fork-lift truck field is by **Ford Motor Co.** The truck is equipped with either a gasoline or diesel engine. Four stacking heights — 10, 12, 16, and 21 ft — are available along with two and three stage masts. Loads of 4000 lb can be

handled by the 10 and 12-ft lift trucks. Face plates of 42 and 60 in size are available for handling bulk materials, standard-sized pallets, and skids. The mast can be tilted hydraulically 6½ deg forward and 13½ deg backward. The load can be shifted 6 in. from side to side by lateral movement of forks.

Circle 36 on Card, Facing Page 144

End Load Attachment

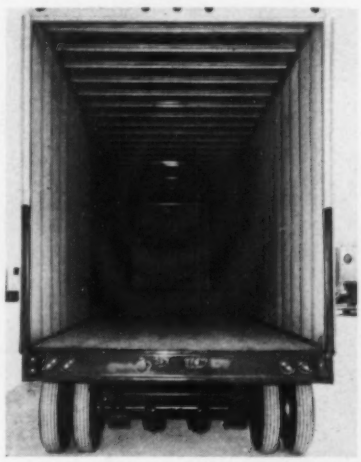
This **Hyster** Challenger 60 lift truck is equipped with an end load attachment which holds lumber by one end.

It makes use of existing stacking arrangements in shed and yard. The end loader can be removed quickly for regular handling by conventional forks. Many lumber items originally received, stored, and shipped by piece can now be received in unit loads.

Circle 37 on Card, Facing Page 144

Electronics Van Ready

Fruehauf Trailer Co. has developed a new electronics van. It provides maximum cube and positive load control for hauling the growing stream of electronic equipment. But it is



equally useful for other cargoes. The van has a 15-in. drop and uses 15-in. tires—the wheel housings are eliminated. The basic design of the Warehouseman model, released earlier this year, is followed.

Circle 38 on Card, Facing Page 144

Fire Fighting Sphere

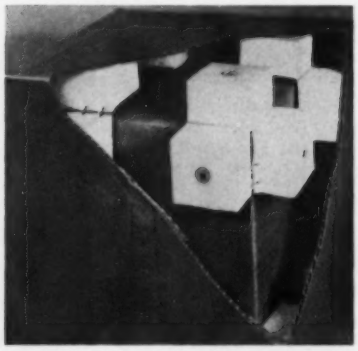
It looks like a bright red cannon ball. Easy to spot, **Ansul Chemical Co's.** new multipurpose fire extinguisher features one hand operation for direct hits. Lift trucks, semi-trail-

er cabs, other restricted spaces easily provide space for the extinguisher and bracket. Used cartridges are quickly replaced. This makes for uninterrupted fire protection.

Circle 39 on Card, Facing Page 144

Cushion Cuts Vibration

No piece of electronic equipment thrives on shocks. Aware of this, **Hardigg Industries** now makes pads for a floating inner package held firmly on all eight sides of the shipping



container. The pads absorb vibration and shock during shipment. Foam laminated to heavy corrugated, the pads fit into each corner of an outside shipping carton to support an inner container holding the product being shipped.

Circle 40 on Card, Facing Page 144

and EQUIPMENT

PLEASE USE READERS' SERVICE CARD • • PAGE 144

Heavy Duty Sweeper

A new rider-type power sweeper is available from **Clarke Floor Machine Co.** The unit sweeps a 36 in. swath and can be equipped with one or two side brooms. Its all-unitized

welded body has ¼ in. steel side plates and a 3/16 in. channel steel protective bumper encircling the entire machine. It has a 66 in. turning radius for easy operation and plenty of power for sweeping inclined ramps as well as level surfaces.

Circle 41 on Card, Facing Page 144

Bulk Material Freight Car

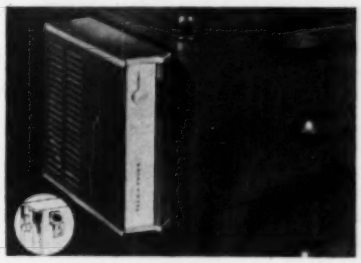
A single discharge outlet for pneumatic unloading of malt and other granular products is a feature of this covered hopper car. **Pullman-Standard**

has designed everything to flow through the one discharge point. The time and labor of multiple connection is eliminated. The outlet is self-cleaning.

Circle 42 on Card, Facing Page 144

Deskside Intercom

Thought of interoffice communications? **Talk-A-Phone Co.** has a new unit which can be placed efficiently on

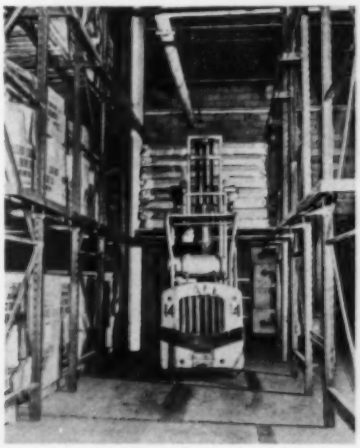


the side of a desk. A bracket attachment makes it possible to place the intercom on a wall or table too. Work space is kept clear.

Circle 43 on Card, Facing Page 144

Drive-Through Rack

A drive-through rack, made by **Sturdi-Bilt Handling Div., Union Asbestos & Rubber Co.,** eliminates aisle space to double the storage capacity of a given area. Pre-fabricated parts are quickly assembled to provide a convenient, economical means of handling mass storage items. Bays

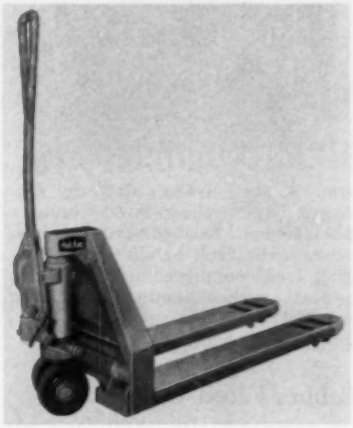


can be made as deep as needed, and as high as the lift trucks can reach. Drive-through racks have overhead bracing only and both ends are completely open for loading and unloading.

Circle 44 on Card, Facing Page 144

Hand Pallet Truck

The Raymond Corp. has added a new member to its line of hydraulic hand pallet trucks. It comes in standard widths of 21 and 27 in. with 32, 36, 42, and 48-in. fork lengths. Forks are

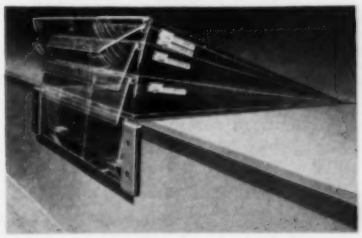


raised by pumping the towing handle. A pressure-sensitive foot pedal allows fast or slow lowering. Booster rolls and tapered runner help pallets move on and off smoothly.

Circle 45 on Card, Facing Page 144

Lip-Actuating Dockboard

Dockboards by **The Kelley Co.** have a new automatic lip-actuating feature. The multiple-exposure picture shows the unit first in its normal dock level or cross-traffic position. When



the dockboard is released from level position by attendant, a precision counterbalance raises it to above-dock position. When the lip is high enough to swing over the truck bed, it automatically extends to working position and locks.

Circle 46 on Card, Facing Page 144

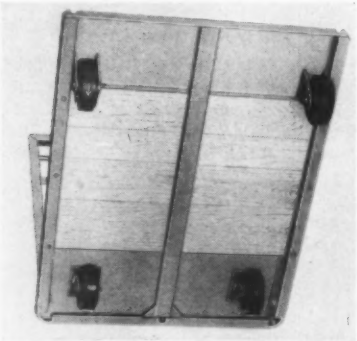
New Products and Equipment

(Continued from Preceding Page)

Improved Truck Bottom

Nutting Truck and Caster Co.'s line of cargo carts has been improved with the addition of a 3/16-in. steel channel center member which supports the entire length of the plat-

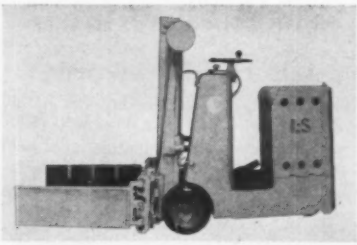


form. A steel frame platform now extends beyond the rack to eliminate rack damage. This construction also prevents the rack handle from damaging loads on preceding carts when one cart pushes another on a drag line.

Circle 47 on Card, Facing Page 144

Rubber-Faced Grab Arms

A fork-truck attachment with adjustable rubber-faced clamping arms for palletless handling of boxes, crates, tote boxes, and other smooth-surfaced loads is available from



Lewis-Shepard Products, Inc. This attachment has an opening range from 11⅝ to 59⅜ in. The arms are mounted on the arm carriers with a series of cap screws permitting interchangeability with other type arms.

Circle 48 on Card, Facing Page 144

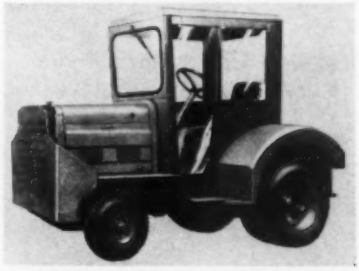
Stencil Ink in Aerosol

Now you can use **Reynolds Ink, Inc's.** stencil inks in aerosol can form for all shipping room stenciling, color coding, inspection, and other marking. The 16-oz container replaces the 12-oz can. All nine colors from red through yellow are available.

Circle 49 on Card, Facing Page 144

All-Weather Hard-Top Cab

A new all-weather cab with steel roof is being marketed by the **D and M Truck Top Co.** It is made with a safety glass windshield. Also has

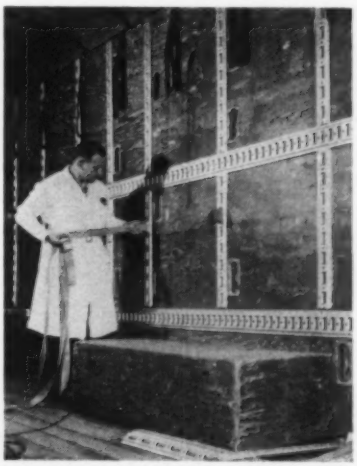


electric wiper. Heavy duck canvas and unbreakable glass side act as a foundation for rear roll-up curtains. Two-way zippers get you in and out quickly.

Circle 50 on Card, Facing Page 144

Cargo Control System

A cargo control system permitting quick, easy conversion of older moving vans and trailers into modern, specialized cargo vehicles is being offered by **General Logistics Div., Aeroquip Corp.** Utilizing either vertical or horizontal track, the system can be installed by the van owner directly over plywood walls, in virtually any combination. Cargo is secured with special nylon web strap assemblies that hook into the track and can be pulled tight and secured



quickly by hand. Extra cargo decks install easily on bracket-supported 2 x 4's. The brackets hook easily into the track, and cannot be jarred loose. Over 1000 cargo tie-off points are possible in a single installation.

Circle 51 on Card, Facing Page 144

Steel-Reinforced Bulkhead

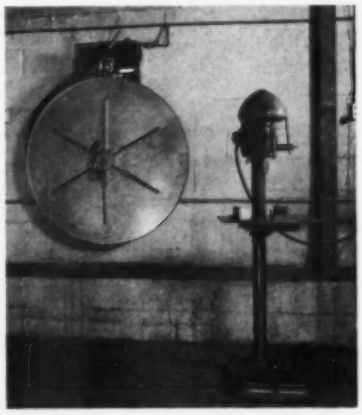
The weight of loose bulk loads has been put to work for the shipper. **Signode Steel Strapping Co.** uses the hard-to-control weight of loads like potash, bulk clay, rock salt, fertiliz-

ers, and wood granules to press the extended sides of flexible bulkheads tight and restrain movement. A pair of the leakproof bulkheads weighs only 70 lb. None of the lading spills out when the car is opened. The load is kept in the ends of the car—this allows easy access with mechanical unloading equipment. To make an opening in the load, simply cut the bulkhead, bottom to top, and tack cut end to the car walls.

Circle 52 on Card, Facing Page 144

Fire Hose on Reel

You can install this fire hose indoors or outdoors. The hose is kept in a reel mounted on the wall. Nozzle and valve are accessible from both



sides of the wall and may be pulled out from either side. The hose can be used to wash floors and sidewalks too. **Flinchbaugh Murray Corp.** makes it.

Circle 53 on Card, Facing Page 144

No More Shoveling Snow

No one worries about the snow until it's on the ground. But this year, the **Formula 33 Corp.** has developed a granular material which melts the snow off walkways, parking areas, and truck docks. It leaves no whitening residue. Plastic-lined containers give it long life. You broadcast it with a shovel.

Allis-Chalmers FTP60 6,000-lb pneumatic-tired lift truck

10 reasons why you cut yard-handling costs, increase operator efficiency with A-C pneumatics

1. Better performance, indoors or out, with heavy-duty Allis-Chalmers industrial engine.
2. Built for rough yard conditions. Rigid, deep-section steel frame takes stresses, holds parts in alignment.
3. Excellent balance of power and weight design permits outstanding gradability and stability.
4. Faster travel speeds match your job requirements.
5. Choice of standard transmission or two-speed POWER-SHIFT torque converter drive to fit your needs.
6. Operator works in comfort. Cushion seat is adjustable for leg room.
7. Tires last longer than standard tires . . . have much more rubber where wear is greatest.
8. There is extra reserve of electrical power for cold-weather starting, other needs, with 12-volt system.
9. New steel hydraulic lines eliminate chafing and vibration wear.
10. Less downtime because of outstanding ease of servicing and accessibility.

Let your dealer show you these and many other features of the better-than-ever Allis-Chalmers pneumatic lift trucks.

Allis-Chalmers, Milwaukee 1, Wisconsin.

New Products and Equipment

(Continued from Page 30)

Tank Trailer is Aluminum

Increasing strength while reducing overall weight of its aluminum tank trailers is what **Trailmobile, Inc.**, has been perfecting recently. It has come up with a tank trailer which utilizes

full length aluminum extrusions as the primary members for upper and lower portions of the shell. The extrusions, made of Kaiser aluminum, increase tank strength by 20 per cent. They eliminate cross welding.

Circle 55 on Card, Facing Page 144

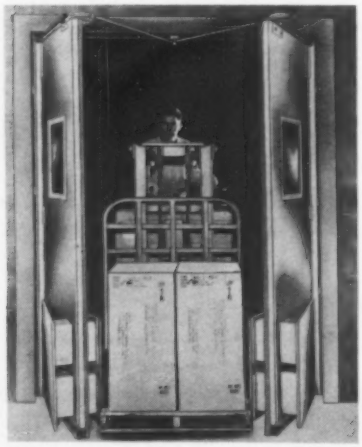
Weatherproof Label

Dirt, grime, and weather apparently do not disfigure a new label from **W. H. Brady Co.** You can type on it, stamp on it, and write on it. The label combines color-bordered writing space with glass-clear Mylar shield. The shield is applied over the label and slightly overlaps the entire perimeter—all edges are protected.

Circle 56 on Card, Facing Page 144

Foam Shock Absorber Door

Urethane foam is a main ingredient in the shock absorber doors developed by **Clark Door Co.** The foam, manu-



factured by **Nopco Chemical Co.** is used as a buffer between the actual door surface and the shock absorber panel. Trucks and dollies will not jar door.

Circle 57 on Card, Facing Page 144

Personnel Transport

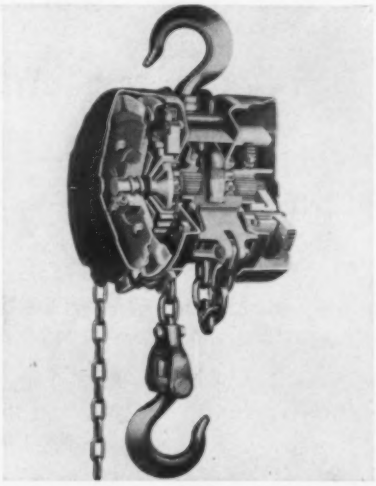
Four passengers plus a driver comfortably make use of this **Cushman Motors** electric truckster. The flatbed

has stake racks. Total load capacity is 1000 lb. Speed selector switch gives two forward speeds, one reverse speed.

Circle 58 on Card, Facing Page 144

Lightweight Hand Hoist

The Wright Hoist Div., American Chain & Cable Co., Inc. is manufacturing a hand hoist designed for portability, using aluminum in non-load carrying components to decrease



weight. Load-bearing parts are of strong, ductile, shock-resistant alloy steel. Available in capacities of ½, 1, 1½, 2, 3, and 4 tons, the smallest hand hoist weighs only 35 lb while the largest unit weighs 117 lb.

Circle 59 on Card, Facing Page 144

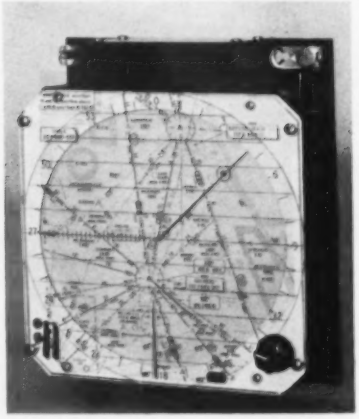
Storage Shelter

A new concept in additional working space is offered by **I & B Mfg. Co., Inc.** It consists of a rugged steel frame which is pre-cut and punched and a durable roof of gavanized sheeting or aluminum. This shelter is easy to ship and assemble and it moves on steel wheel casters. Units are 10 by 20 ft or 20 x 20 ft, with heights of 8, 10, 12, or 14 ft.

Circle 60 on Card, Facing Page 144

Navigation Aid

A pictorial display unit, which permits the pilot of a business aircraft to know his exact position at all times regardless of weather conditions, is being manufactured by **Electronics Div., ACF Industries, Inc.** The device utilizes a moving reticle or "bug," representing an aircraft, which moves freely under a transparent display map to indicate the

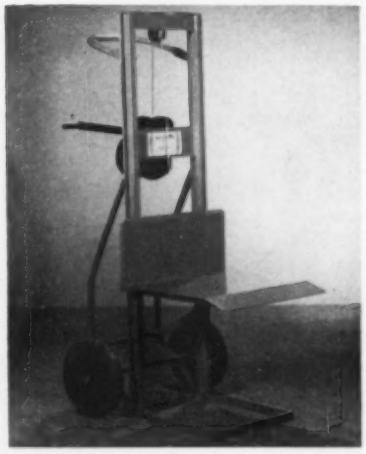


aircraft's position above the ground. The unit is 6 in. square and either 3½ or 2 in. deep, depending on which of two models is desired. Weight is 5 or 4 lb, depending on the model. Maps, printed on transparent mylar, are available in any scale. Operation of the display is from bearing and distance information provided by VOR/DME ground stations and received by VOR/DME equipment in the aircraft.

Circle 61 on Card, Facing Page 144

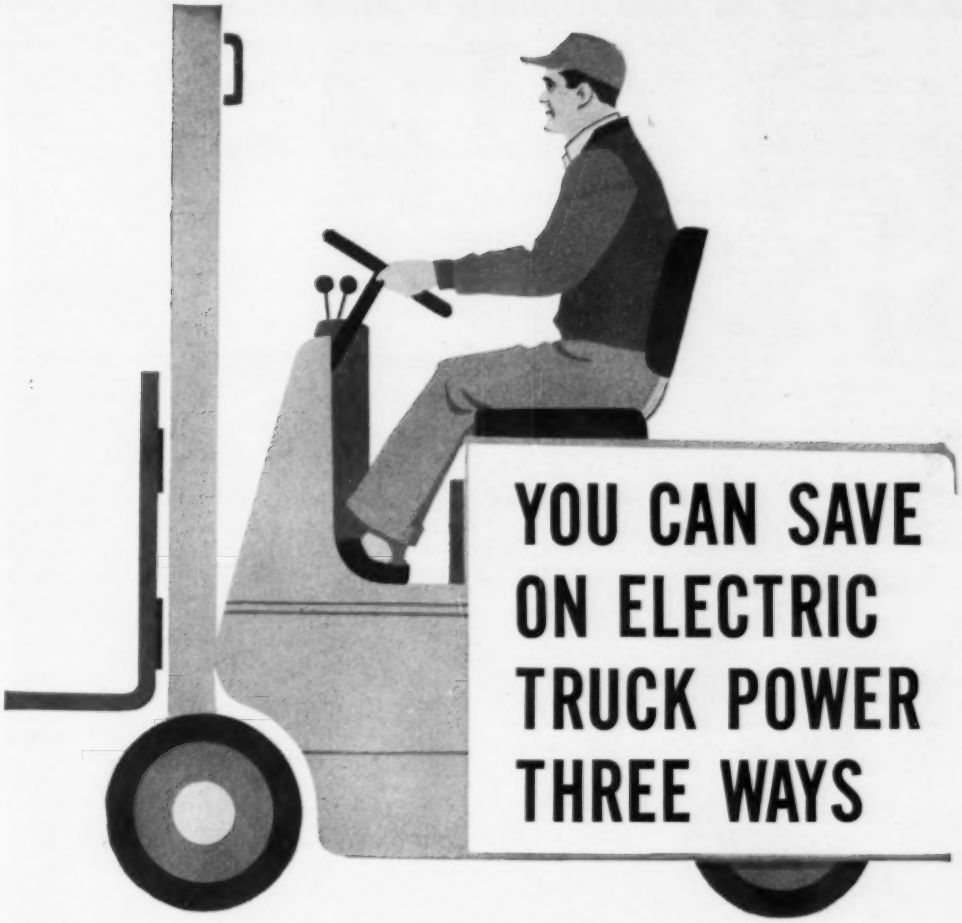
One Man Hand-Truck Lift

One man can manipulate a ¼ ton load with **Port-A-Lift's** hydraulic lift hand truck. The push handle puts no



restriction on where you place your hands to transport the load. The Navigator model has no hydraulic action.

Circle 62 on Card, Facing Page 144



YOU CAN SAVE ON ELECTRIC TRUCK POWER THREE WAYS

1

2

3

Get more battery capacity per dollar per year. For years, Exide-Ironclad Battery users have consistently reported unequaled battery economy. Now the new TGS Exide-Ironclad Battery gives you another 11% more capacity with no increase in battery size. Your trucks can do still more work per shift, and you get greater economy than ever.

Use efficient chargers. Exide vertical chargers are specially designed for industrial truck service. They give you actually more charging capacity for the price. Vertical design saves two-thirds floor space, keeps out dirt for lower-cost upkeep. Oversize bearings, dual-protected by bearing seals and external dust shields, prolong charger life.

Keep your equipment functioning. Regular inspection by capable service men is a real economy measure. And no service matches Exide service—over 160 men in 47 offices coast to coast. All are factory trained—specialize in Exide industrial batteries and chargers. They help you get the maximum life and economy from your batteries.

GET THE COMPLETE EXIDE POWER PACKAGE: BATTERIES, CHARGERS, SERVICE. For additional information, write Exide Industrial Division, The Electric Storage Battery Company, Philadelphia 20, Pa.

Foreign Trade at NY Port

The chairman of the **Port of New York Authority** makes the opening comments in the group's annual report—just off press. They are followed by information of general cargo shipments, exports and imports by commodity, world distribution, coastal competition, and other factors important in any discussion of a port. You may find the trade indicators of special interest. Photographs and color artwork are used throughout.

Circle 63 on Card, Facing Page 144

Loading Ramp

There is a new self-contained loading ramp on the market. **American Dockbridge, Inc.**, is the manufacturer. A brochure graphically describes the benefits of a ramp designed for existing docks and new construction. The extending lip of the ramp will accept trucks with beds up to 16 in. above or 10 in. below dock level.

Circle 64 on Card, Facing Page 144

Handling Pros and Cons

What is palletless handling? Where does it fit? Where are the advantages of palletless handling? The answers to these questions are discussed in an eight-page brochure published by the **Automatic Transportation Co.** It is designed to give industrial lift truck users the pros and cons of both handling methods in order that they might select the most economical system to suit their individual job requirements.

Circle 65 on Card, Facing Page 144

Battery-Powered Lift Truck

Clark Equipment Co. describes its battery-powered fork truck of 7000-lb capacity in new literature. Complete dimensions are provided. Scale drawings illustrate it.

Circle 66 on Card, Facing Page 144

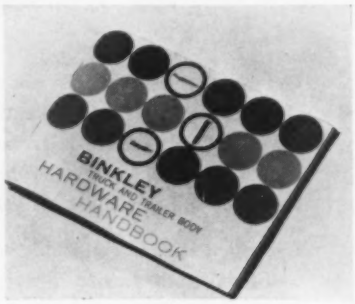
Modular Packaging Plan

Are you interested in a package which offers you shock resistance and is moisture and atmosphere-tight? Zero Manufacturing Co. describes a modular packaging system which it claims offers these benefits. The system, which hinges on standard components for maximum flexibility, is illustrated and described in a new catalog.

Circle 67 on Card, Facing Page 144

Hardware Handbook

A new catalog of truck and trailer body hardware is now available from the **Binkley Co.** The pocket-size book-



let contains 32 pages of commercial vehicle hardware. It lists all dimensions, part numbers, and specifications for each piece of hardware in its line.

Circle 68 on Card, Facing Page 144

Strapping Tool

Tailoring the strapping tool to the packaging job is made easier with a new folder "Signode Combination Strapping Tools," from **Signode Steel Strapping Co.** This combination tool performs four functions: tensions strap, applies seal, makes joint, and cuts strap. Detailed descriptions and a chart of specifications and applications help to select the right tool for the job in mind.

Circle 69 on Card, Facing Page 144

Elevating Tailgates

Its line of elevating tailgates and cranes and winches is described in a new leaflet from **H. S. Watson Co.** Copies are available.

Circle 70 on Card, Facing Page 144

Live-Roller Conveyor

A bulletin, prepared by **The Rapids-Standard Co., Inc.** gives details on APC live-roller conveyors. Principles of operation and their application to live roller conveyors are explained in brief and illustrated by picture and photo-diagram. Other photographs show typical examples of applications to meet requirements of temporary accumulation.

Circle 71 on Card, Facing Page 144

Corrugated Container Tests

The National Safe Transit Committee tests and their application to corrugated shipping containers are covered in a new brochure from **Gaylord Container Corp.** The information concerns benefits to shippers from the tests.

Circle 72 on Card, Facing Page 144

Air Memorandum Tariff

A completely revised air cargo memorandum tariff is available from **Alitalia Airlines.** It will be useful to shippers and consignees. It is set up so that it is easy to see what air cargo rates are from and to the cities in the U. S., Canada, and overseas.

Circle 73 on Card, Facing Page 144

Adjustable Brace Rods

Load-Holder has just released a flyer on its adjustable brace rods. It illustrates different applications of the rods. The rods protect doors and eliminate the need to break-down a load.

Circle 74 on Card, Facing Page 144

(Please Turn to Page 36)

when is a shock a

SHOCK?

a new approach to the control of damage due to shocks incurred in handling or transit

The SHOCKMASTER is a low cost mechanical device for positive indication that predetermined shock levels have been exceeded. It may be easily installed at one or many locations on a vehicle, on or in a container, or on the cargo. A bright red signal indicates that a shock has triggered the instrument.

SHOCKMASTER
MODEL 3700 A

The SHOCKMASTER, available in several models, is: Reliable • Versatile • Tamperproof • Accurate • Conclusive • Reusable. The instrument requires no calibration or adjustment. It is sensitive to longitudinal and/or transverse shocks. Nominal ratings: 5, 10, 15, 20, 25, 40 and 50 G's. One model, with an electrical contact, may be checked without opening the container.

Install the SHOCKMASTER on all units of valuable cargo, or use it for evaluation of: Container design • Packaging techniques • Carrier performance • Shockmounts • Handling methods • Skills of personnel.

LETTERS TO THE EDITOR

War on Carrier Paperwork

To The Editor:

It was most gratifying and informative to read your July article, "Master Plan for War on Carrier Paperwork." Our company has been experimenting with offset duplicating machines and has found it to be a most practical and economic weapon against "The Paperwork Jungle."

However, when certain information is required on the master form, but not on the copies, there is a real problem. Your readers may be interested to know we solved it with the FAX No. 2411 Brown Non-Reproducing pencil.

It is noteworthy to mention that the Transportation Committee on Practices and Procedures of the National Motor Freight Association is currently sponsoring orderly development of the three-part combination bill of lading-freight bill.

As a shipper, we welcome the arrival of such a plan and sincerely hope that it proves successful to encompass all carriers across the country.

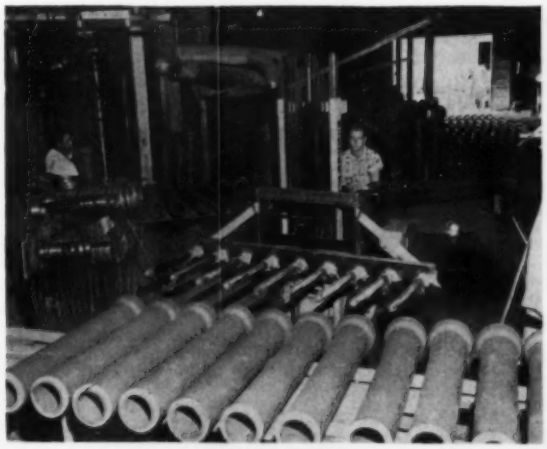
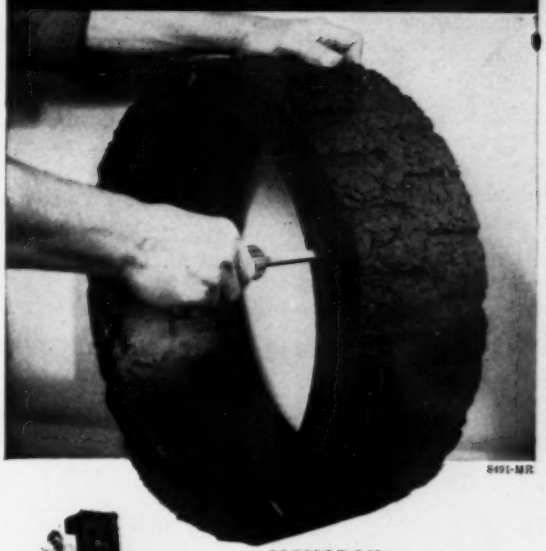
Nine-Tine Fork Lifts Pipe

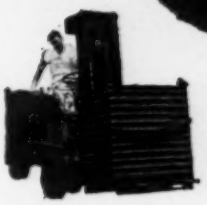


Fork-lift trucks are used to handle clay pipe at the West Coast plant of Gladding, McBean, and Co. Production line truck applications include transportation of unit loads of wet pipe from machines to drying sheds, green pipe from drying sheds to kilns, and fired pipe from kilns to storage. Multi-tine attachments on the Hyster trucks carry the pipe. A side-shift attachment allows quick alignment of tines with pipe ends

New MONARCH *developments*

STOP PREMATURE RIM SEPARATION!





MONARCH SOLIDS FEATURE NEW COMPOUND AND BONDING PROCESS... REDUCE REPLACEMENT COSTS

Embedded metal scrap, chemicals and excessive heat cause premature solid tire failure by destroying the bond between the tire and rim. MONARCH engineers solved this problem by combining an advanced rubber-to-metal chemical bonding process with a new, extra tough, natural rubber stock . . . Compound T-5100. Field tests prove that *MONARCH solids now feature superior resistance to rim separation* caused by the above factors. And cost-conscious buyers are specifying MONARCH solids to cut replacement costs!

FOR ADDITIONAL DETAILS . . .
write direct or see your Monarch tire dealer.

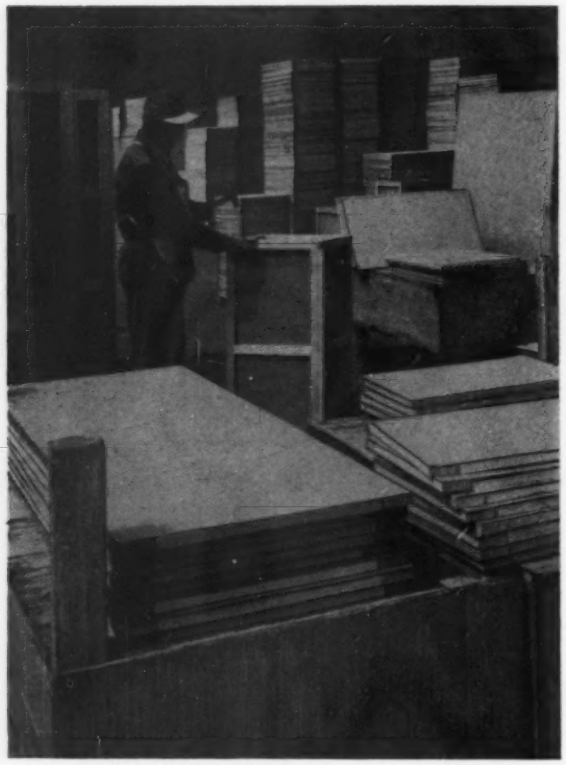
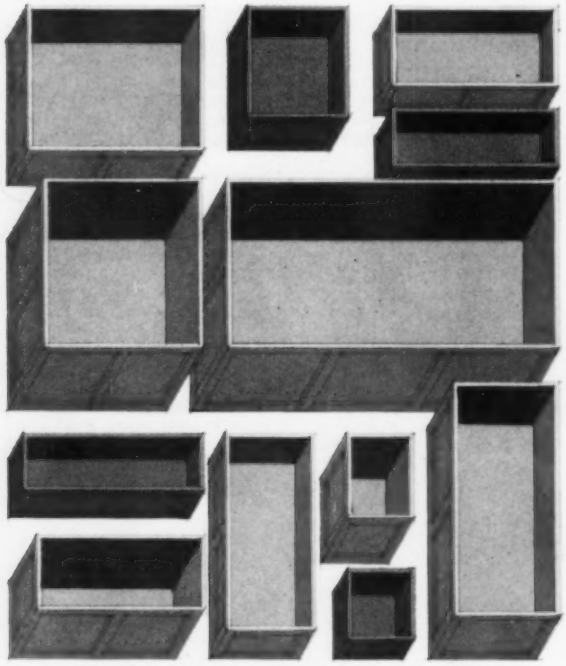
Weyerhaeuser
PLY-VENEER®. . combines with the modular packaging system to save you shipping dollars





from 50 different panel sizes . . . 396 different box sizes!

THE PANEL MATERIAL—Ply-Veneer consists of a veneer core overlaid with tough, kraft linerboard facings. Panels are available in thicknesses of 1/8" to 1/4", widths of 4' and 8', lengths up to 16' and longer. Ply-Veneer gives you these advantages in the modular packaging system:

- Panels are light in weight . . . reduce tare weight and box cube.
- Ply-Veneer is low in cost . . about 1/3 less than most other panel materials.
- Panels are stiff and have a high strength-weight ratio.
- Ply-Veneer is tough and remarkably puncture and impact resistant.
- Ply-Veneer meets government specifications for domestic (Type I) and overseas (Type II) packaging.
- Ply-Veneer has good dimensional stability under moist or humid conditions.

For more information on Ply-Veneer, the modular packaging system, or Klimp fasteners, write us in Tacoma, Wash.

THE MODULAR SYSTEM—Cleated box panels are prefabricated in a variety of predetermined sizes. Panels are interchangeable as sides, tops and bottoms. Custom boxes are quickly assembled from stock panels. For instance, 50 different panels make up into 396 different box sizes.

Advantages of the modular system are these:

- Saves on storage space . . . box panels are stored knocked down
- Panels are reusable when assembled with Klimp fasteners.
- Cuts lead time . . . panels are already cut-to-size and cleated.
- Reduces capital investment and expense of maintaining a costly container inventory.
- Allows for the arrangement of box contents to the best cube advantage.

NIT League Backs Barge Line Purchase in ICC Proceeding

The National Industrial Traffic League has filed a brief with the ICC in support of railroad purchase of a barge line.

The brief deals with the purchase of John I. Hay Co. by the Illinois Central Railroad and the Southern Pacific. The League points out that, as a nation-wide organization of shippers, it has a vital interest in the principle involved.

It asks the Commission to find the purchase consistent with the public interest.

The Transportation Club of Buffalo will hold its annual dinner at the Statler Hilton Hotel, Buffalo, on Oct. 27. Joseph J. Bellemo of Interstate Systems has been named general chairman.

Delta Nu Alpha Transportation Fraternity, Inc., Eastern Region No. 2, held its first regional convention at the Brunswick Hotel, Lancaster, Pa.

Carey Appointed C of C Chief For Transportation Committee

Walter F. Carey is the newly-appointed chairman of the Chamber of Commerce's 50-member Transportation and Communication Committee. He is also president of Automobile Carriers, Inc.

Carey has been named to head the Chamber's committee which studies and considers major issues and legislation before Congress which affects the transportation and communication industries. The committee helps shape Chamber policies on aviation, highways, motor transport, pipelines, merchant shipping, railroads, etc.

Grocery Warehouse Course Announced by MH Dealers

The Materials Handling Equipment Distributors Association will hold a Chain Store Grocery Warehousing Course on Materials Handling from Oct. 10-14.

Sessions will be held in Newport, R. I., at the National Training Center. Lecturers will include Irving M. Footlik, consultant; David Gardinier, NAWGA, J. C. Bouma, U. S. Department of Agriculture; D. J. Bowersox, Michigan State University; V. J. Winter, Red Owl Stores; George Carr, The Kroger Co.; and George A. Ramlose, consultant.

AMI Elects Trustees at Annual Meeting

AMI President Alfred E. Crowe presents his annual report during the first Annual Meeting of the American Movers Institute. Other leaders of the organization shown are (left to right) Thomas E. Robertson, executive director; Jack C. Aspinwall, keynote speaker; John C. Bittenbender, who led the invocation; and E. Harold Tolbert, chairman of the meeting

Gathered in the Board Room of the American Movers Institute, Inc., Washington, D. C., were some of the new officers. The group met in Washington, D. C., for its first Annual Meeting. Seated (left to right) are John Sloan Smith, president, Aero Mayflower Transit Co., Indianapolis; W. N. McKinney, American Transfer and Storage Co., Dallas; Alfred E. Crowe, Vet Van of Virginia, Arlington; V. D. Morgan, V. D. Morgan Van Service and Storage Co., Louisville; E. Harold Tolbert, Capitol Van Lines, Washington, D. C. Shown standing (left to right) are Lee J. Sloan, Sloan's Moving and Storage Co., St. Louis, Mo.; Bruce Bolinger, Boweil Storage and Transit Co., Cincinnati; Albert A. Friedel, Lincoln Moving and Storage, Cleveland; and John Bittenbender, American Storage Co., Washington, D. C.; Harry Berman, Amick Transfer and Storage Co., Denver; James D. Edgett, president, North American Van Lines, Inc., Fort Wayne, Ind.; W. E. Hibbitt, Lawrence Moving and Storage Co., Sacramento; H. C. Owings, Trans-Vans, Inc., Norfolk, Va.; Walter C. Sullivan, J. J. Sullivan The Mover, Springfield, Mass.; L. P. Donnelly, Continental Van Lines, Broadview, Ill.; C. W. Kearsley, Suffolk Storage Warehouse Co., Boston

NEW AIM BRAND RACK

...with exclusive safety load

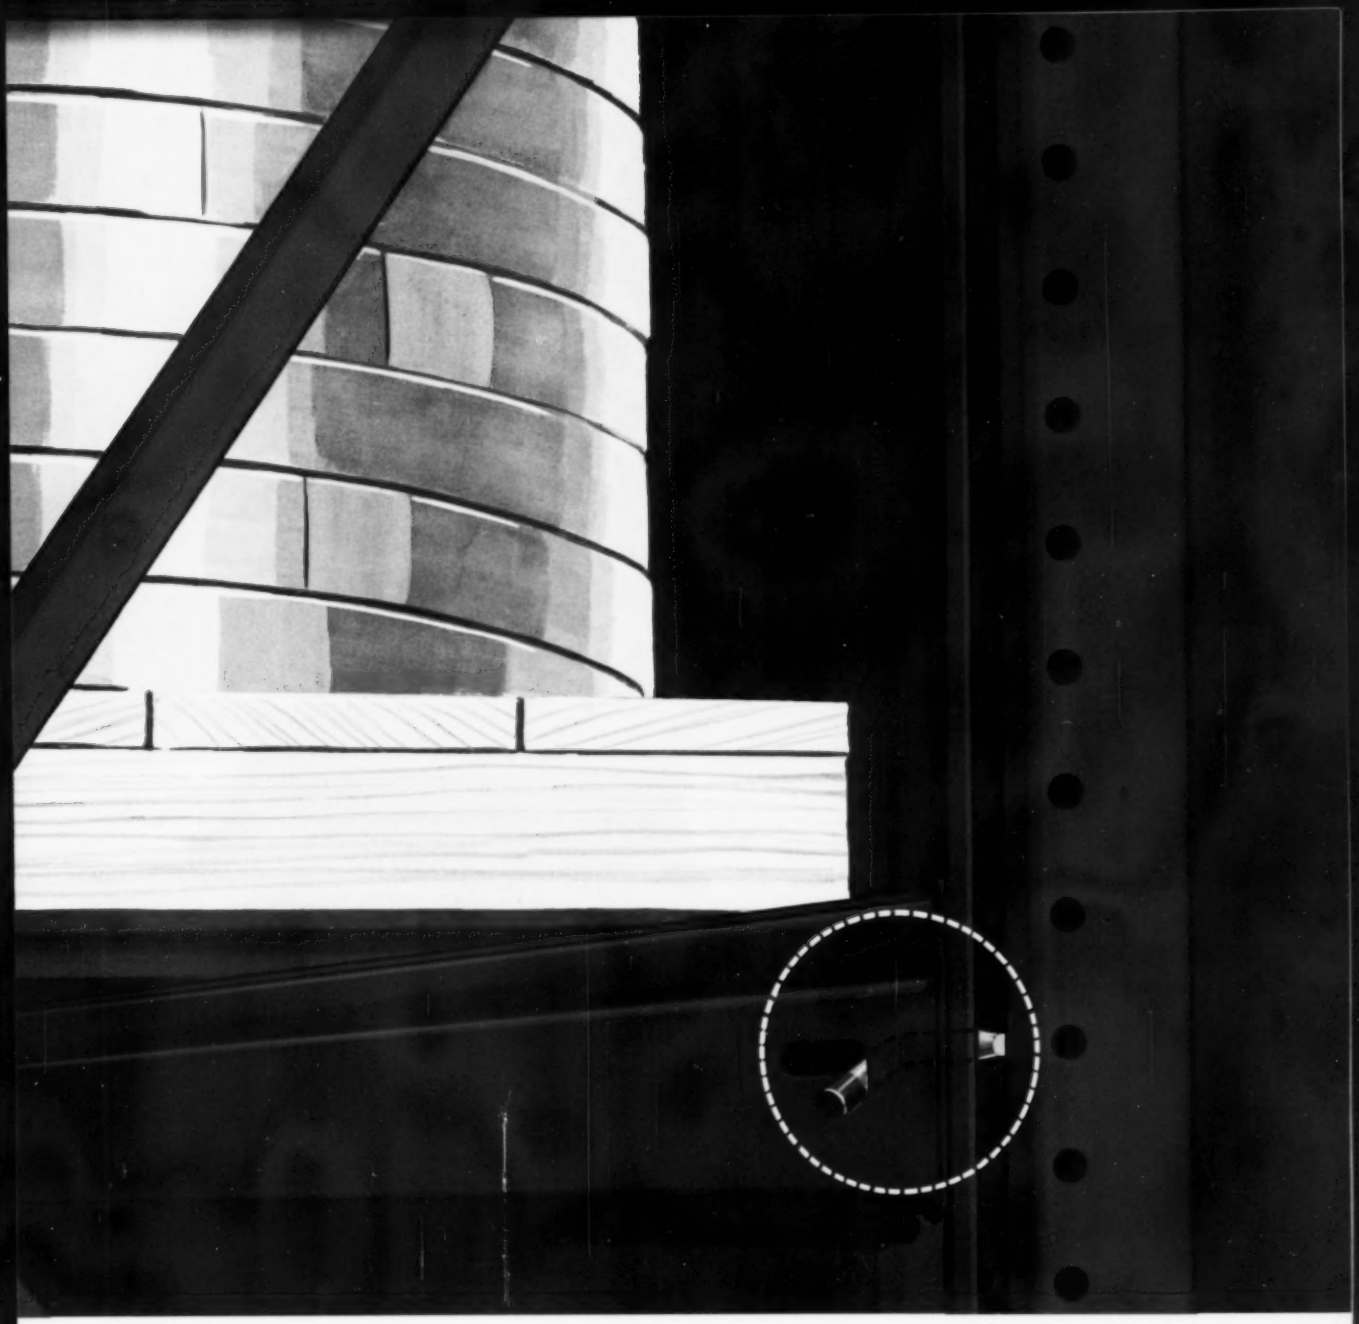
Quality steel, cold formed and finished in green metallic based paint. Other colors available upon request.

The makers of AIM Brand Slotted Angle extend their line to solve every problem of materials storage. Now, after four years of testing, improving, perfecting—Acme Steel Company announces a major improvement in heavy-duty rack design.

The only rack with a safety load locking device.*

Provides *positive* protection against accidental disengagement of the beams. The safety load lock is an integral part of the beam, not a loose part that must be inserted. Locks and unlocks with one hand in a second —yet its ingenious design keeps the beam anchored even under toughest jolts.

There's much more to the revolutionary AIM Brand



locking device* refuses to be pulled, bulled or jarred apart!

Rack story—including special engineering service and industry's broadest materials storage experience. AIM Brand is distributed nationally. For the name of your nearest distributor and detailed literature, call or write your nearest ACME STEEL office or ACME STEEL COMPANY, Fabricated Materials Division, Dept. DBD-100, 135th Street & Perry Avenue, Chicago 27, Ill.

MEETS A. I. S. I. STANDARDS

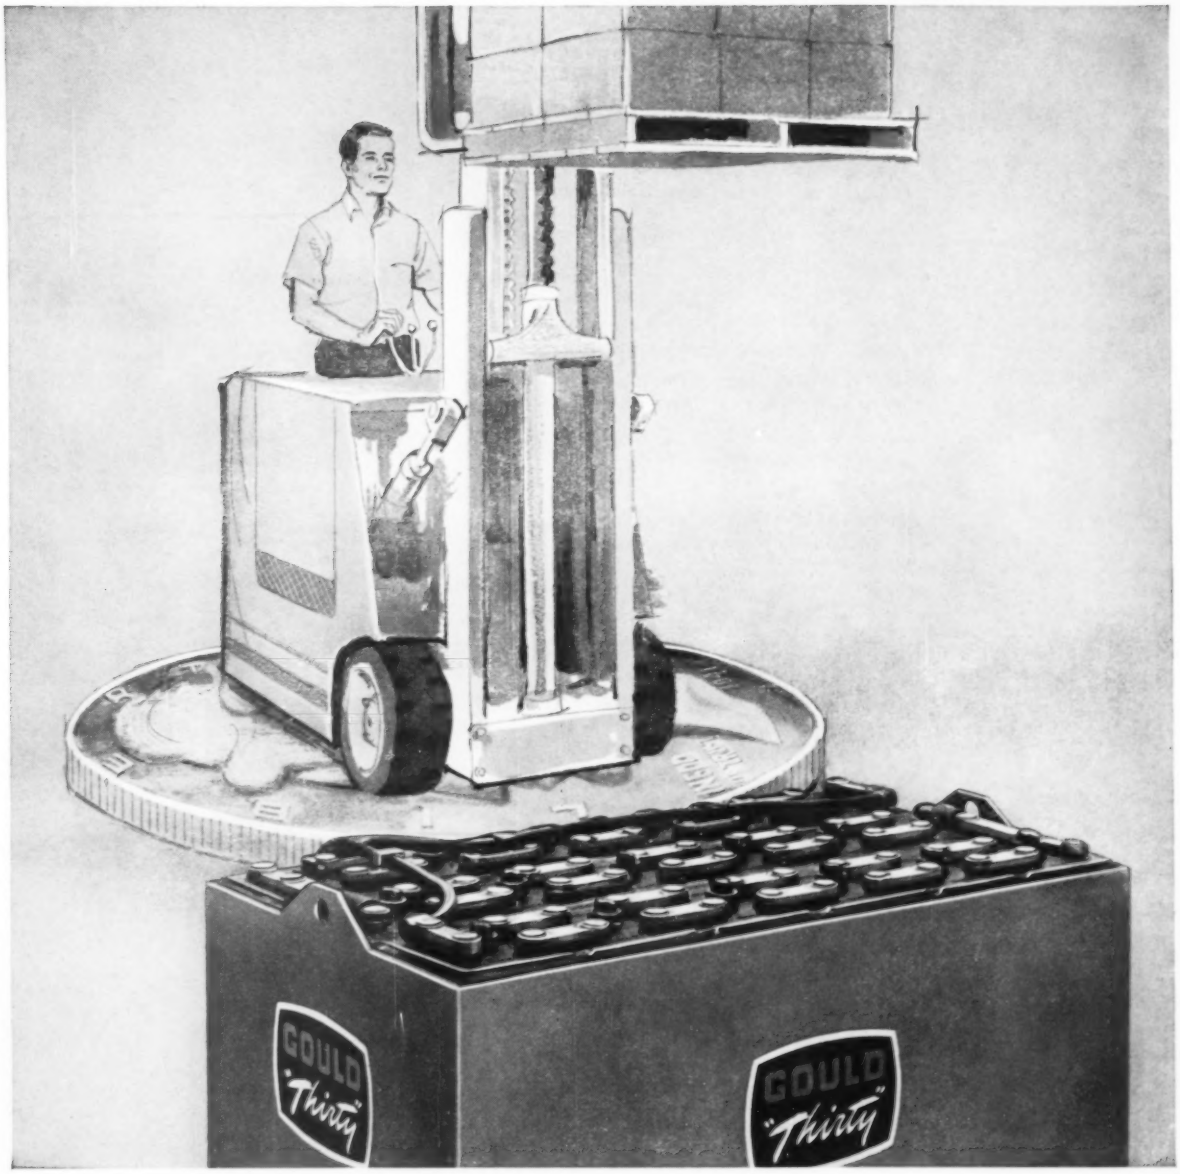
ACME STEEL IDEA LEADER IN FRAMING AIM® BRAND

NO LOOSE PARTS! No special tools, no loose parts—frames are prefabricated. Eccentric button head studs for fastest set-up and disassembly. Pre-punched foot plates face forward for ready accessibility and simplify lagging to floor. There's even a "built-in rule" the entire height of the frame to easily guide beams for level placement. Beams can be adjusted on 2 inch centers over the entire frame height.

SETS A NEW HIGH IN STRENGTH! Each AIM Brand beam connection has three load bearing points—two button head studs plus the *exclusive* load lock. AIM Brand columns are a full 3 inches square, instead of the conventional 3" x 1½" size. These features greatly increase *safe* load capacity.

SECOND TO NONE IN STABILITY! Toughest fork lift truck jolts can't jar beams off columns. The safety load lock and button head studs team up with advanced welding techniques to provide a rack that withstands repeated abuse. Each beam even has a ledge on which to place accessories or wood shelving.

*Patent applied for



Electric Trucks are MORE MANEUVERABLE

Short-wheelbase electric trucks require less turning radius. They are capable of handling loads in much narrower aisles and congested areas. These battery-powered electric trucks make possible an increase in space utilization by reduction in aisle width.

Add maneuverability to a convincing list of other benefits—lower operating costs, less maintenance, clean, quiet and safe operation—and you can see the reason why users prefer battery-powered electric trucks for modern, efficient materials handling.

Electric truck users generally agree on one other point, too—Gould Batteries for longer life. With the new Silconic Plate, Gould Batteries offer up to 25% longer life.

Join the list of users who prefer this ideal combination of electric trucks and Gould Batteries. For more information, write or call your local Gould representative. Ask for booklet "Why We Use Battery-Electric Industrial Trucks." Gould-National Batteries, Inc., Trenton 7, N. J. In Canada, write to Gould-National Batteries of Canada, Ltd., 1819 Yonge Street, Toronto, Ontario.

Birdy-Back Guide

Containerization of freight has been praised as the shipping method of the future. Here is some information on its present development in air-freight shipping with company-by-company details. **47**

Birdy-Back Service Chart

For a quick source of information on container shipping DA has compiled this chart. It lists eight carriers now providing this service. **48**

Directory of Airports

This airport directory gives you an alphabetical listing of the nation's airports, their flights in and out, shipper facilities, all-cargo flights, and the airlines which participate in airport's activity. **56**

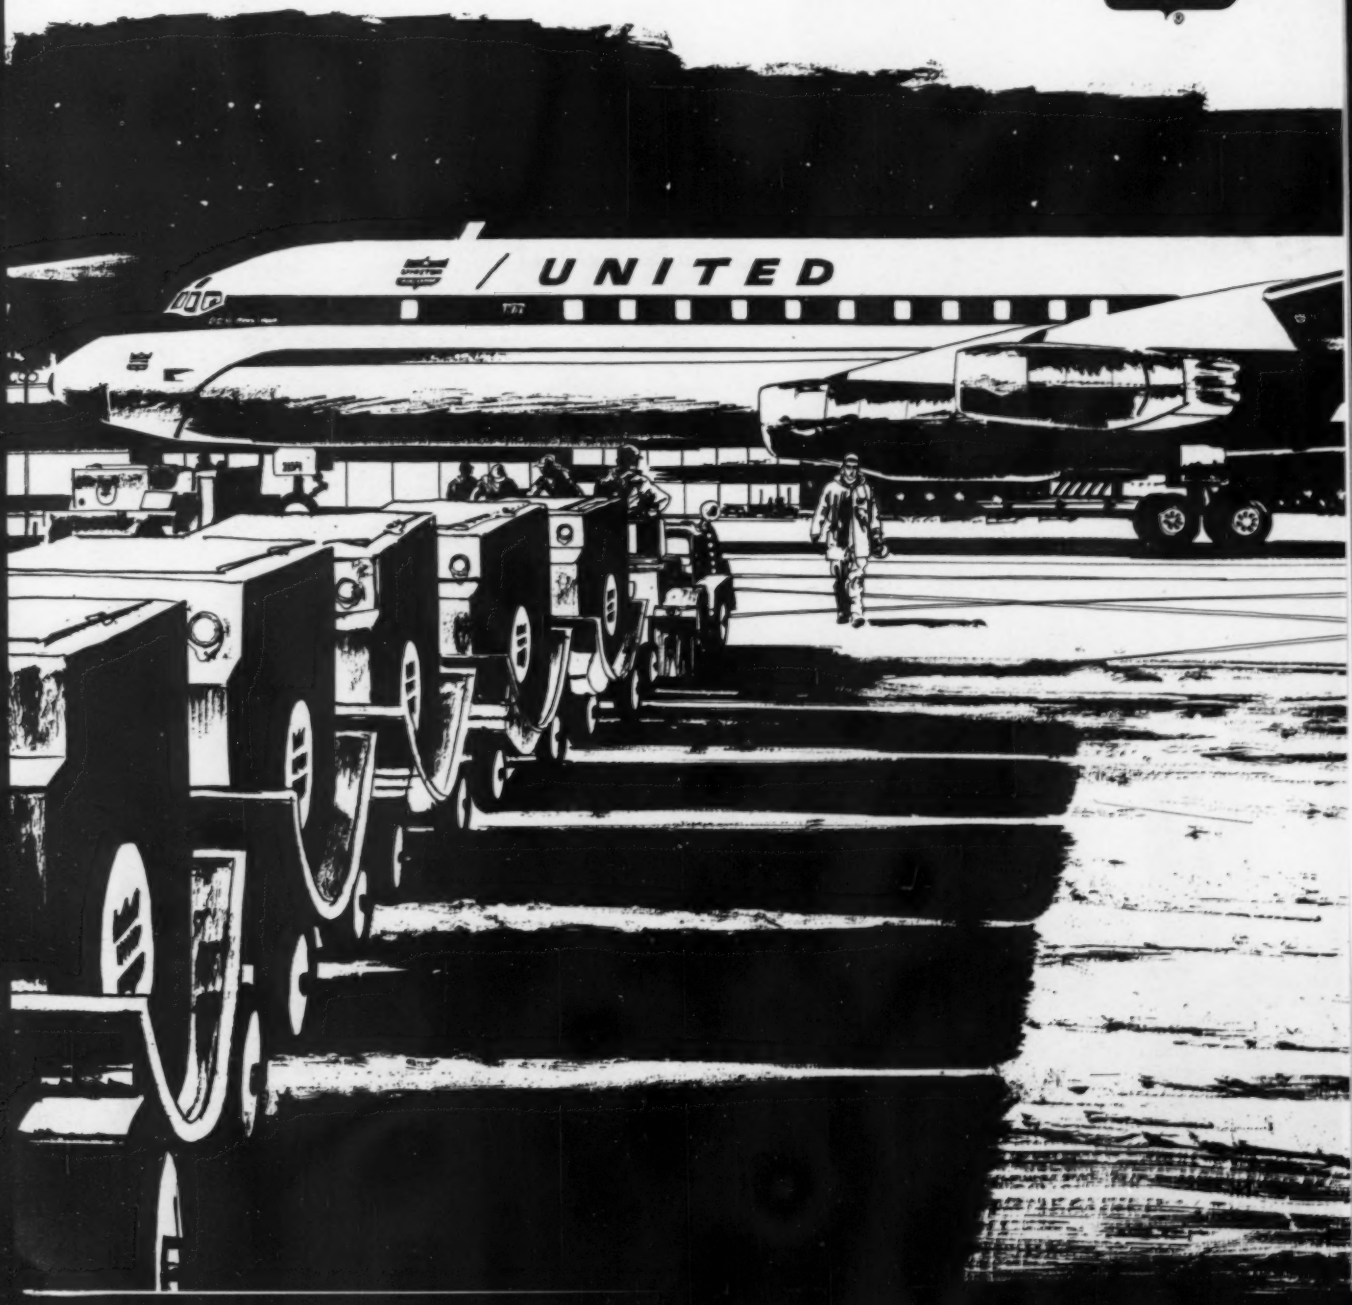
A limited supply of reprints of this section is available. Additional copies are available by writing to The Editor, DISTRIBUTION AGE, 56th & Chestnut Sts., Philadelphia 39, Pa., on a company letterhead.

DOOR-TO-DOOR DELIVERY IN A FEW HOURS DAY OR NIGHT VIA UNITED AIR FREIGHT

Even coast to coast, fast United Jets can give you same day or overnight delivery. And since United Air Lines carries freight on all flights—passenger as well as fast Cargoliners—you have a wide choice of schedules with direct service to 72 U. S. cities. You can reserve space for your shipment to be sure of delivery when needed—airport to airport or door to door. Every shipment receives *extra care* handling. United also can serve you overseas and anywhere in the U. S. A. on a single airbill through extensive interline agreements. Call any United Air Lines office for fast, reliable shipping service . . . for Reserved Air Freight at no extra charge.

900 SCHEDULES A DAY EAST AND WEST

UNITED AIR LINES



Birdy-Back Guide

This guide to birdy-back operations by the major airlines gives a clear picture of the eight airlines now handling containerized shipments and what special equipment they use, make available to shippers

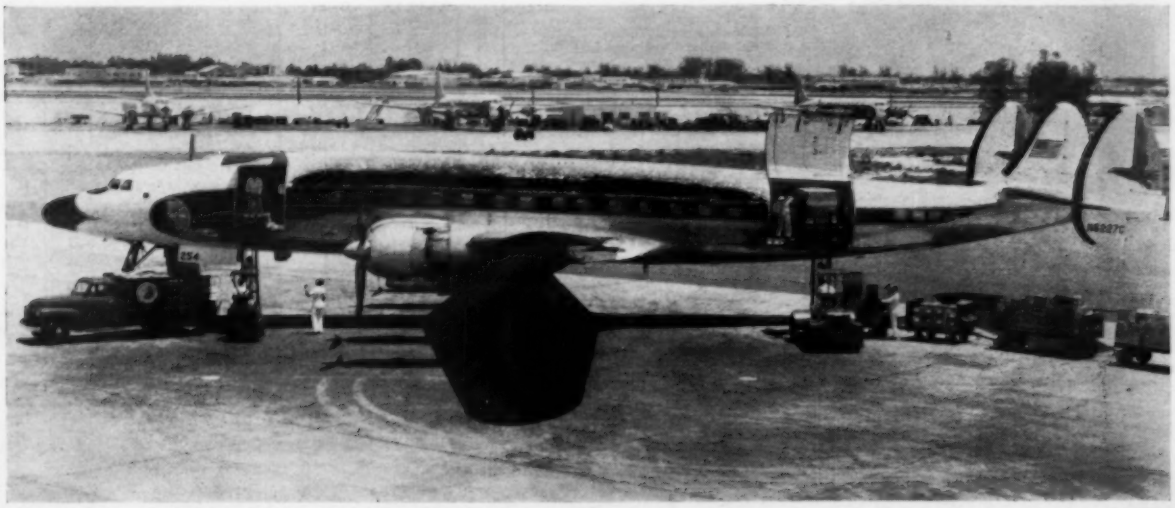
COUNTED AMONG the "firsts" in this issue is the Birdy-Back Guide, a survey of container service offered by the airlines. Eight out of the 19 air carriers surveyed reported that they are actively engaged in container service.

Five of the eight airlines interline with ground carriers. Such interlining between ground and air makes for a well-coordinated worldwide system. Door-to-door shipments with single documentation procedure to and from interior cities on all six continents are possible. In some instances, with programs like this, the airline will bear the responsibility for delivery to points inside the U. S.

A strong advantage is that cargo agents, shippers, and freight forwarders deal with one company, prepare one set of documents, and get invoices from one source. Returns from the DA questionnaire to airlines show that fork-lift trucks are used by the majority of airlines to handle containers. The type of container which is used ranges from plywood to aluminum. Maximum heights of containers accepted by the various airlines differ.

Each of the eight airlines is an originating carrier and all of the eight except one interline with other airlines. Door-to-door service, including pick-up and delivery, is available from all but one of the eight airlines.

As with other forms of containerization, handling efficiency is increased and benefits from a standardization of container specifications. While container sizes may differ, many airlines agree that due to military requirements, many of the containers used for shipping household goods overseas have progressed toward what may become an industry standard. ●



American Airlines

Provide transportation for van-type containers as an originating carrier. Provide containers: wheeled aluminum box 8 ft x 4 ft x 6 ft high. Completely enclosed with hinged door, side opening. Company provides a complete door-to-door container service including pickup and delivery. Maximum dimensions of containers accepted: sliding scale based on combination of length/width. Read from a cargo size chart. Height normally placed at 78 in. They are loaded by fork lift. Loaded at all cities served by all-cargo flights and can be shipped to all cities, destinations, served by all-cargo flights. Offer connecting service via interline agreements with other airlines only as a special arrangement.

Continental Airlines

Transports containers as an originating carrier. Does not provide containers for the service, but operates complete door-to-door container service including pickup and delivery. Perform container service for private shippers who own both the container and contents. Accept maximum dimensions of 32 in. x 48 in. x 91 in. Maximum weight is 500 lb. Handled by conveyor and manpower. Loaded at airports in Los Angeles, Denver, Kansas City, and Chicago. Can be shipped to destinations in those airport cities. Offer connecting service via interline agreements with all certified air carriers with adequate equipment. Provide door-to-door container service on one bill-of-lading involving approximately 100 truck lines. The customer owns containers in this service.

From the Cargo Files of the most experienced jetline in the West!

AVON COSMETICS + CONTINENTAL JET CARGO = SWEET SUCCESS STORY!

THE PRODUCT: A new Avon perfume...Topaze...worth $20 an ounce.

THE PROBLEM: Avon Representatives in the Kansas City area enjoyed overwhelming sales success with Topaze. Therefore, additional supplies were needed immediately to fill their orders. The closest source: Avon's Pasadena Laboratory.

THE SOLUTION: Avon's Kansas City Traffic Manager contacted Continental's Cargo Manager in Los Angeles. Just 8 hours 45 minutes later, a Continental Golden Jet 707 delivered the new supplies—in time to meet all requirements for the unprecedented sales of Topaze. A quick call to Continental—a sweet success story!

Like so many of today's smartest shippers, Avon has learned to rely on Golden Jet cargo service—not just for emergencies but for routine daily deliveries. It keeps inventories low and guarantees delivery dates.

Continental now offers round-the-clock jet cargo flights between Chicago-Los Angeles. Plus jet cargo service to Denver and Kansas City. In addition, Continental's Jet Power Viscount II's and DC-7B's serve 23 major cities in the West and Southwest.

For additional information, contact your local freight forwarder or write: Mr. Lee Slay, Director, Cargo Sales, Continental Airlines, Stapleton Field, Denver 7, Colo.

New! Low deferred freight rates now available between Chicago, Kansas City, Denver, Los Angeles!

TWA THE SuperJet AIRLINE offers you two great cargo services!

Ship coast-to-coast and overseas on TWA Super Sky Merchant Fleet

Excellent service between New York, Chicago and California on TWA's all-cargo Super Sky Merchant flights. Early morning deliveries in Chicago and California. In New York ...direct connections with Super Sky Merchants to major trade centers of Europe. Also, daily service to Philadelphia, Pittsburgh, St. Louis, Indianapolis, Kansas City and San Francisco. For dependable, on-time service, specify TWA Super Sky Merchant Fleet!

TWA Jet Freight... across the U. S. and Overseas!

Speed your shipments at home or abroad with TWA Jets and giant TWA SuperJets! Immense cargo capacity...10,000 lbs. each! And only TWA offers Jet Freight service to European trading centers from major U. S. markets...San Francisco, Los Angeles, St. Louis, Chicago, and New York. TWA's Jet Fleet and Super Sky Merchant Fleet serve 70 U. S. cities, 23 world centers. And almost anything goes by TWA...often at less cost than by surface.

Pan Am Schedules More ALL-CARGO Flights DIRECT to

Pan Am fills the Atlantic skies with more and more all-cargo Clippers*! Giant new DC-7F Merchantmen Clippers, world's fastest all-cargo planes! Carrying your product direct to Europe and the Middle East *without transfer to another plane before leaving the U.S.* And this is in addition to present expanded cargo service aboard Pan Am Jet Clippers!

Merchantmen Clippers fly over 15 tons of well-pampered cargo. With holds 60 feet long and jumbo-size doors, they can take aboard bigger, bulkier loads than were ever possible before!

It's another example of Pan Am's ever-growing, ever-improving service. More space! More speed! Greater convenience for you! It shows why more and more American companies today depend on Pan Am as their best means of *regular* overseas product distribution.

NEW LOW RATES, TOO!

And with all other Pan Am advantages, transatlantic cargo rates are lowered by a whopping 45% on loads of 22,000 pounds or more. More and more, it costs less to ship by Pan Am than the total for surface transportation.

You deserve the advantages Pan Am can give. Call your cargo agent, freight forwarder or Pan Am office. Get your product *aboard today, abroad tomorrow!*

Birdy-Back Guide . . .

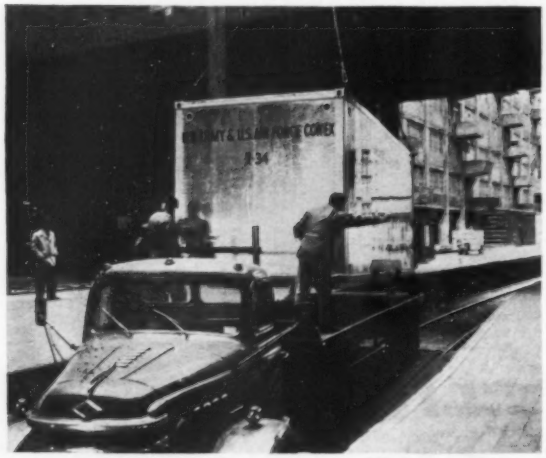
National Airlines

Provide transportation for van-type containers as an originating carrier and as an intermediate carrier. Provide containers for this service as part of a complete door-to-door container service including pickup and delivery. Container service also performed for private shippers who own both container and its contents. Maximum measurements: sliding scale with heights up to 74 in. and widths up to 86 in. Loaded by fork lift; ramp loading at Miami, Fla. Loaded at Miami and Idlewild for destinations in Europe and South America. Participating carriers can be arranged.

Flying Tiger Line, Inc.

Provide transportation for van-type containers that are interchangeable with other forms of transportation as an originating carrier. Containers are provided: Tige Air-Van containers. Plywood, cardboard, steel strap, and skidded. Company provides a complete door-to-door container service including pickup and delivery. Also performed for private shippers who own both container and contents. Accept containers with dimensions of maximum 74 in. high x 60 in. wide x 108 in. long and containers 72 in. high x 66 in. wide x 110 in. long. Loaded by fork lift. Also electric "Johnson Bar." Shipments loaded at: Birmingham, Ala.; Boston, Mass.; Chicago, Ill.; Canton, Ohio; Cleveland, Ohio; Detroit, Mich.; Hartford, Conn.; Los Angeles, Calif.; Milwaukee, Wis.; Newark, N. J.; Oakland, Calif.; Philadelphia; Portland, Ore.; Rochester, N. Y.; San Diego, Calif.; San Francisco; Seattle, Wash.; and Toledo, Ohio. Containers can be shipped to all those points. Offer connecting service via interline agreements with all cargo lines plus the combination freight and passenger lines, domestic and international. Provide door-to-door container service on one bill-of-lading involving approximately 40 truck lines. Shipper owns containers in this service.

Cargo Container Begins Test

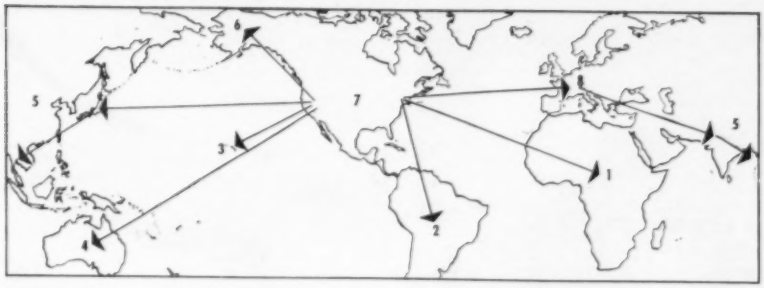


The 20-ft aluminum cargo container being transferred to a truck-trailer chassis from a flatcar is entering the first stage of tests. For a year, the U. S. Army Transportation Terminal Command is putting the Highway Trailer Co. container through its paces over military shipping facilities in a world-wide test. The container is one of eight leased to the Army for tests

Northwest Orient Airlines

Provide transportation for van-type containers that are interchangeable with other forms of transportation as both an originating and intermediate carrier. Containers not provided by airline. Small containers are handled. Container service is performed for private shippers who own container and its contents. Maximum dimensions of containers accepted: 78 in. x 72 in. x 130 in. Loaded by fork lift at Anchorage, Alaska; Chicago, Ill.; Detroit, Mich.; Milwaukee, Wis.; Madison, Wis.; Minneapolis-St. Paul, Minn.; Portland, Ore.; Seattle-Tacoma, Wash.; and Tokyo. Offer connecting service via interline argeements with other airlines.

Pan American World Airways, Inc.



LEXICON OF CONTINENTS SERVED

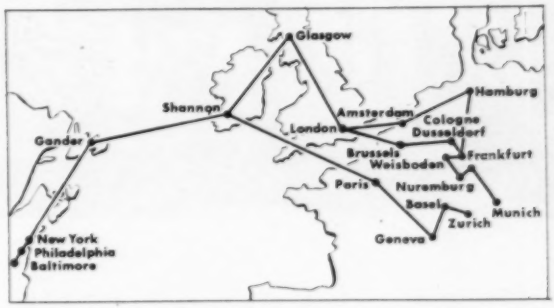
1. Africa
2. South America
3. Hawaiian Islands
4. Australia
5. Asia
6. Alaska
7. United States
8. Europe

Provide transportation for van-type containers. Operation of interchange is limited. Service provided as originating carrier with 5 x 5 x 7 ft plywood, knockdown containers provided. Company provides complete door-to-door container service with pickup and delivery by interline carriers. Containers are loaded by fork lift at major airports of the world—shipped to same destination airports. Offer connecting service interline agreements with between 100 and 150 world carriers, only those operating freighters capable of carrying containers. Door-to-door container service is accomplished on occasion by special arrangement. A single bill-of-lading may or may not be employed.

United Air Lines, Inc.

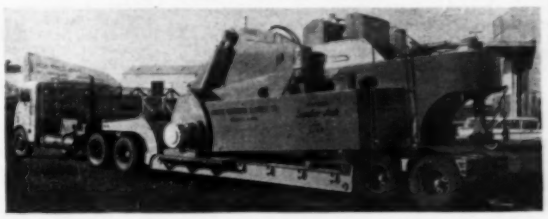
Provide transportation for van-type containers as both an originating and intermediate carrier. Grumman containers are provided in complete door-to-door service which includes pickup and delivery. Service also performed for private shippers who own both container and its contents. Containers are loaded by fork lift and elevating platform. Airports where shipments are loaded or shipped to are contingent upon revenue volumes; any stop point—some require advance arrangements—normal at all-cargo aircraft stops only. Offer connecting service via interline agreements with all airlines capable of handling the involved container and commodity. Provide a door-to-door container service on one bill-of-lading involving REA, various truck and van lines, also ship lines.

Seaboard & Western Airlines, Inc.

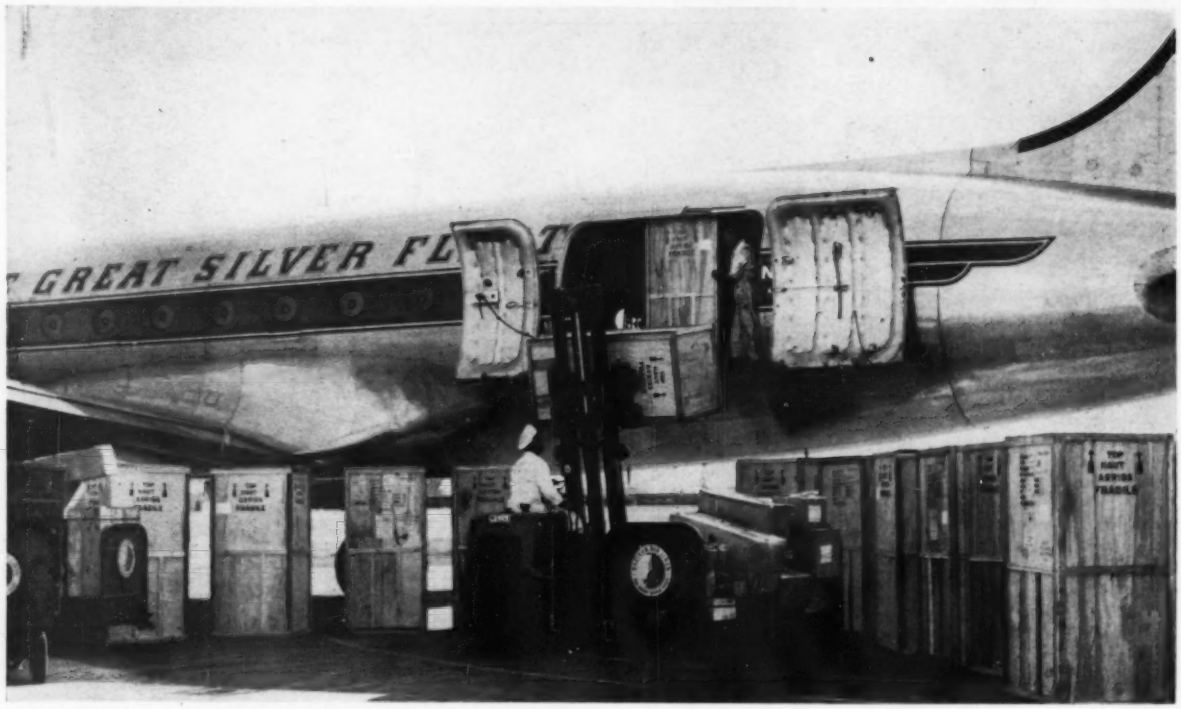


Provide transportation for van-type containers that are interchangeable with other forms of transportation. Operate as both an originating and intermediate carrier. Company provides a complete door-to-door container service including pickup and delivery and performs service for private shippers who own both container and its contents. Maximum dimensions of containers accepted are 7 ft x 7 ft x 5 ft loaded by fork lift and conveyor at New York for Paris, London, Frankfurt or anywhere served by all-cargo planes. Offer connecting service via interline agreements with IATA carriers. Provide door-to-door container service on one bill-of-lading involving North American Van Lines, United Van Lines, and Allied Van Lines participating. In this service, shipper purchases containers.

Lowbed Trailer for Heavies



This lowbed trailer simplifies loading and transporting of heavy equipment for Willamette Hauling of Portland, Ore. Secret of smooth operation lies in the gooseneck. The trailer bed detaches from the gooseneck and can be lowered to the ground with hydraulic jacks. Heavy machinery can be driven or winched up an inclined ramp onto the trailer which is then jacked and coupled with gooseneck



Directory of Airports

Akron Canton Airport, No. of flights in 109, out 109. **Facilities:** Air Express Bldg., Airline Cargo Bldg., United Airlines Freight Office. **All-cargo flights** offered to and from Chicago, Cincinnati, Columbus, Dayton, Detroit, Kansas City, NYC, St. Louis, Washington. **Airlines:** American, Capital, Eastern, Flying Tiger, United.

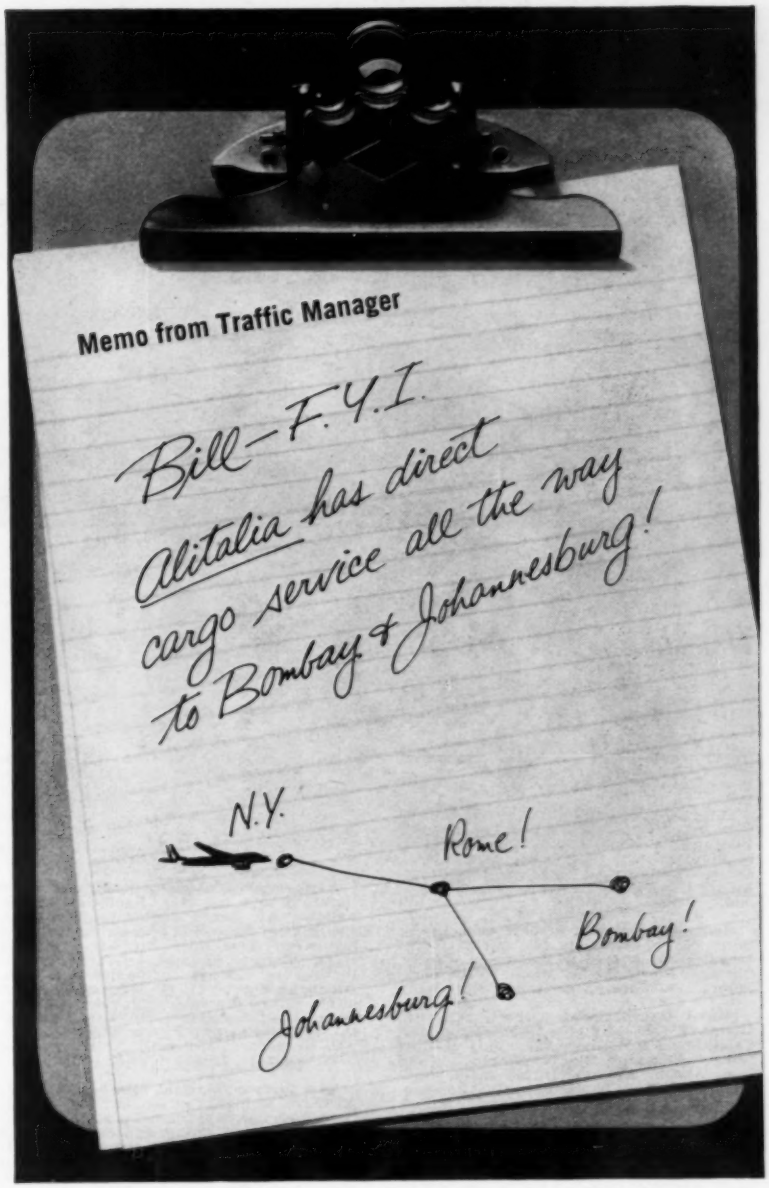
Retail Price Sticks

When the U. S. government required auto manufacturers to apply a "suggested retail price label" on a car's side window, Chrysler Corp. went to its traffic and purchasing departments for a solution. With the help of Glue Fast Equipment Co. engineers, Chrysler now uses this special speed gluer. A label is run through the device, then attached to a window. The machine can be adjusted to put glue on any part of a label



As far as cargo goes, Alitalia goes all the way! Jet cargo service from New York, Boston and Montreal, nonstop to London, Milan, Rome . . . and one stop to Tel Aviv, Beirut, Damascus, Baghdad and Teheran. Alitalia's cargo network extends to major cities in Europe, Africa, the Middle and Far East, offering reserved space for shipments on all flights . . . insuring prompt delivery to all destinations. Take advantage of Alitalia's greatly reduced rates **now in effect!**

Rubber Ball Dunnage

As the mighty oak comes from an acorn, so the "Red Ball Express" comes from the variety store. American Glass Co. devised this new way of handling windshield deliveries in the Sacramento, Calif., area. A specially-constructed unit rests on a standard pick-up truck. Windshields, 15 of them, are held in V-shaped slots. Toy rubber balls and white rubber boat gunnels brace each windshield. There's a sponge rubber pad on the bottom

"When an oil rig needs parts

'yesterday' isn't soon enough

. . . so we use Delta Air Freight"

A day lost can cost its customers up to $10,000 so Hughes Tool Co. of Houston, Texas, relies on Delta to rush vital equipment to the field.

"Customers phone us from the 4 corners of the globe," says N. E. Cloud, Traffic Manager. "When an oil rig is idle, the loss in production can mount to thousands of dollars a day. We meet these emergencies easily by shipping field equipment by air freight. Delta plays a major role in helping us keep customers satisfied."

Profit from Delta's BIG PLUS

Delta operates all-cargo flights and in addition carries freight on every passenger flight, including Jets. Delta cuts a dozen hidden costs of surface shipping for most every product under the sun . . . gives you next-day delivery to boot!

Delta all-cargo flights serve

Meat Rack Hooks Fenders

When the inventory of car parts at Falcon Buick Co., Inc., N. Y., grew to 30 times its normal size recently, meat racks helped save the day. The auto dealer found that pre-painted steel angle members formed a mezzanine floor section and an almost perfect answer. Odd-shaped parts like fenders now hang on hooks as if sides of beef. Republic Steel makes the metal "lumber" used

Handsome is and handsome does

...colorful Butler Buildings are functional too!

It's no accident that Butler buildings are finished with the most striking *and* protective color offered in the industry—Butler-Tone™. Butler alone uses America's number one system of pre-coating metal panels. Butler alone coats both sides. Butler-Tone adds extra years of new-looking color and time-defying protection.

Add Butler-Tone colors to the industry's two outstanding wall systems, the widest range of sizes and types of rigid frame clear-span structurals, optional roof guarantee at nominal cost, the skills and experience of the finest nationwide Builder organization in the industry—and you have America's number one pre-engineered building value.

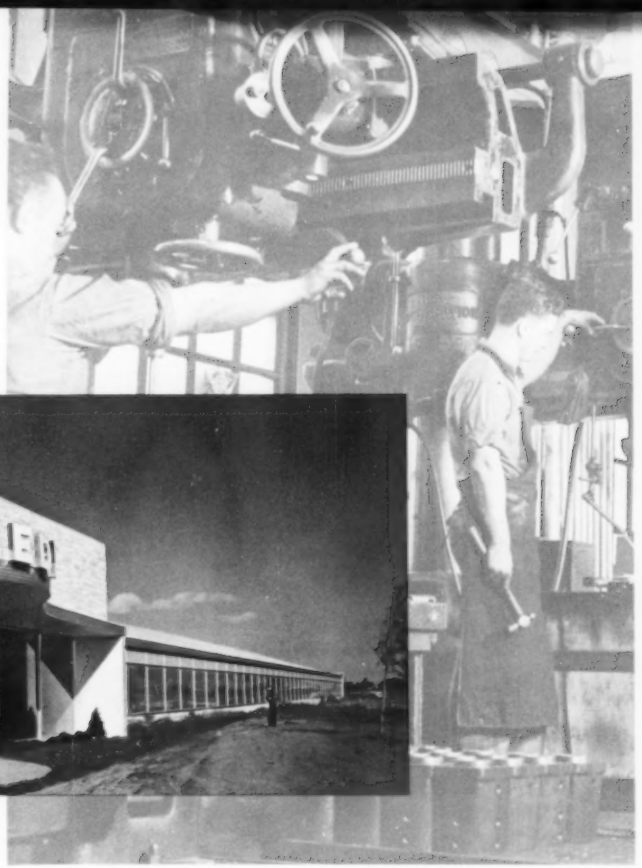
...industry finds advantages in

BUTLER BUILDINGS



Flick-Reedy Manufacturing Corporation, Bensenville, Illinois, winner of Factory Magazine's 1960 "Plant of the Year" award. ARCHITECT: *Zay Smith & Associates, La Grange, Ill.,* DESIGNER: *Norman Steenhof.*

Manufacturing . . . warehousing . . . distribution, industry finds that the Butler Building System suits all three functions.

. . . like floor space. Clear-spans bridge areas up to 120 feet.

. . . like overhead space. Rigid frame design provides space for lights, craneways, other fixtures. Raw and finished inventories stack to maximum pallet heights.

. . . like expandability. Adding to a Butler is easy, fast, economical . . . with practically full salvage of original materials.

No, there's nothing nebulous about the advantages our customers associate with Butler industrial buildings. Your Butler Builder (see "Buildings" or "Steel Buildings" in the Yellow Pages) will be happy to discuss other advantages, including financing. Call him . . . or write direct.

Now's the time to buy a used truck from Mack

There's a trend underway among high volume truckers . . . toward shorter, lighter-weight trucks and truck-tractors. Long-haul fleets are buying them to take advantage of recent liberalization of length and gross weight limitations by many states.

In buying these new models, many fleet operators are trading in their present vehicles . . . some of them in almost-new condition. This means that the selection of high-value used trucks on our trading lots is wider now than in times past.

So, now is an unusually good time to select the used truck you may have been thinking about. It is possible to get not only dependable transportation, but first comers will be able to select the exact Mack they need—with famed Thermodyne® diesel power offered only by Mack.

The Mack-built Thermodyne diesel is one of the major reasons there are twice as many diesel-powered Macks on the road as the next nearest make . . . more than the next two makes combined. It's the reason, too, why Mack has been No. 1 in diesel truck sales for seven straight years.

Why not call or stop in and see your nearest Mack branch or distributor and find out about the fine used Macks and other good trucks and tractors he has in stock. He'll be glad to handle the financing and insurance for you, and your present truck may even serve as down payment. Mack Trucks, Inc., Plainfield, New Jersey. Mack Trucks of Canada, Ltd., Toronto, Ontario.

DA Highway Quick Router

THE FOLLOWING pages contain a guide to the services of the leading motor common carriers of the United States.

This material is presented in a new format, the Quick Router. The guide consists of three parts—alphabetic listings of the 100 top motor carriers, the names of the carriers tabulated by the regions which they serve, and the carriers listed by the inter-region services they perform.

To use this guide to find a carrier serving a given area, for example, turn to the U. S. map on Page 80. In the columns below the map and on the following pages, find the large letter C This gives carriers serving the area in which you are interested.

By turning to the Alphabetical Listings of Carriers in the front of the directory you can get a closeup view of each of the carriers in this list. In this way you can pick specific services.*

The third section is for shippers wanting service between regions. If from C your shipment is to be transported to a point in region A, look up the AC map in the back. Again you will find a list of the carriers performing this service. When a letter and the name of a city appear in parenthesis at the end of company name, that company's service in that region is centered largely in that one city area and not throughout the region.

Space limitations have restricted the number of carriers which DISTRIBUTION AGE could include in its first quick router. Therefore, we have used the 100 largest, basing this on the total operating revenue. ●

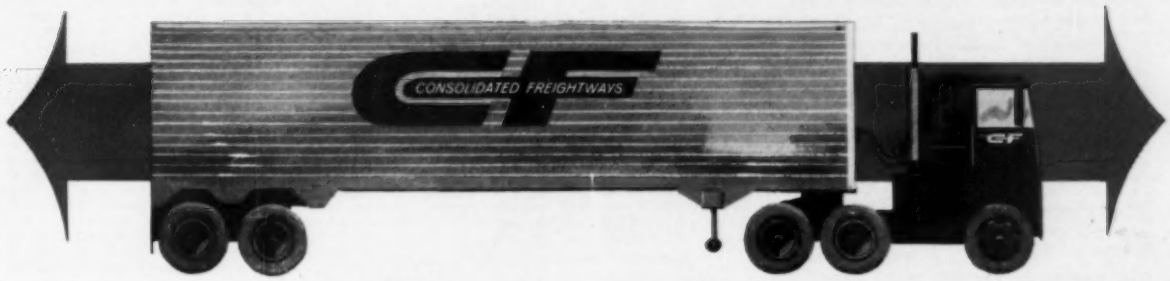
CONSOLIDATED FREIGHTWAYS NOW SERVES COAST TO COAST



Motor Cargo and Liberty Motor Freight Lines are now a part of the Consolidated Freightways system. These carriers operate between the Atlantic seaboard and the Middle West, joining the CF system at Chicago, Indianapolis, Milwaukee and Minneapolis-St. Paul.

As units of the CF system they are now able to offer shippers the most extensive single-line freight service available, particularly to the western United States and Canada. And, of course, CF customers can enjoy comparable single-line service to the east.

This is major league coverage. In fact, the CF system now serves all 15 major league cities! And CF Daysaver service saves time, saves handling.

For dependable, courteous attention to *your* shipments, call your CF system terminal. Until telephone directory changes can be made, look for Motor Cargo or Liberty Motor Freight Lines in eastern cities.

EXCLUSIVE WITH CF—a special office equipped to furnish any type of rate and routing information not available locally. Write, wire, or phone Consolidated Freightways Information Center, Box 32, Chicago 50, Illinois. TWX Bellwood 172. Telephone: AUstin 7-7003

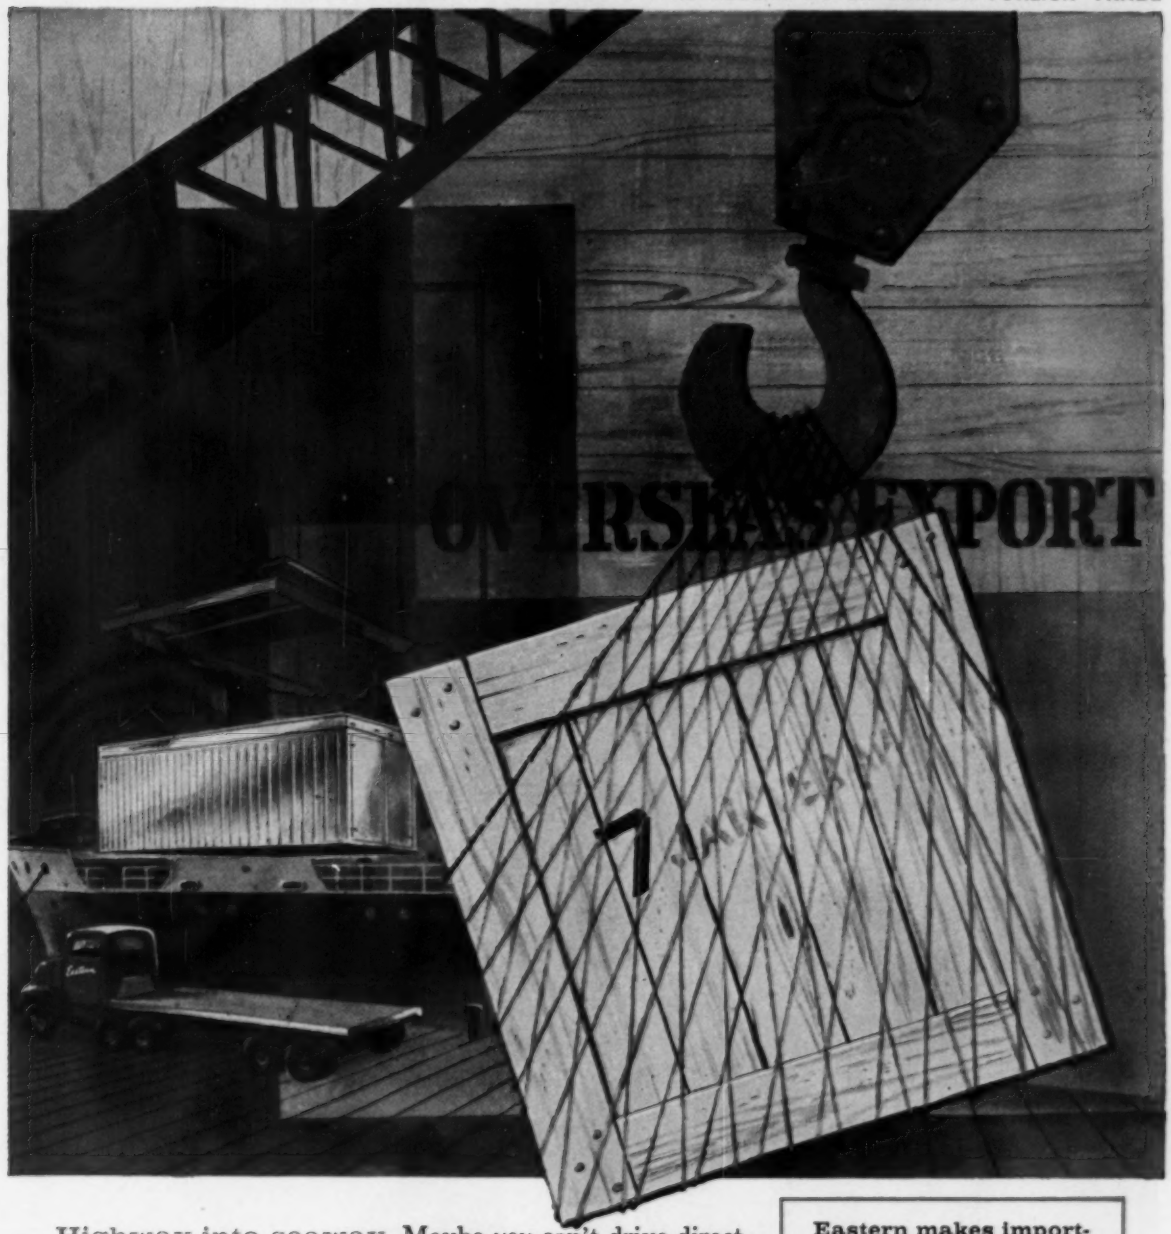
Infrared Highway Control

Trucks and other vehicles are moving smoothly through this busy Denver, Col., intersection. An infrared eye leers down from a utility pole. The sensing device detects and counts vehicles—even those traveling 80 mph. The Heiland Division of Minneapolis-Honeywell Regulator Co. designed the device so that the beam is reflected from the pavement back into a receiver lens. When vehicles break the beam, they are detected and counted

Air Sales Seminar

More than 160 salesmen of United Air Lines met recently to map cargo sales techniques. The air salesmen broke up into groups of 27 for the two-day meeting



Highway into seaway. Maybe *you* can't drive direct from Trenton, N. J., say, to Tokyo, Japan . . . but your shipment can, when you route it Eastern Express. Eastern's foreign trade service to all ports in all countries of the free world saves the shipper time, cargo handling and, often, special export packaging charges. Makes ocean or Gulf almost extensions of the American highway.

Eastern makes import-export transport easy

America-wide, pre-scheduled interline connections and co-operative arrangements with foreign carriers.

Varied export services include pier pick-up, transfer and delivery, TL (Sealed Thru-Trailer) and LTL—from inland or shoreside.

Expert shipping *go-how* counsel at all ports—to co-ordinate movement of cargo with shippers own port agent.

Eastern
EXPRESS, INC.

YALE
PDQ
YALE

Just what do you get from Yale PDQ* Service?

Yale PDQ Service is a concept that starts with equipment designed to require the minimum of service. At the same time it recognizes, realistically, that prolonged useage of any equipment inevitably will call for service. When such service is required the Yale program provides PDQ service with factory approved facilities, teams of mechanics, comprehensive manuals and a system of dispatching spare parts quickly to any corner of the country.

Q. How does the Yale PDQ Service operate?

A. Through "teams" of technicians, assigned to various functions. Some "teams" operate at the Yale factories, handling manufacturing and engineering assignments. Others are the task forces that operate in the field and come in direct contact with you.

Q. How well are the field teams technically qualified to service my equipment?

A. The teams consist of carefully picked men—factory trained. They operate in the field under the careful surveillance of experienced regional and district supervisors operating out of modern, fully equipped facilities.

Q. Are Yale PDQ Service teams in reality nothing more than rescue squads to meet emergencies?

A. Far from it. One of their important functions is "operational maintenance" which means preventing costly downtime of equipment before it occurs. Also, the field service teams are the ears and eyes for Yale engineering and production. They report on the performance of Yale equipment in customers' plants.

Q. How do I get replacement parts quickly for Yale equipment under PDQ service?

A. Replacement parts are maintained at depots in the East, Midwest, and Far West. From these depots, replacement parts are distributed to the network of Yale branches and dealers who carry stocks for immediate delivery.

Q. Do Yale Branches and Franchised Dealers carry every possible replacement part a customer might need?

A. No. But they do carry stocks of parts based on the frequency of demand by customers in the area. Furthermore, they anticipate these demands and stock accordingly. Under a system of centralized electronic data processing the inventories of all replacement parts are kept under instantaneous control. The memory of the electronic computer indicates where parts are shipped, availability by location, rate of depletions from stock, etc.

Q. So what?

A. So, when you request a replacement part which is not in stock in your immediate area, it takes only a few minutes to locate its whereabouts throughout the country and arrange for quick shipment to you.

Q. Are replacement parts available for all Yale equipment regardless of age?

A. Yes. This is a particular feature of the Yale PDQ Service. Replacements are available for *all* equipment—new or old. Replacement parts for equipment designed for specific applications for which parts are not standard and for very old equipment naturally must be produced on special order.

Q. Where do I get Yale PDQ Service teams when I need them?

A. The Yale PDQ Service is available in all important industrial areas throughout the United States and Canada (see your Yellow Pages). In addition, all PDQ service centers maintain service shops on wheels manned by factory trained mechanics.

Q. Where can I get further information about Yale PDQ Service?

A. Write to your Yale representative or to the Yale & Towne Manufacturing Company, Materials Handling Division, Philadelphia 15, Pa., Dept. X-006.

***Performance — Dependability — Quality**

NOT VERY OFTEN, BUT...

Chances are, you've never seen an envelope like this . . .

But no carrier, of any sort, has ever existed *without* claims . . .

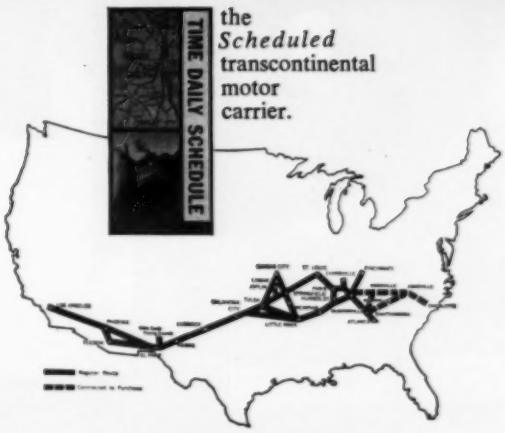
Only two factors are important to a shipper: The smallest number of claims and the fastest payment of claims when they do occur . . .

TIME — it's no secret in the industry — rates tops in both categories.

The most modern freight handling equipment and techniques, carried out by highly trained personnel, keep the number of claims to the barest minimum . . .

And company policy which insists on the utmost speed in the payment of any claims which do occur makes for unparalleled speed in claim settlement.

So, while the chances are slim that you'll ever see an envelope like this, it will be on your desk before you can say "so dependable, it's all scheduled!" if you ever should have a claim.



the *Scheduled* transcontinental motor carrier.

Footnotes

[1] With common carrier.
[2] Not applicable.

Guide

IT IS NOT a simple question to ask whether a highway common carrier is actively participating in containerization. Many are, to be sure, but to different degrees as DA discovered when it surveyed the country's leading motor carriers.

Three points crop up in any investigation of motor carriers in containerization: U. S. motor carriers are either in it, about to get in it through experimentation, or not interested—now. The facts behind each position are interesting.

Containerized carriers operating over-the-highway use fork lifts and cranes to handle such shipments. Only a few provide through service with other carriers. Returns from the question of who is responsible for placing the container on the trailer showed that in some instances it is a shipper responsibility and in others it is handled by the motor carrier.

The motor carriers were asked whether they interchange trailers carrying containers with other motor common carriers and whether they interchange containers, without trailers, with any other motor common carriers.

DA asked the carriers who do not now offer container handling as part of their facilities when they plan to begin such a service. The replies range all over the course. Here are a few: 1961, when there is a need, unknown, understudy, by end of 1960, as logical to our operation, in near future.

Because motor common carriers are so strongly a part of the rail-highway containerization picture, it will be of interest to compare the following highway containerization chart with the one prepared from the rail containerization survey.

DA wanted specific answers to the question of what containers the carriers are equipped to handle. Some representative replies include Warehouseman, Freightmaster, Econovan, Conex, Dorsey, Bunyan Box, Flexi-Van, Adapto, Fruehauf, and Trailmobile.

The results follow. ●

Paper Roll Headache Cured

When International Paper Co. wanted to speed-up a first step in the corrugating, processing, and fabrication of corrugated shipping containers it couldn't. The materials handling equipment was available. But the proper anchorage was not. Robert Abel and Co. designed this high-speed crane with such weight savers as diodes in place of a motor generator set and a dynamic lowering brake instead of a mechanical load brake. It was all necessary because steel in the 30-year-old building was weak

HANDY BUYERS' GUIDE to COST-SAVING INDUSTRIAL TRUCKS

This handy reference describes Lewis-Shepard's *complete* line of "manually-operated," "intermediate" and "all-electric" equipment. Here is everything you need for a fully-integrated materials handling system. Write today for your free copy of L-S Condensed Catalog 80-204.

TRUCK LINES, INC.
GENERAL OFFICES DENVER, COLO.

. . . Container Guide

Central Truck Lines, Inc.

Provides service as an experimental operation. Transports shipper containers which can be carried on standard flatbed trailers. Special equipment for Erie-St. Laurence type containers. Shipper is responsible for placing container on trailer—can be loaded by fork-lift truck. No interchange.

Chicago Express, Inc.

Provides container service as an experimental operation.

Jack Cole Co.

Provides service as an experimental operation. Transports shipper containers which can be carried on standard flatbed trailers. Shipper is responsible for placing container on trailer—can be loaded by fork-lift truck. Will interchange trailers carrying containers and containers without trailers with other motor common carriers.

Eastern Express, Inc.

Provides container service. Transports shipper containers which can be carried on standard flatbed trailers. Shipper is responsible for placing container on trailer—can be loaded by fork-lift truck, tractor (i.e. Flexi-Van), or straddle carrier. Will interchange containers without trailers with Interstate Motor Lines, Inc.

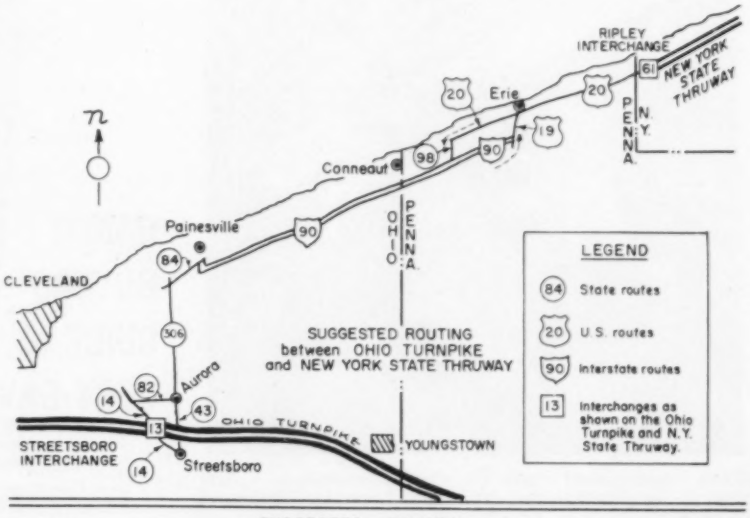
Interstate Motor Lines, Inc.

Provides service as an experimental operation. Transports shipper containers which can be carried on standard flatbed trailers. Equipped to transport Conex containers. Shipper is responsible for placing container on trailer—can be loaded by crane. Provides through service with American President Lines. Will interchange trailers carrying containers and containers without trailers with Eastern Express, Inc.

Interstate System

Provides container service. Interstate System is responsible for placing container on trailer. Will interchange trailers carrying containers with other motor common carriers.

New Turnpike Additions



SUGGESTED ROUTES

Suggested routing between the Ohio Turnpike and the New York State Thruway have been revised. Map shows the new routing which involves use of Ohio Turnpike Interchange 13 (Streetsboro) instead of previously suggested Warren, Interchange 14. Interstate Route 90 between U. S. Route 19 and Pa. Route 98 will not be open to westbound traffic before the fall

Mason & Dixon Lines

Provides container service. Will provide containers for shippers' use. Equipped to transport Brown pickup beds with pull down legs 18x8x8 ft. Mason & Dixon is responsible for placing container on trailer. No interchange.

Navajo Freight Lines

Provides service as an experimental operation. Will provide containers for the use of shippers. Equipped to handle Navatainer container. Navajo is responsible for placing container on trailer. Provides through service with Continental Air Lines and American President Lines. No trailer interchange. Will interchange containers (without trailers) with motor common carriers.

Strickland System

Provides container service. Transports shipper containers which can be carried on standard flatbed trailers. Strickland is responsible for placing container on trailer—can be loaded by crane, fork-lift truck, tractor (i.e. Flexi-Van) or straddle carrier. Provides through service with other carriers. Will interchange trailers and containers (without trailers) with many other motor common carriers.

Keeps Runways Clear

This is just one tire of the 50-ton crane developed for the Air Force to remove disabled aircraft from runways. Doing things the hard way, inflation via hand pump, would take 15,000 strokes. And after 17 hours of pumping, the Firestone tire would have only 50 lb of pressure

Basic Data for Planning Warehouse Operations

Effect of Floor Load Limits on Stacking Height

(Number of cases high[1])

Floor Load Limits (lb. per sq ft)	Bays Solidly Loaded	Bays With Aisles Accounting For 30 Per Cent	40 Per Cent	50 Per Cent
300[2]	9.3	12.1	13.0	14.0
250[2]	7.8	10.1	10.9	11.6
200	6.2	8.1	8.7	9.3
150	4.7	6.1	6.5	7.0
100	3.1	4.0	4.3	4.7
75	2.3	2.9	3.2	3.5
50	1.6	2.0	2.2	2.3

[1] For the purpose of this table, No. 2 goods are assumed to weigh 40 lb. per case, including a share of the weight of the pallet. Since the 40 x 32 in. standard pallet occupies, with appropriate clearance, a space 42 x 36 in. or 1512 sq in., and since a 9–8 "tie" is the common loading pattern, each column of cases may be said to occupy 1512/8.5 or 178 sq in., or 1.24 sq ft.

Thus 40/1.24 = 32.2 lb per sq ft. With stacks 10 cases high the load per foot equals 322 lb. The other figures were derived in similar fashion.

[2] Limits set as high as 250 lb. are rarely found in old "mill-constructed" multi-story warehouses. Commonly such buildings have limits of 100 to 120 lb. and in some rare instances limits as restrictive as 75 or 50 lb. prevail. A four story concrete structure in one large eastern city is limited to 120 lb., despite 14 x 20 ft bays, 24 in. concrete columns, and 6 in. floors reinforced with ½ in. rods in 6 in. grids.

Case Weights of Canned Goods

For the convenience of wholesalers who desire to compute the weight of delivery-truck and fork-truck loads, the following table[1] of case shipping weights is provided. The weights refer to corrugated fiber cases unless otherwise specified.

Approximate Shipping Weights[2]

Pack	Fruits	Lb.
48–1T	Fcy. el. peaches	64
48–1T	Choice fruits	62
48–1T	Ch. apricots & cocktail	63
48–1T	Choice figs	64

16–No. 2	Raisins or prunes	40
12–No. 2	Prunes or compote	27
36–11 oz.	Dried fruits	31
24–8 oz.	Figs	14 ½

[1] The data in the table pertaining to canned goods were published in The Canning Trade Almanac for 1950.

[2] Weights vary slightly according to local and individual canner practice.

The alternate to this is . . . DOWNTIME!

An ounce of prevention . . . can eliminate *downtime* in your plant. With today's highly mechanized manufacturing and distribution methods . . . *downtime* of materials handling equipment can mean the difference between a profit or a loss.

A Clark Dealer *Continuous* Maintenance Program, available from 113 Clark dealers across the continent, offers you the most effective, and economical method of reducing costly *downtime*. Here's why!

In brief, a Clark Dealer Continuous Maintenance Program offers you:

1) . . . regular maintenance on your industrial trucks on a *programmed* basis. Scheduling is conveniently set up for your particular operation. If you like, service to your equipment can be done at night or at any other time when your equipment is not in use. The additional cost for this off-shift service is a small percentage of the cost of *downtime*.

2) Clark dealers, with the aid of a national service personnel training program, assure you that the best trained mechanics in the industry will service your equipment. These highly trained specialists perform a minimum of 22 separate inspections on every truck serviced. They not only perform the normal jobs of greasing and oil changes, but also make all necessary adjustments to your equipment. Most important, they report the condition of your machines, anticipating failure before it happens. As a result . . . *downtime* is drastically reduced.

3) A Clark Dealer Continuous Maintenance Program gets you out of the repair and maintenance business. It eliminates the need for special tools, parts stock and use of valuable plant space for servicing facilities.

4) A Clark Dealer Continuous Maintenance Program is economical. It actually costs less than similar service on your own automobile. This is an inadequate comparison, however, when you consider the small cost of preventive type maintenance to the cost of *downtime*.

For detailed information on a Clark C.M. program call your local Clark dealer (he's listed in the Yellow pages) or write: C.M. Service, Clark Equipment Company, Battle Creek, Michigan. No obligation, of course.

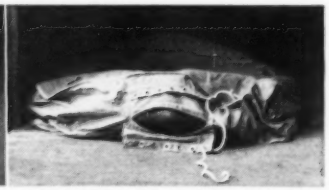
Cushion your lading for savings by the carload with Firestone's

Speeds blocking, lowers dunnage costs, shrinks damage loss

Jarring starts and jolting stops can't harm lading cushioned by Air-Bloks.

Air-Blok is easy-in, easy-out dunnage; one man can block entire car swiftly.

Air-Bloks are quickly deflated, rolled and tied with built-in straps for easy return.



Tough bladder is encased in treated canvas envelope for double protection.

Protective cushions hold lading in tight. Firestone Air-Blok pneumatic cushions absorb the shocks and impacts that ride with railway cargo. Uniform pressure over the entire surface of the dunnage guarantees maximum protection for lading, with far less chance of damage under any conditions. Pneumatic dunnage, thoroughly tested by U.S. Army Quartermaster Corps, effectively reduces time, labor and cost.

Cost less to use, stop waste. Air-Bloks can be used over and over again. Because the deflated bags are returned to the shipper, dunnage cost per trip is substantially lowered. No need to purchase and re-purchase conventional dunnage, which becomes a total loss. Air-Blok gives true economy.

Save loading time and labor. Lading can be blocked quickly and easily by one man. Partially inflated Air-Bloks are slipped into position and inflated to required pressure. The cushions also deflate quickly to speed unloading, avoid demurrage.

Firestone Air-Blok is by far the most economical way to ship, and a few experimental shipments will prove it. For information write Firestone Industrial Products Company, Noblesville, Indiana.

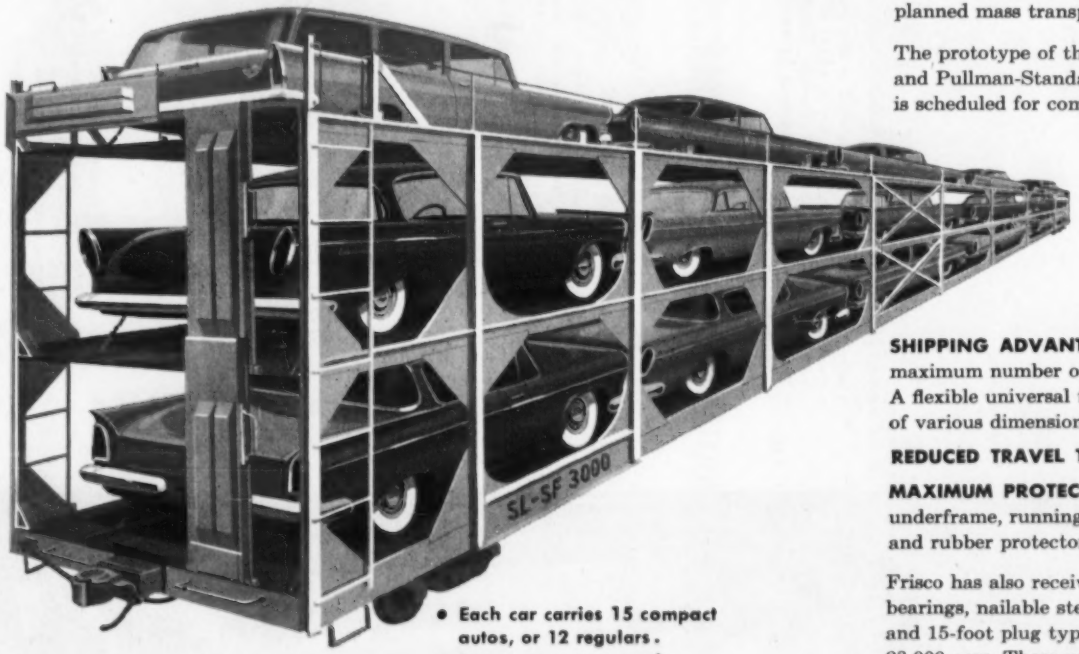
FRISCO PIONEERS Auto Mass Movement with New Type Transport Car

130-car fleet of new "tri-level" transport cars carries 1950 compact autos or 1560 regulars

FRISCO, pioneer in the auto piggy-backing field, now introduces another planned mass transportation innovation.

The prototype of the new tri-level transport car, jointly developed by FRISCO and Pullman-Standard, has been thoroughly tested. Delivery of the 130-car fleet is scheduled for completion September 1, 1960.



- Each car carries 15 compact autos, or 12 regulars.
- Length over decks 83'
- Width inside 8'-6"

SHIPPING ADVANTAGES. The new tri-level transport car steps up the maximum number of autos per car to 12 regular-size, or 15 compacts. A flexible universal tie-down makes it possible to load a combination of vehicles of various dimensions.

REDUCED TRAVEL TIME on long haul shipments.

MAXIMUM PROTECTION is provided for the load by a 10-inch travel cushion underframe, running from coupler to coupler. This combination two-gear and rubber protector cushion effectively dissipates impact energy.

Frisco has also received delivery of 400 new 50-ton boxcars (with roller bearings, nailable steel flooring, heavy duty draft gears, ride control parts and 15-foot plug type doors) bringing its modern freight fleet to approximately 23,000 cars. These purchases are part of a continuing Perfect Shipping Program. Call your FRISCO Sales Representative for that next shipment. He'll show you why it's best to . . .

Footnotes

Y—Yes.
N—No.
1—Limited to transportation of new automobiles.
2—Only on packing house products from Austin, Minn., to Chicago or beyond. CGW Tariff 350.
3—Have experimental Flexi-Van tank trailer unit.
4—Applicable only for account Burlington Truck Lines.
5—Flexi-Van only.
6—Limited Application.
7—At SP convenience if tonnage warrants.
8—Automobiles only.

THIS IS DA's report on the trailer-on-flatcar service in 1960. A continuing guide to an industry's growth.

That piggy-back is helping the nation's railroads prosper is shown in cumulative piggy-back loadings for the first 32 weeks this year. They are 35.5 per cent above the corresponding 1959 period.

This seventh edition of the original DA Piggy-Back Routing Guide illustrates such growth with the addition of ramp cities across the vast rail network. New in this year's Guide is the tabulation of railroad containerization facilities and the special services available from railroads offering such service.

The Railroad Containerization Chart is a profile of the railroads which provide transportation for van-type containers, other than highway trailers, which are interchangeable with other forms of transportation.

An addition to the piggy-back chart concerns tanks transported on flatcars. And many of the individual railroad listings now give the name and title of the executive in charge of developing his company's TOFC operations.

The maps in this section are not intended to be exact replicas of the official railroad maps; nor do they necessarily show the complete system for each road. They are presented to give a general view of the piggy-back area covered by each road, and ramp locations.

Service is not restricted to ramp cities. Through substitute motor carrier service, contract carrier arrangements, etc., most of the railroads serve all or most of the off and on-line stations in their territories. Interline agreements extend the number of points served by each railroad to hundreds, and in many cases thousands. Cities in small type (parentheses) are not ramp cities. They are interline points without ramps. ●

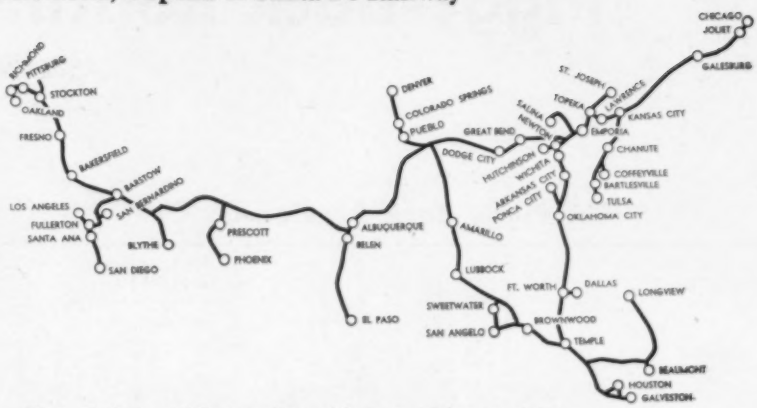
or chandeliers

The better way is Santa Fe

No matter what you ship call the nearest Santa Fe Traffic Office and let the longest railroad in the U.S.A. go to work for you.

Santa Fe

Atchison, Topeka & Santa Fe Railway



Plans 2, 3, 4, and 5; interline with most major carriers under the following tariffs: AT&SF 15579; WTL 445, 450, 453, 455, 461, 463; SWL 74, 75, 76, 77, 79, 80, 82, 84, 85; PSFB 293, 294, 295; Tex-La 104; TCFB 11, 23, 25, 26. Rail billed truckload freight at truck competitive rates. Over-the-road movement by Santa Fe Trail Transportation Co., a subsidiary truck line. Executive in Charge of Piggy-Back Development: F. L. George, assistant to general freight traffic manager.

Arkansas & Louisiana Missouri Railway

Plans 2 and 4; interline trailers with the IC and MP. Routing applies to points on the IC and MP and points on connecting lines East of the Mississippi River and North of the Missouri River to the extent that connections have routing available, as provided in SWT Tariffs 74, 75, 76, 77, 79, 80, 82, 84.

When the name of a city is shown on a map without parentheses, it designates a ramp location. This city also may be an interline point. When the name of the city appears in parentheses, it means an interline point with no ramp.

Atlantic Coast Line

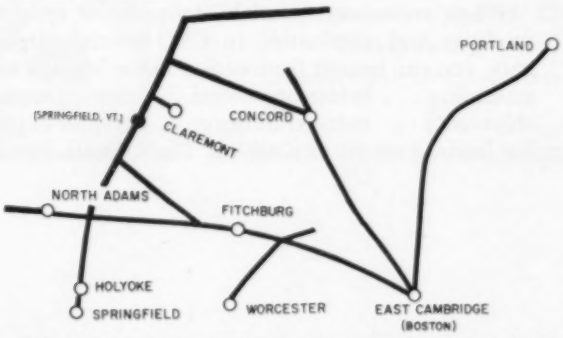
Plan 1; interlines with RF&PRR between Alexandria, Va., (RF&P) and Jacksonville, Fla., (ACL).

Directory of Piggy-Back Railroads

Baltimore & Ohio Railroad

Plans 2, 3, and 4; transport tank trailers on flatcars; interline with AT&SF, CofNJ, CGW, CMStP&P, C&NW, CB&Q, CRI&P, C&S, FTW&D, GC&SF, GN, IC, KCS, L&A, L&N, MKT, MP, Monon, MStL, P&SF, RDG, StLSF, StLSW, Soo, SP, TNO, TP, UP, Wabash, WMd. Rail billed truckload freight at rail rates. Executive in Charge of Piggy-Back Development: George E. Dove, manager-railroad trailer service. Transports van-type containers interchangeable with other forms of transportation. Provide a complete door-to-door service. Provide containers for private shippers, also when shipper owns containers and these can be carried on standard flatcars. Interline cars carrying containers with other railroads.

Boston & Maine Railroad



Plans 1, 2, 3, 4; interline with AT&SF, BAR, B&LE, CN, C&EI, CB&Q, CRI&P, C&S, C&NW, D&H, DL&W, Erie, IC, LV, MeC, MP, M&StL, NKP, Monon, PRR, Springfield Term., UP, Wabash. Rail billed truckload freight at truck competitive rates. Highway common carrier trailers at per trailer charge. Executive in Charge of Piggy-Back Development: C. P. Tomm, general sales manager-piggy-back.

Bangor & Aroostook Railroad

Plans 2 and 3; transport tank trailers on flatcars; interline via Maine Central Railroad. Executive in Charge of Piggy-Back Development; Norman J. Tardif, manager-piggy-back service.

Bessemer & Lake Erie Railroad

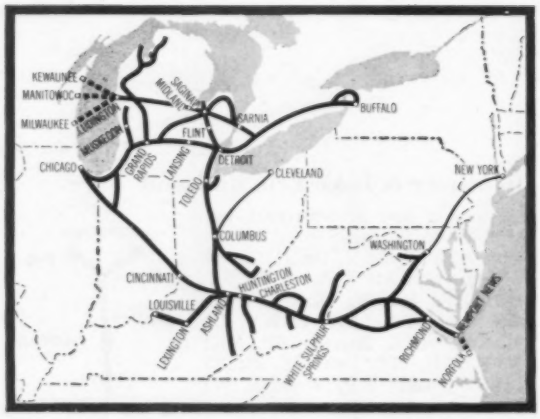
Plans 2 and 3; transport tank trailers on flatcars; interline only with AT&SF, B&M, C&EI, C&NW, CB&Q, CMStP&P, CRI&P, D&RGW, DL&W, Erie (West), GN, IC, KCS, L&N, L&WV, LV, M&StL, MKT, Monon, MP, NKP, NYNH&H, NP, Soo, SP, StLSF, StLSW, T&P, UP, Wabash, WP. Executive in Charge of Piggy-Back Development: H. R. Richards, tm.

Canadian National Railways

Plans 1 and 2; interline with DL&W and LV between New York City and Toronto, B&M from stations in Massachusetts to Montreal, Toronto, and Hamilton. Rail billed lcl freight at rail rates. Rail billed truckload freight at truck competitive rates. Highway common carrier trailers at per trailer charge. Executive in Charge of Piggy-Back Development: L. J. Henderson, general manager, Department of Road Transport.

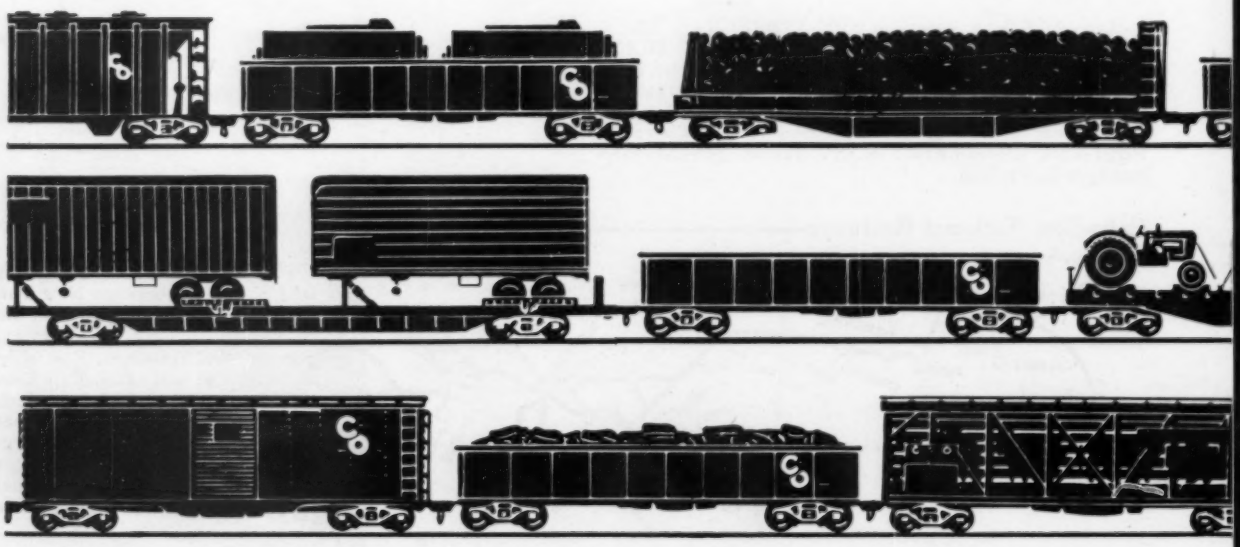
C AND Outstandability

Chessie can help you get the most from special-purpose cars

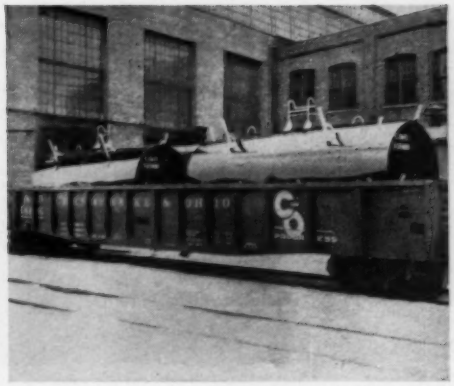


Development pioneer and owner of one of the largest fleets of specialized equipment, Chesapeake and Ohio Railway continues its acquisition of special cars for the special needs of its customers. Today, one out of every five of Chessie's nearly 40,000 modern merchandise freight cars is especially designed or equipped. They include a wide variety of tailored-to-use boxcars, gondolas, hoppers and flat cars . . . all offering important transportation savings.

When your raw materials, components or commodities find application in C&O special-purpose cars, you can benefit from easier, faster loading and unloading . . . better protection . . . more compact shipments . . . reduced dunnage . . . greater capacity loads. And, in *any* car on The Chessie Route,



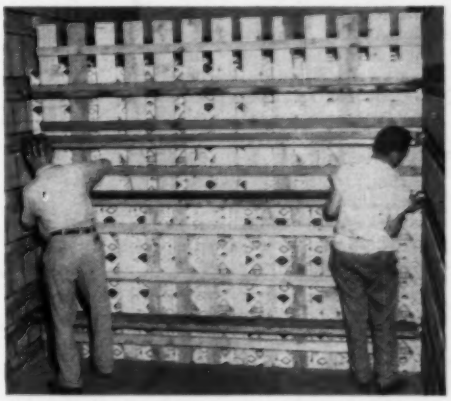
Chessie's wide range of special-purpose cars include insulated compartmentizers (above), quick-loaders, covered hoppers and hooded gondolas.



This hooded gondola protects coiled steel from weather; is fitted with special cradle structure which eliminates need for dunnage, facilitates loading and unloading.

your shipment is under the constant surveillance of CLIC, Car Location Information Center. This miraculous combination of electronic tape, teletype and alert people furnishes a dependable up-to-the-minute report on your car.

Your resourceful C&O representative will welcome an opportunity to prove the advantages of shipping via The Chessie Route.

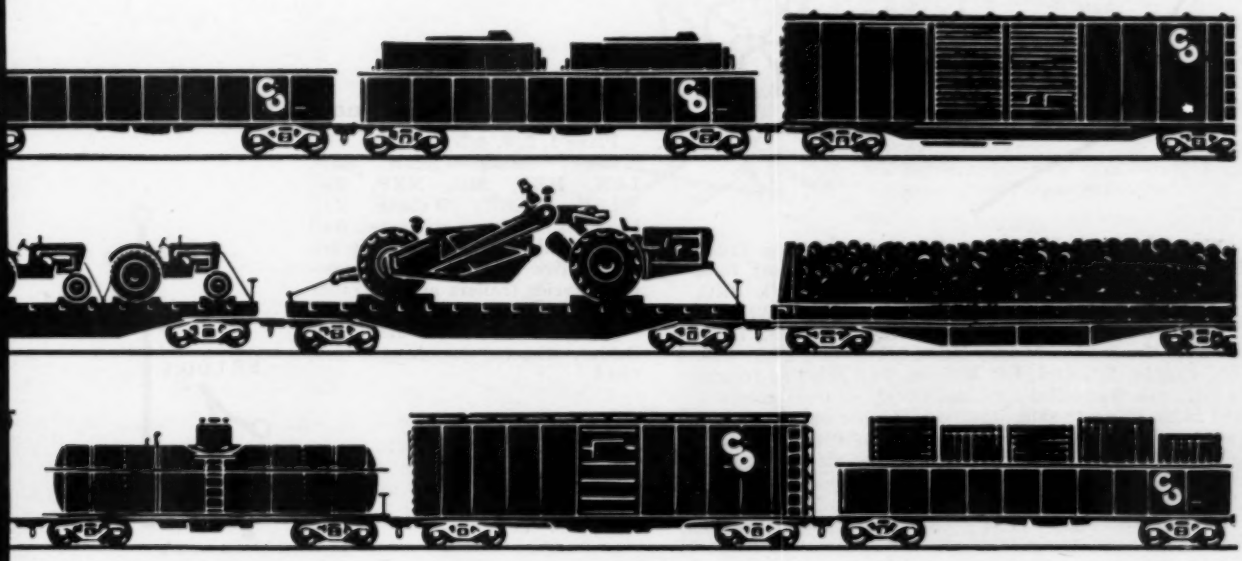


Chesapeake and Ohio is a leading user of D/F cars of many types, all contributing to shipper savings in time, dunnage costs; allowing heavier loading and practically eliminating cargo shifting.

Chesapeake and Ohio Railway

TERMINAL TOWER, CLEVELAND 1, OHIO

Outstandability in Transportation



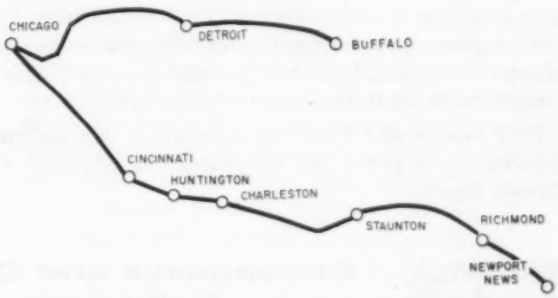
Canadian Pacific Railway Co.

Plans 1 and 2; no interline. Plan 1 freight at truck competitive rates. Plan 2 freight on tariff rates published in cents per 100 lb. Plans 1 and 2 at Montreal, Toronto, Hamilton, London, Windsor, Saint John, Fredericton; Plan 1 only at all other ramp points. Executive in Charge of Piggy-Back Development: A. E. Jenner, manager-Piggy-Back Services, Montreal.

Central Railroad Co. of New Jersey

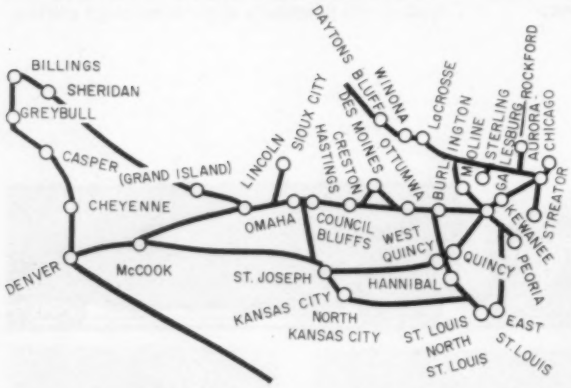
Plans 2 and 3. Plan 4 offered between Jersey City and Chicago and East St. Louis, Indianapolis, Louisville, and Cincinnati, Columbus, and Dayton. Employs rolling stock of B&O, DL&W, LV. Applies to points on the B&O, NKP, Wabash, west of Pittsburgh & Buffalo, including the Southwest and Western Trunk Line territories. Rail billed lcl freight at rail rates. Rail billed truckload freight at truck competitive rates.

Chesapeake & Ohio Railway



Plans 1 and 3; interline with CEI, RI, LV, PRR. With Plan 1, service is offered between Chicago and Detroit, Cincinnati, Richmond, Newport News, Buffalo, Saginaw; between Cincinnati and Richmond and Newport News. Also between Huntington and Charles, W. Va., and Staunton and Verona, Va.; Detroit and Buffalo. Plan 3 in conjunction with automobiles from Detroit, Wayne, Wixom, Mich.—to various points. Executive in Charge of Piggy-Back Development: J. H. Suthann, manager-piggy-back services.

Chicago, Burlington & Quincy



Plans 1, 2, 3, 4, 5 (but Plan 1 for Burlington Truck Lines only—wholly owned subsidiary). Transport tank trailers on flatcars; interline with AT&SF, B&O, BRC, C&EI, CRI&P, C&IM, C&NW, CR&I, C&S, DRG&W, Erie, GB&W, GM&O, GN, GTW, IC, IHB, IN, KCS, L&N, M&StL, Monon, MKT, MP, NKP, NYC, NP, PRR, Soo, StLSF, StLSW, TRRA, UP, Wabash, Rail billed lcl freight at rail rates. Rail billed truckload freight at truck competitive rates. Ramp-to-ramp rates for shipper owned trailers and freight cars. Executive in Charge of Piggy-Back Development; P. L. Smithburg, general freight tm. Provide transportation for van-type containers interchangeable with other forms of transportation only when shipper owns containers and these can be carried on standard flatcars. Interline cars carrying containers with other railroads.

Chicago & Eastern Illinois Railroad

Plans 1, 2, 3, 4, 5; interline with AT&SF, CB&Q, C&NW, Erie, L&N, MKT, MP, NKP, Soo, StLSF, StLSW, Wabash. Rail billed lcl freight at rail rates. Rail billed trailerload freight at truck competitive rates. Highway common carrier trailers at per trailer charge. Executive in Charge of Piggy-Back Development: T. F. Behler, director-coordinated services.

Chicago Great Western Railway Co.

Plans 1, 2, 3. Plan 2 only on packing house products from Austin, Minn., to Chicago or beyond. Interline only on packing house products. Executive in Charge of Piggy-Back Development: E. J. Forster, freight traffic manager.

The Piggy-Back Plan . . .

PLAN 1—Rail transport of motor carrier trailers. Trucker solicits freight at truck rates and pays railroad either a "division" or per-trailer charge.

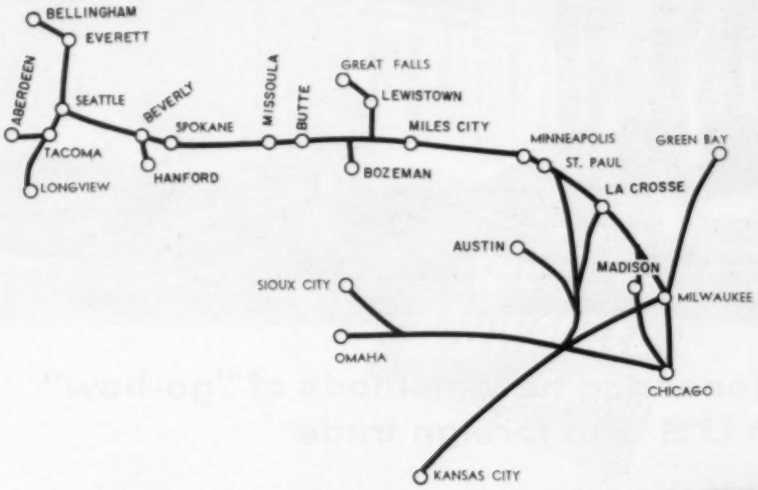
PLAN 2—Railroad trailers are transported on flatcars. Railroad deals directly with shipper, soliciting business under truck competitive tariffs.

PLAN 3—Shipper provides trailers, owning or leasing as he wishes. Railroad receives trailers at railhead, loads them, transports them, and grounds them.

PLAN 4—Rail movement of shipper trailers on shipper flatcars. Shipper takes trailers to and from railroad. shipper loads trailer on car and on arrival unloads it.

PLAN 5—Railroads publish tariffs of joint truck-rail rates for complete door-to-door piggy-back service.

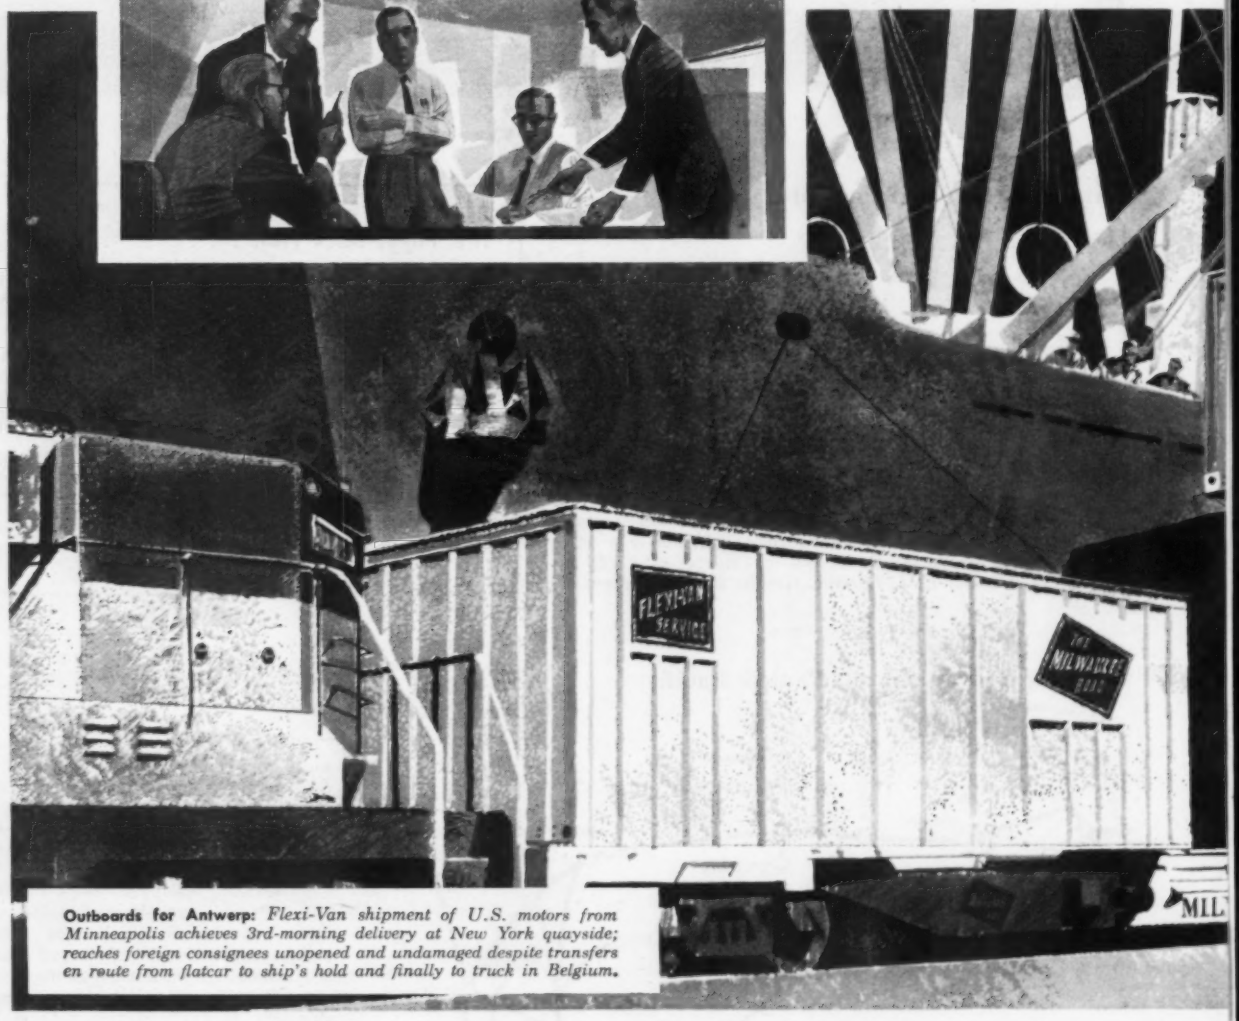
Chicago, Milwaukee, St. Paul & Pacific



Plans 2, 3, 4, 5. While interline with most major carriers, actual working agreements completed with only a few at Chicago, Omaha-Council Bluffs, Kansas City, St. Paul-Minneapolis, and Spokane. Executive in Charge of Piggy-Back Development: E. W. Chesterman, manager-rail-highway sales. Provide transportation for van-type containers which are interchangeable with other forms of transportation. Complete door-to-door service. Provide containers for private shippers, through service with water carriers. Interline cars carrying containers with other railroads.

SOMETHING **NEW** IN RAILROADING...

"CREATIVE CREWS"



Outbounds for Antwerp: *Flexi-Van shipment of U.S. motors from Minneapolis achieves 3rd-morning delivery at New York quayside; reaches foreign consignees unopened and undamaged despite transfers en route from flatcar to ship's hold and finally to truck in Belgium.*

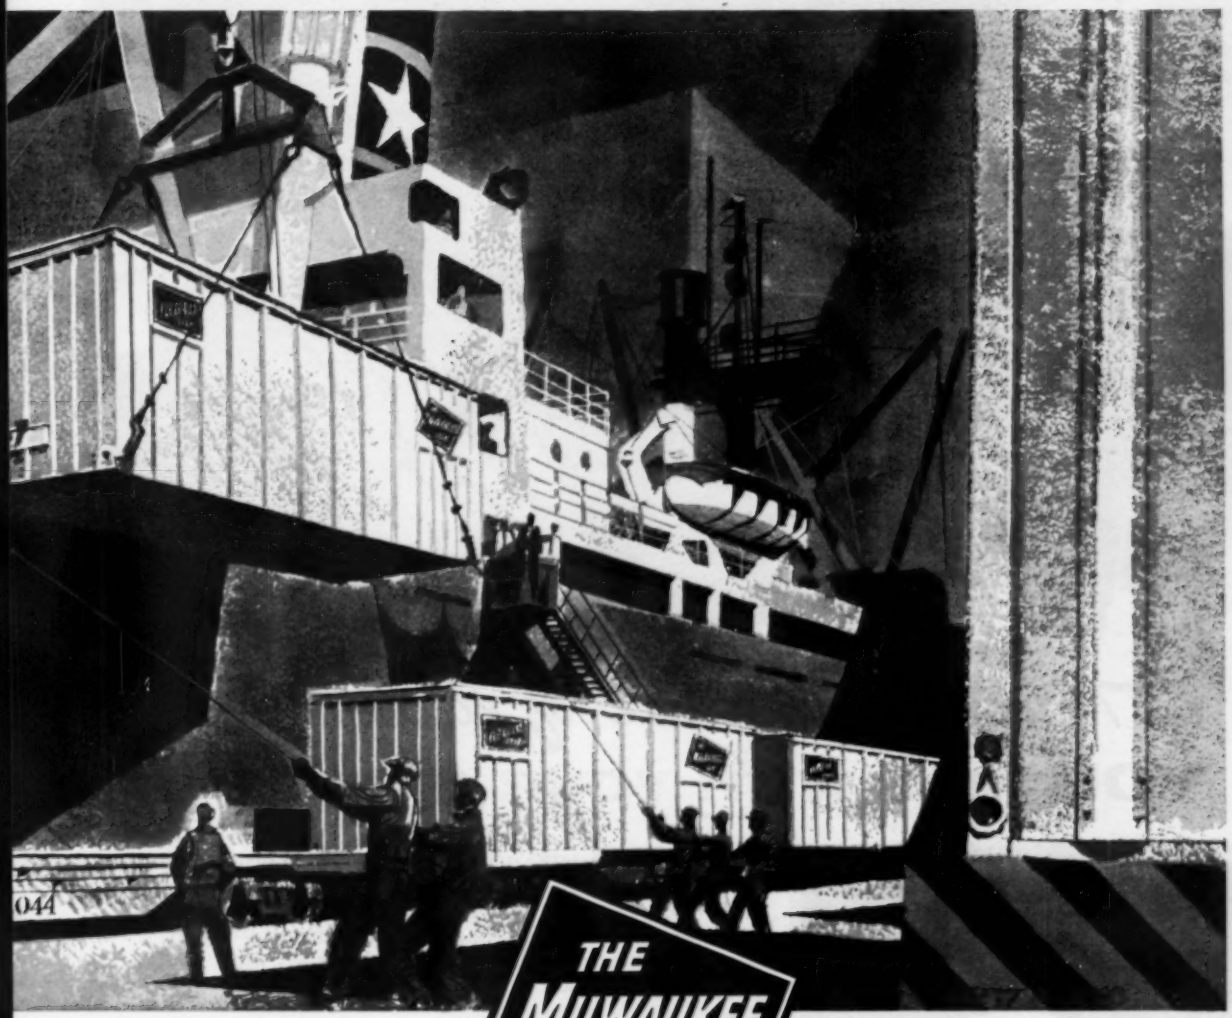
Now they're pioneering new methods of "go-how" in U.S. and foreign trade

We hope to *anticipate* shippers' wants in the current world trade boom. Cooperating with a steamship company and an eastern railroad, our Foreign Freight Traffic and Flexi-Van personnel helped develop this new safer, damage-free method of moving freight internationally.

One of the more dramatic ideas involved is the concept of "containerization." This is the packaging of *entire shipments* in specialized Flexi-Van "containers" adaptable to many forms of transport. They are so versatile they can travel by railway, highway, or waterway—even go overseas without special export packing of the merchandise!

The Milwaukee Road's Creative Crews specified

of the Milwaukee Road



THE MILWAUKEE ROAD

America's resourceful railroad

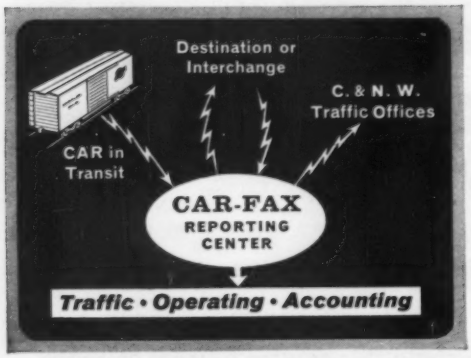
unique *attachments* on the containers to facilitate handling by marine loading equipment. And we have *purchased* the Flexi-Van containers and vehicles necessary so that we could offer our customers this speedy interchange with shipboard marine traffic. *On order* right now are several experimental-type Flexi-Van "containers" for liquids and chemicals, to extend this service to more shippers.

The Creative Crew concept is at work everywhere on the Milwaukee Road—pioneering new ideas, breaking with old traditions, bringing *idea-power* to bear on problems large and small. That is why today's alert management groups recognize the Milwaukee as America's *resourceful* railroad.

Route of the Super Dome Hiawathas and Western "Cities" Fleet

Through a miracle of electronics...

YOU RIDE WITH YOUR SHIPMENT!



As indicated in the diagram above, Car-Fax Reporting Center receives constant information on the movement of every carload of freight moving over C&NW lines. This information is relayed to its destination or interchange and also to our traffic offices throughout the country. Up-to-the-minute location of any car is available by simply calling the C&NW traffic office nearest you.

New North Western Car-Fax helps solve your distribution problems for once and all, electronically! This amazing car locating system keeps you as up-to-the-minute on shipments as if you were sitting beside the engineer—reports cars en route throughout each day—does away with "lost" shipments for good.

Here's how! IBM machinery codes and processes car movement facts at check points throughout the entire North Western System—instantly transmits this information to each traffic office concerned.

North Western Car-Fax tells you the whole story—location, destination, point-of-origin, routing, contents, type of car, number, date, exact time of movement plus any delays encountered along the way.

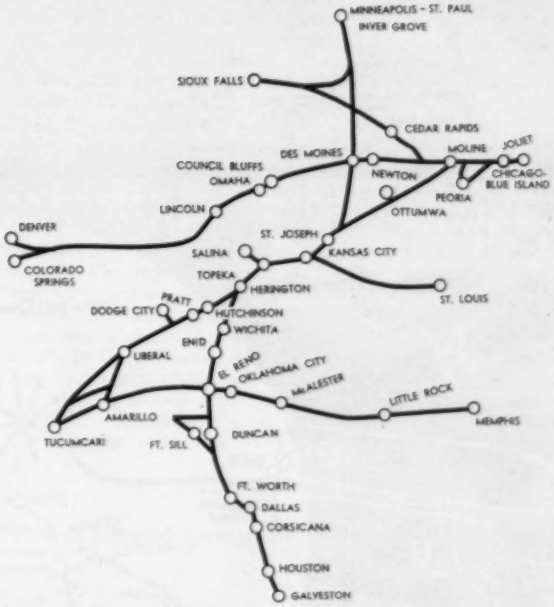
Discover how Car-Fax can help you pre-plan production, expedite shipments and pinpoint deliveries—route your freight North Western!

CHICAGO AND NORTH WESTERN RAILWAY

Chicago & North Western Railway Co.

Plans 1, 2, and 4; interline with AT&SF, B&O, C&EI, CRI&P, Erie, GN, KCS, MKT, Monon, MP, NKP, NP, PRR, StLSF, StLSW, UP, Wabash. Service is principally rail billed truckload freight at truck competitive rates. Highway common carrier trailers at a per trailer charge.

Chicago, Rock Island & Pacific Railroad



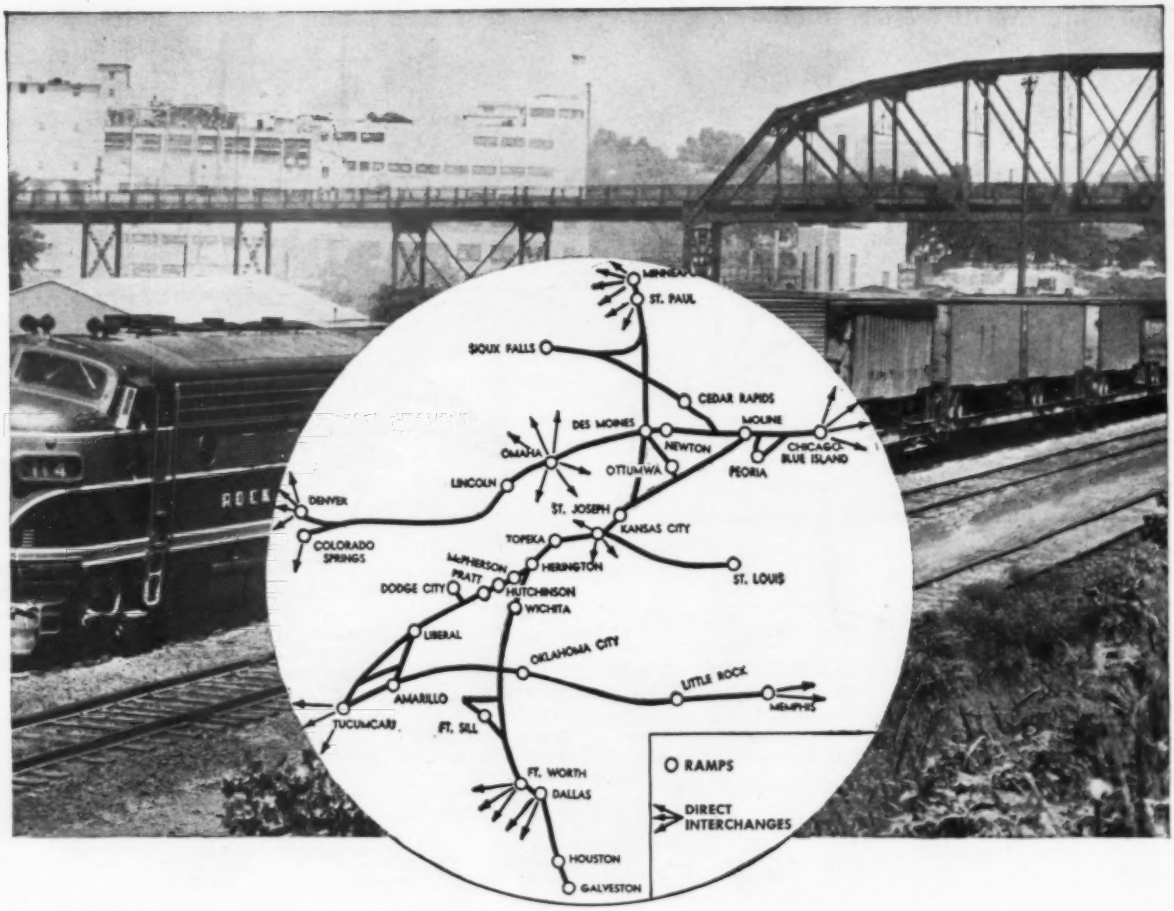
Plans 1, 2, 3, 4, 5; interline. Rail billed truckload freight at truck competitive rates. Highway common carrier trailers at a per trailer charge based on weight and contents. Executive in Charge of Piggy-Back Development: F. J. Conrad, vice president-traffic.

Colorado and Southern Railway

Plans 1, 2, 3; interline with AT&SF, C B & Q, D & R G W, FW&D, MP, UP. Plan I is applicable only for Burlington Truck Lines. Rail billed truckload freight at truck competitive rates. Service offered in connection with CB&Q. (See Chicago, Burlington, Quincy and Fort Worth & Denver listings.) Executive in Charge of Piggy-Back Development: J. C. Jensen, general freight agent.

Delaware, Lackawanna & Western Railroad

Plans 2, 3, 5. Transport tank trailers on flatcars. Interline with A&LM, AT&SF, BAR, B&LE, B&M, CB&Q, C&EI, C&IL, CNE, CofNJ, CN&W, CRI&P, C&S, D&H, D&RGW, FW&D, GN, GTE, IC, KCS, L&A, L&HR, L&NE, LV, L&WV, MC, M&E, MKT, MKTofT, Monon, MoPac, M&StL, NJI&I, NP, NYC&StL, NYNH&H, NYS&W, SP, StLSF, StLSF&T, StLSW, TNM, T&P, UP, WAB, WMW&NW, WP. Rail billed lcl at rail rates. Rail billed truckload freight at truck competitive rates. Contract and private truckers' traffic on a basis where they pay full charges for shipments at standard piggy-back rates, using regular rail billing, per diem allowance for shippers' trailers. Executive in Charge of Piggy-Back Development: James L. Barngrove, Jr., gtm. Provide transportation for van-type containers which are interchangeable with other forms of transportation. Offered only on a contract basis, but is a complete door-to-door service. Provided only when the shipper owns the containers and these can be carried on standard flatcars. Provide through service with other carriers.



Strategically located piggyback ramps

...another good reason for shipping Rock Island

The optimum piggyback service combines the efficiency of long hauls by rail, the economy of short hauls by truck. What makes this ideal combination possible is the existence of piggyback facilities in numerous key areas.

The Rock Island map above shows how piggyback ramps blanket the system—and how, if the destination of your shipment is outside Rock Island territory, you can reach into every corner of the nation through Rock Island's direct interchanges with other railroads.

So capitalize on this complete transportation service. Next time you ship piggyback, ship via the Rock Island railroad. Get the benefit of strategically located ramps and direct interchange points... plus equipment engineered to meet your requirements...plus the services of experienced, conscientious personnel...plus a shipping plan that best fits your needs.

Your Rock Island traffic representative will be glad to help you put this effective combination to work. Why don't you get in touch with him today, or consult...

Rock Island

ROCK ISLAND LINES

A. J. FERRELL
Freight Traffic Manager
La Salle Station, Chicago 5

Delaware & Hudson Railroad

Plans 1, 2, 3, 4, 5 with qualifications. Plan 1: Terminating carrier between Albany Capital District and Chicago and East St. Louis, Ill. Intermediate carrier between B&M Mass. ramp locations and metropolitan areas in Central Territory. Plan 2: Intermediate carrier between New England and Trunk Line, Central, Western, Southwestern Territories and Eastern Canada. Plan 3: Terminating carrier between Albany Capital District and Central Territory. Intermediate carrier between New England and Central Territory. Plan 4: Intermediate carrier between New England and Central and Southwestern territories. Plan 5: Automobiles South Bend, Ind., to points and places in Conn., Maine, N.H., N.Y., Vt., and R.I. Executive in Charge of Piggy-Back Development: Paul F. Robinson, vice president-traffic.

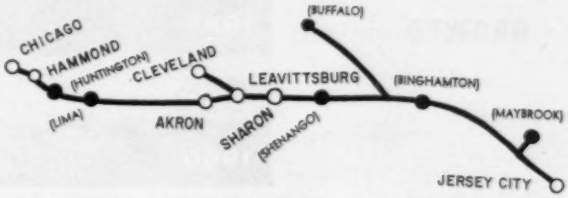
Florida East Coast Railway

Plans 1, 2, 3, 4, 5. Qualifications. Plan 1—between Birmingham, Ala., Atlantic, Ga., and Savannah, Ga., at one end and Miami, Fla., at the other, interchanged at Jacksonville, Fla., with ACL and SAL. Plan 2—will be inaugurated shortly between Florida East Coast Railway stations and Southern, Southwest, Western and Official Territories, interchanged at Jacksonville, Fla., with ACL, SAL, Sou railways. Plan 3—all freight between Official, Central, Western territories at the one end and Miami, Fla., at the other end, interchanged at Jacksonville Fla. Automobiles from Southern, Central, Western territory origins and Miami, Fla. Plan 4—between Official Territory and Miami, Fla. Plan 5—automobiles from Metuchen, N. J., to Miami, Fla. Executive in Charge of Piggy-Back Development: T. C. Maurer, chief freight and passenger traffic officer. Provide transportation for van-type containers which are interchangeable with other forms of transportation. Offered only on a contract basis but extends service to motor common carriers through Plan 1.

Fort Worth & Denver Railway

Plans 2, 3, 4; interline with AT&SF, CB&Q, CRI&P, C&S, KCS, L&A, MKT, MP, QAP, Frisco, StLSF, StLSW, SP, T&NO, UP. Rail billed truckload freight at truck competitive rates. (See also CB&Q.) Executive in Charge of Piggy-Back Development: Y. E. Juge, freight traffic manager.

Erie Railroad Company



Plans 1, 2, 3, and 4; interline with A&LM, AD&N, AT&SF, BAR, B&LE, B&M, C&EI, C&NW, C&S, CB&Q, CRI&P, D&RGW, DT&I, FWD, GN, IC, KCS, KOG, L&A, L&N, MEC, M&StL, MKT, Monon, MP, NKP, NYNH&H, NYS&W, NP, StLSF, Soo, SP, StLSW, TNM, TP, UP, Wabash, WMW&NW. Rail billed truckload freight at truck competitive rates. Highway common carrier trailers at a per trailer charge. Service between Trunk Line, Central Freight, Western Trunk Line, and Southwestern Territories, with some few point-to-point commodity rates to Transcontinental Territory. Executive in Charge of Piggy-Back Development: B. F. Conway, freight traffic manager.

Great Northern Railway

Plans 2, 3, 4, 5; interline with CB&Q, CMStP&P, C&NW, CRI&P, M&StL, Soo, SP, SP&S, WP. Rail billed lcl freight at rail rates. Rail billed truckload freight at truck competitive rates. Trailers and flatcars equalize between terminal loading and unloading points, moving loaded or empty. Executive in Charge of Piggy-Back Development: K. G. Heimbach, director-truck and tofc sales.

[3]—Expected to be offering container service by September 15, 1960.

You name it...

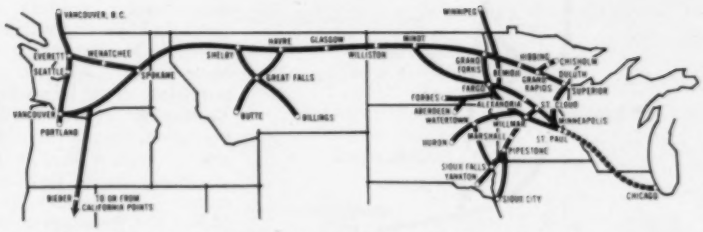
any of more than 500 key cities and towns and your

Great Northern freight specialist will see that your shipment (LCL or carload) gets there fast, direct . . . at advantageous rates. Reason: GN shipping services are *fully coordinated*—piggyback, truck, freight car. Your freight goes great when it goes Great Northern!

we'll move it...

via Great Northern's fully coordinated shipping services

GREAT NORTHERN RAILWAY



Great Northern freight specialists are located in principal cities of the U.S. and Canada. For information, *write:*
G. D. JOHNSON, *General Freight Traffic Manager, Great Northern Railway, St. Paul 1, Minnesota.*

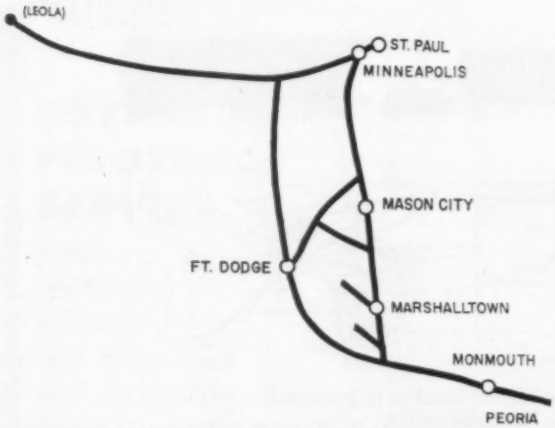
Louisville & Nashville Railroad

Plans 1, 2, 3, 4, 5. Transport tank trailers on flat cars. Interline with A&WP-WofA, ACL, B&O, C&EI, CB&Q, C & N W, CRI&P, Erie, Frisco, IC, L&A, MP, MKT, Monon, NYC, N&W, PRR, StL-SW, SP, T&P, Wabash. Rail billed truckload freight at truck competitive rates. Cars handled in regular trains. Executive in Charge of Piggy-Back Development: Edward S. Bowman, manager-piggy-back traffic.

Maine Central Railroad

Plans 1, 2, 3; interline with AT&SF, BAR, B&LE, B&M, CB&Q, C&EI, D&H, DL&W, Erie, LV, L&WV, Monon, NJI&I, NIC&StL, PRR, Wabash. Executive in Charge of Piggy-Back Development: R. C. Merrow, freight traffic manager.

Minneapolis & St. Louis Railway



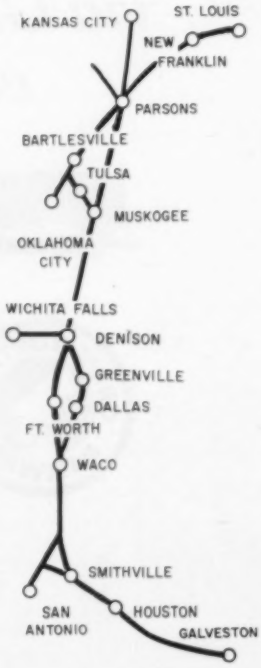
Plans 1, 2, 3, 4; interline with CB&Q, GN, IC, NP, Soo, Interline service extends to St. Louis and Kansas City, Mo., and to cities in Southwestern Lines Territory, also between the Twin Cities and Eastern Cities served by Trunk Line railroads. Executive in Charge of Piggy-Back Development: Frank P. Connoy, director-piggy-back and barge services.

Lehigh Valley Railroad Co.

Plans 1, 2, 3; interline with AD&N, ATSF, BLE, B&M, C&EI, CMStP&P, CN, CRRNJ, CB&Q, CRI&P, D&H, DL&W, DK&S(MP), FW&D, GCSF(ATSF), GT, KCS, L&HR, LI, L&NE, L&A, Monon, MKT, MP, MKTT, NJI&I, NKP, NYNH&H P&SF(ATSF), SLSF, SLSFT, StLSM, SP, T&P, Wabash. Plan 3 interline from the New York-Jersey City and Newark, N.J., area (also Allentown, Wilkes-Barre, Sayre, Rochester) to Chicago and East St. Louis, Ill., Cleveland-Detroit-Buffalo; Fort Wayne-Indianapolis, Ind.; Louisville, Ky.-South Bend, Ind.-Toledo, Ohio, routes LV-NKP and LV-WAB. Also in effect over same routes in reverse direction. Rail billed truckload freight at truck competitive rates. Executive in Charge of Piggy-Back Development: J. H. Schmid, manager-piggy-back sales.

Missouri Kansas Texas Railroad

Plans 2, 3, and 5; interline with major railroads on service to the north, east, and west. Rail billed lcl freight at rail rates. Rail billed truckload freight at truck competitive rates. Highway common carrier trailers at per trailer and mileage charges. M-K-T piggy-back under the direct supervision of Missouri Kansas & Texas Transportation Co., a subsidiary. Executive in Charge of Piggy-Back Development: C. E. Bulkley, gm-M K & T Transportation Co.



This cup of coffee went to Memphis...Piggyback

Shipping coffee isn't news. But when a single paper cup of coffee, 1/3 full, is carried 500 miles on a freight train without spilling a drop, that's real news for shippers. It means PERFECT HANDLING! May we boast? It happened on the Dixie Line.

In Cincinnati, a workman loading his company's piggyback shipment of pulpboard, placed his unfinished coffee on a stack of board and forgot it. Five hundred miles later the cup arrived at Memphis . . . upright and unspilled.

What better proof can we offer you of the safe, smooth freight-handling assured every shipment that goes L & N Piggyback.

LOUISVILLE & NASHVILLE RAILROAD
The DIXIE LINE

Now...New York Central's SUPER-VAN SERVICE goes to New England!

The New York Central's new all-container concept in fast freight transportation – Super-Van Service! – is now extended to New England points.

Check how this schedule every weekday can provide faster, more reliable service to your customers.

EASTBOUND		WESTBOUND	
Lv. St. Louis	6:30 p.m. D.S.T. (Mon.)	Lv. Boston	9:30 p.m. D.S.T. (Mon.)
Lv. Chicago	11:00 p.m. D.S.T. (Mon.)	Lv Worcester	10:40 p.m. D.S.T. (Mon.)
Ar. Springfield	12:01 a.m. D.S.T. (Wed.)	Lv. Springfield	12:05 a.m. D.S.T. (Tues.)
Ar. Worcester	1:30 a.m. D.S.T. (Wed.)	Ar. Chicago	11:00 p.m. D.S.T. (Tues.)
Ar. Boston	3:30 a.m. D.S.T. (Wed.)	*Ar. St. Louis	7:30 a.m. D.S.T. (Wed.)

*Connecting Service

Super-Van trains carry only shipping containers such as Flexi-Van, which can travel by rail, highway or water. Equipped with passenger train type roller bearings, these trains of gleaming metal boxes clip off miles at spectacular speeds on the rails. Suddenly you find major markets miraculously closer.

Super-Van Service is another exciting innovation being made by the Central to provide faster, more reliable service for its customers. Call your local New York Central freight sales office and ask for "Super-Van Service."

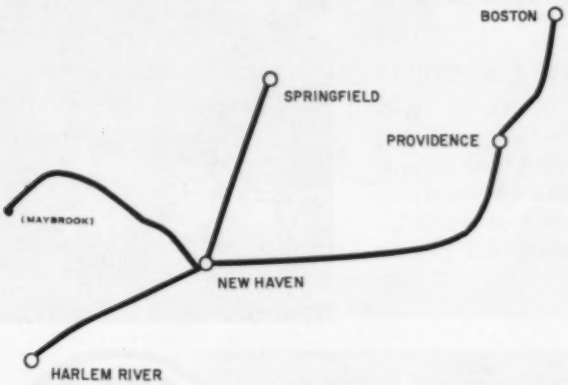
NEW YORK CENTRAL SYSTEM

ROAD TO THE FUTURE

Missouri Pacific Railroad

Plans 2, 3, 4, 5; interline with AT&SF, B&O, CB&Q, C&EI, C&NW, CMStP&P, CRI&P, C&S, D&RGW, IC, KCS, L&N, NYC, NKP, PRR, SPL, StLSF, UP, Wabash. Rail billed truckload freight at truck competitive rates. Service includes tofc and demountable trailer body. The latter is operated between points on MP, between points on T&P, and interline between the two railroads, also between MP and B&O. Also interline with other railroads. Provides complete door-to-door service. Map includes T&P and KO&G operations. (See also Texas & Pacific.)

New York, New Haven and Hartford Railroad

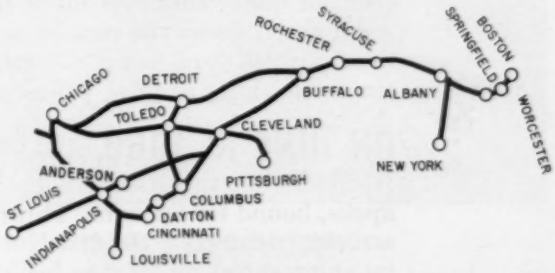


Plans 1, 2, 3, and 4. Plan 2 interline with AD&N, A&LM, ATSF, B&LE, CB&Q, C&EI, CMStP&P, CofNJ, C&NW, CRI&P, C&S, DL&W, D&RGW, Erie, FW&D, IC, KCS, KO&G, L&H, L&NE, L&WV, LV, L&A, MP, M&StL, MKT, MKTT, MStP&SSM, Monon, NJI&I, NYC&StL, NP, PRR, StLSF, StLSF&T, StLS, SP, T&P, TNM(T&P), UP, Wabash. Rail billed truckload freight at truck competitive rates. Highway common carrier trailers at a per trailer charge. Executive in Charge of Piggy-Back Development: Joseph B. Dowling, coordinator-tofc sales.

Monon Railroad

Plans 1, 2, 3, and 5. Also a Plan 3, not "true"—but an allowance to shipper for use of his trailer, and also an optional allowance in cwt for pick-up and/or delivery of trailer to or from ramp. Joint truck-rail rates in tariff form. (With All-Freight, Artim, Olson, Saginaw Transport Co.) Interline with AT&N, AT&SF, B&LE, B&O, B&M, CBQ, C&NW, CRI&P, CRR of NJ, DL&W, Erie, GN, IC, L&N, LV, L&WV, MC, ME, Milwaukee, M&StL, NJ, NKP, NP, NYNH&H, NYS&W, RDG, S&E, Soo, ST, UP, Wabash, WM. Overhead carriers: D&H, L&HRR, L&NE, P&WV. Rail billed truckload freight at truck competitive rates. Railroad lcl shipped between Hammond and Indianapolis, Ind. Executive in Charge of Piggy-Back Development: C. R. Phillips, manager - Trailer Maid Service.

New York Central System



Plans 2, 3, 4, 5; interline arrangements AT&SF, CB&Q, CMStP&P, L&N, MoPac; negotiating with other lines. Flexi-Van Service, door-to-door employing demountable vans. Handling only freight on rail billing. Arrangements have been made for movement of perishables in refrigerated service. Executive in Charge of Piggy-Back Development: R. L. Milbourne, director-Flexi-Van sales and service. Provide transportation for van - type containers which are interchangeable with other forms of transportation with complete door-to-door service. Through service with other carriers and interline cars carrying containers with other railroads.

New York, Susquehanna & Western

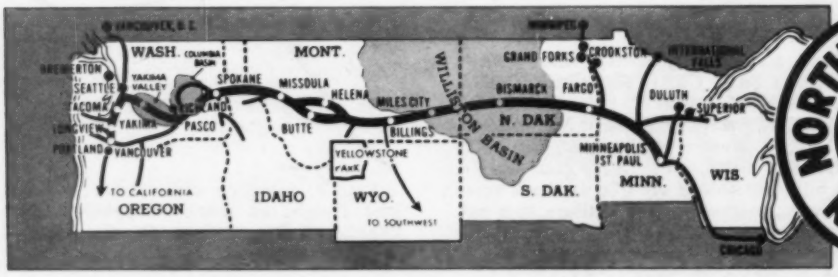
Plan 2; interline with DL&W, Erie, Rail billed truckload freight at truck competitive rates. Executive in Charge of Piggy - Back Development: George E. Dove, president-traffic.

NP MAKES HISTORY IN CROSS-COUNTRY PIGGYBACK!

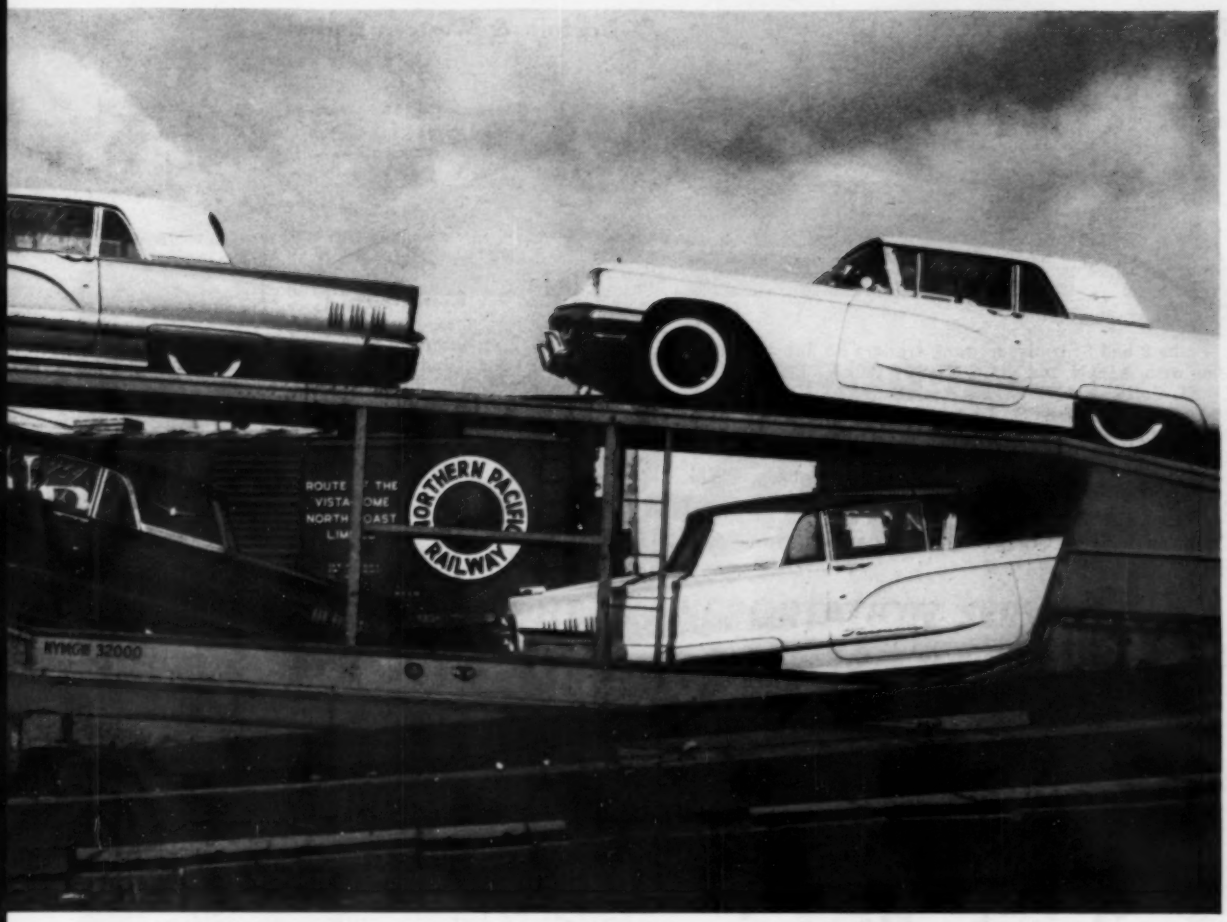
ON JUNE 13, 1960, these Ford Thunderbirds left the Northern Pacific yards in Minneapolis, bound for Seattle. Three nights later they arrived, to complete the first northern transcontinental TOFC shipment of motor cars ever made to Puget Sound. The photograph shows the cars being unloaded at Seattle Stacy Street yard ramp. (Northern Pacific provides similar facilities at principal terminals.)

ON JUNE 18, 1960, these American Motors Ramblers left the Northern Pacific yards in Minneapolis, bound for Spokane. Three mornings later they arrived, to complete the first Northern transcontinental shipment of motor cars loaded 6 cars to a trailer —12 to a flat car. Both shipments moved on 85-foot flat cars supplied by the Trailer Train Company, which Northern Pacific has joined to supplement its own piggyback equipment.

LOOKING FOR EXPEDITED PIGGYBACK SERVICE? LOOK TO NP! A continuing program of expansion in Customized Freight Equipment means fast, efficient, dependable handling for shippers—the right equipment for the need—on NP! For complete information, call your local NP traffic representative or write to Otto Kopp, Vice President-Traffic, Northern Pacific Railway, St. Paul 1, Minnesota.

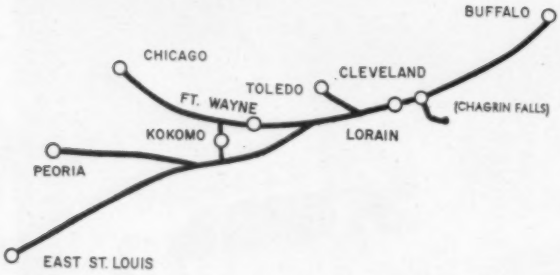


NORTHERN PACIFIC RAILWAY



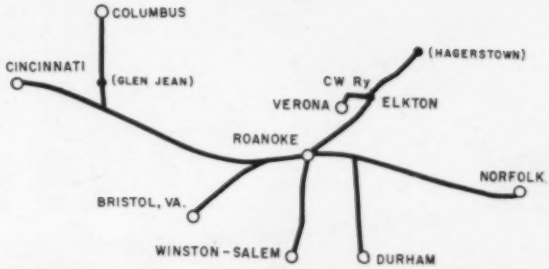
NORTHERN PACIFIC—really terrific!

Nickel Plate Road (NYC&StL)



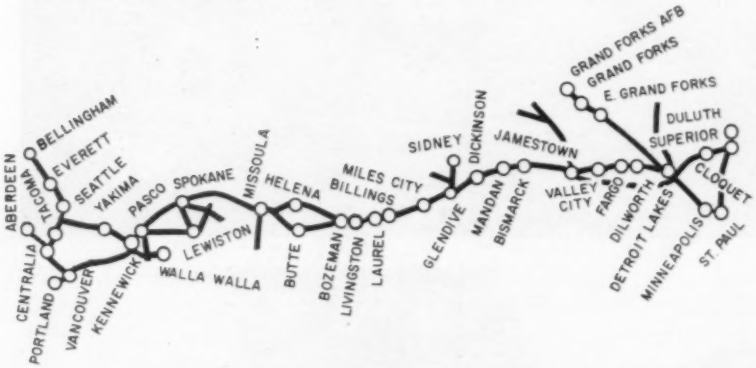
Plans 2 and 3; transport tank trailers on flatcars; interline with AD&N, A&LM, AT&SF, B&LE, B&M, CB&Q, C&EI, CofNJ, C&NW, CRI&P, C&S, DK&S, DL&W, Erie, FW&D, GC&SF, KCS, L&A, LV, L&WV, MEC, MKT, MK&TofT, Monon, MP, M&StL, NYNH&H, NYS&W, NorPac, P&SF, P&WF, RDG, StLSF, StLSFofT, StLSW, SoPac, T&NM, T&NO, T&P, UP, Wabash, WM, WMW&MW, WP. Rail billed truckload freight at truck competitive rates. Executive in Charge of Piggy-Back Development: C. G. Cruickshank, assistant vice president-sales.

Norfolk & Western Railway



Plans 1, 2, 3; interline with PRR via Hagerstown, Md., to Kearny, N.J., and Philadelphia. Via Columbus, Ohio, to Chicago, Detroit, Indianapolis, St. Louis, and Toledo. Via Cincinnati, Ohio, to Hamilton, Ohio. Interline with L&N via Cincinnati, Ohio, to Louisville, Ky., and St. Louis, Mo. Interline with DT&I via Glen Jean, Ohio, to Detroit. Executive in Charge of Piggy-Back Development: Aubrey T. Mason, assistant to freight traffic manager.

Northern Pacific Railway



Plans 1 (limited application), 2, 3, 4, 5; interline with CB&Q, C&NW, CRI&P, M&StL, Soo, SP&S, SP. Rail billed lcl freight at rail rates. Rail billed tl freight at truck competitive rates. Both local and interline service is available between principal points on a system-wide basis and is available to and from all Northern Pacific stations in Montana, through a service arrangement with Northern Pacific Transport Co., a wholly-owned subsidiary. Executive in Charge of Piggy-Back Development: Otto Kopp, vice president-traffic.

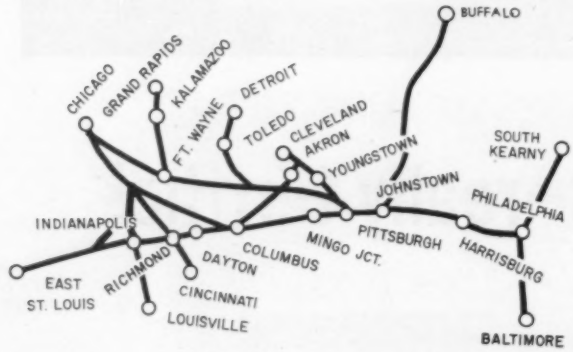
Lehigh and Hudson River

Performs tofc service as an intermediate carrier only, interlining with DL&W, LV, and NYNH&H. Operates Plans 2 and 3.

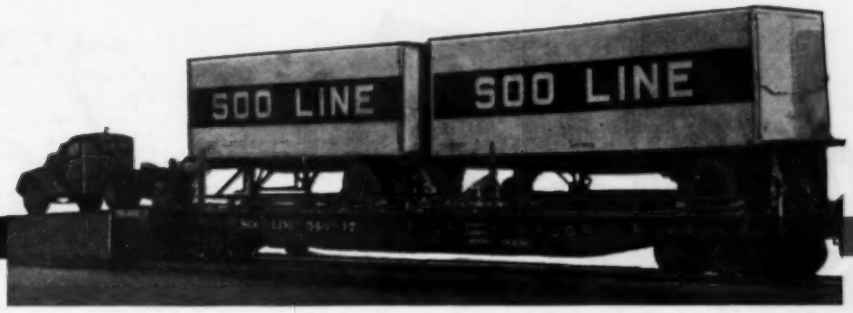
Long Island

Service in connection with the PRR and their connections and to a limited extent with the Lehigh Valley. Service is to and from Queens County on Plan 2.

Pennsylvania Railroad



Plans 1, 2, 3, 4; interline with AT&SF, ACL, B&M, C&NW, CB&Q, CMStP&P, C&S, CRI&P, D&RGW, GB&W, IC, GN, KCS, M&StL, MKT, MP, NH, N&W, NP, RF&P, Soo, StLSF, SAL, SP, T&P, UP, WAB, Rail Billed lcl freight between Ft. Wayne and Grand Rapids, Indianapolis and Louisville, Indianapolis and Terre Haute only on a daily basis; irregularly between other points. Rail billed truckload freight at truck competitive rates. Highway common carrier trailers at a per trailer charge. Shipper owned or leased trailers or trailers on flatcars at a charge per flatcar. Executive in Charge of Piggy-Back Development: H. E. Simmons, manager-TrucTrain sales.



SOO LINE reports MORE PROGRESS in

PIGGY-BACK

NEWEST OF FREIGHT TRANSPORTATION SERVICES

In 1960 Soo Line increased its piggy-back equipment by 40% and almost doubled its mileage in rail-van operations. Progress continues in 1960 and further expansion is under way.

Soo line now hauls piggy-back freight between Minot-Minneapolis-St. Paul and Chicago; between the Twin Cities and Duluth-Superior and between Chicago and Duluth-Superior and Minot, N. D. along with intermediate Wisconsin points. It provides regular piggy-back service on more than 1400 miles of main line in Illinois, Wisconsin, Minnesota and North Dakota.

This fast modern transportation of freight in truck-trailers riding on railway flat cars has been provided by Soo Line for nearly 4 years, with more and more shippers using rail-van service. It is dependable seven days per week.

The expanded service is speeding freight interchanged with Soo Line's many important rail connections on piggy-back shipments to and from the East, West, South and Southwest.

We offer any piggy-back plan suitable to our patrons' needs.

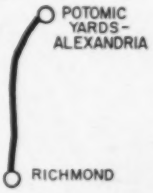
Pittsburgh and Lake Erie

The P&LE operates Flexi-Van Service under Plans 2 and 3 as part of the New York Central System. For details and map see New York Central System listing.

Quanah, Acme & Pacific Railway

Plans 2, 3, 4, and 5; Plan 2 interline with the Frisco and FW&D via Frisco—QA&P-Quanah-FW&D. Plans 3 and 4 in connection with the Frisco and ATSF via Frisco-QA&P-Floydada-Santa Fe. Plan 5 in connection with the Frisco and concurring motor carriers via Frisco-QA&P-Floydada, Texas, thence motor carriers beyond. (See St. Louis-San Francisco.) Executive in Charge of Piggy-Back Development: W. L. Richardson, executive vice president.

Richmond, Fredericksburg & Potomac



Plans 1, 2, 3, 4, 5; interline with B&O and PRR at Potomac Yard, Va.; ACL and SAL at Richmond, Va. Service with PRR and SAL applies between Kearny, N.J., and Philadelphia, Pa., on the one end and Atlanta, Ga.; Birmingham, Ala.; Miami, Fla.; and Tampa, Fla., on the other. Executive in Charge of Piggy-Back Development: W. E. Turner, vice president-traffic and industrial development. Provide transportation for van-type containers which are interchangeable with other forms of transportation. Service provided only when shipper owns containers and these can be carried on standard flatcars. Interline cars carrying containers with other railroads.

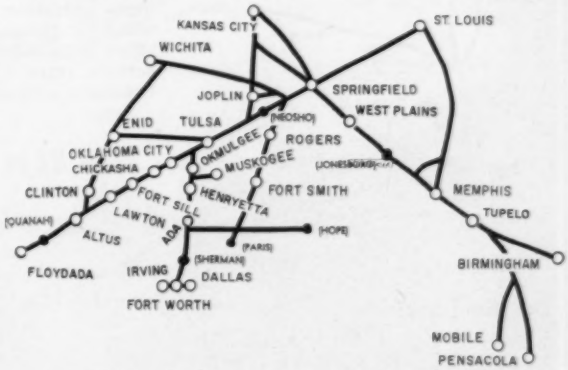
St. Louis Southwestern Railway

Plans 2, 3, 4; interline with B&LE, B&M, B&O, CB&Q, C&EI,, CRRNJ C&NW, CRI&P, C&S, CStPM&O, RDG, D&H, DL&W, Erie, FWDC, IC, L&A - KCS, LI, L&N, L&NW, LV, MKT, MoPac, M&StL, NJI&I, NKP, NL&G, NYNH&H, NYS-&W, PRR, SP, StLSF, Wabash, WM. Rail billed truckload freight at truck competitive rates. Highway common carrier freight of subsidiary company, with some rail billed lcl freight in return. Eecutive in Charge of Piggy-Back Development: G. W. Heuermann, general traffic manager.

Reading Company

Plans 2 and 3; transport empty tank trailers on flat cars; interline with AD&N, A&LM, AT&SF, CB&Q, C&NW, CRI&P, C&S, DK&S, FW&D, GC&SF, KCS, L&A, MP, Monon, M&StL, NKP, P&SF, StLSW, TNM, T&NO, T&P, UP, Wabash, WMW&MW. Rail billed truckload freight at truck competitive rates. Executive in Charge of Piggy-Back Development: J. H. Miller, Jr., manager-TOFC Service.

St. Louis-San Francisco Railway

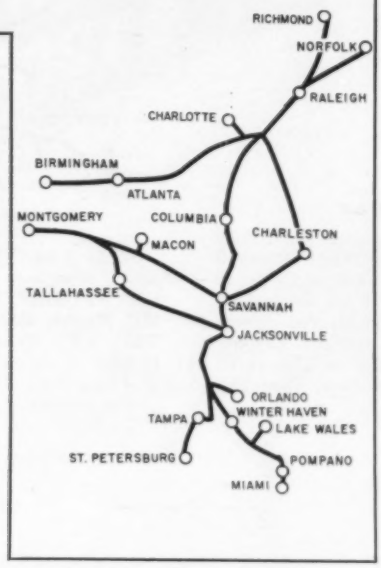


Plans 1, 2, 3, 4, 5; transport tank trailers on flatcars; interline with AT&N, ATSF, B&O, C&EI, C&NW, CB&Q, CRI&P, FW&D, GC&SF, IC, KCS, L&A, L&N, MKTT, NKP, PRR, QA&P, StL SW, Sand Springs, SP, T&P, UP, Wabash. Rail billed truckload freight at truck competitive rates. Highway common carrier freight of Frisco Transportation Co., a subsidiary company. (See also Quanah, Acme & Pacific listing.) Executive in Charge of Piggy-Back Development: W. R. Eilers, manager-TOFC sales.

When the name of a city is shown on a map without parentheses, it designates a ramp location. This city also may be an interline point. When the name of the city appears in parentheses, it means an interline point with no ramp.

Seaboard Air Line Railroad

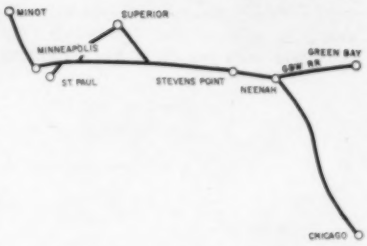
Plans 1, 2, 3, 4, 5. Plan 1 interline with PRR-RF&P between Kearny, N.J.; Philadelphia; and Charlotte, N. C.; Charleston, S. C.; Atlanta and Savannah, Ga.; and Jacksonville, Orlando, Tampa, Miami, Fla. Interline.



Western Maryland Railway

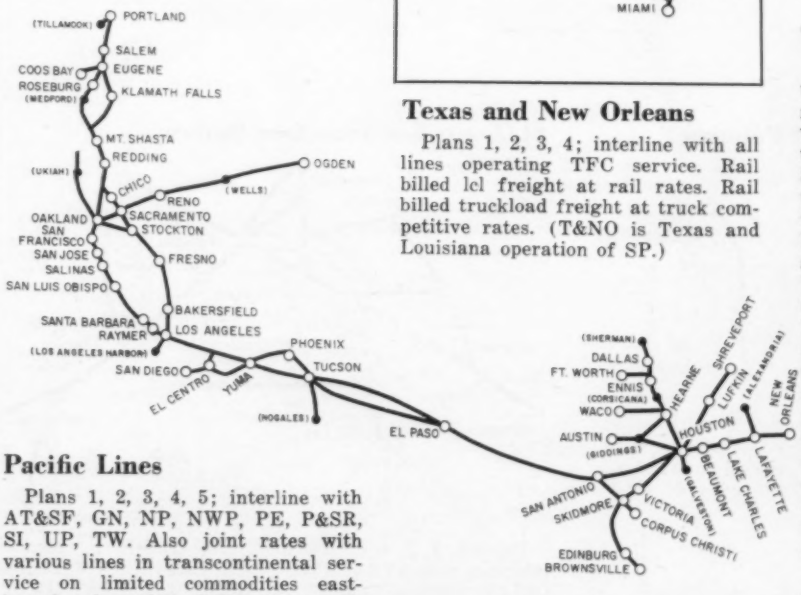
Plans 2 and 3; interline with major roads to provide service to about 1800 stations in Western Trunk Line, Southwestern Lines, and Eastern territories. Rail billed truckload freight at truck competitive rates. Executive in charge of Piggy-Back Development: William L. Weinacht, rail-truck tm.

Soo Line (MStP&SSM)



Plan 2; interline with ATSF, B&O, C&EI, CRI&P, DL&W, Erie, GN, GB&W, M&StL, Monon, NKP PRR, Wabash. Rail billed lcl freight at rail rates. Rail billed truckload freight at truck competitive rates. Executive in Charge of Piggy-Back Development: D. C. Simpson, manager - rail - van and merchandise service.

Southern Pacific Co.



Texas and New Orleans

Plans 1, 2, 3, 4; interline with all lines operating TFC service. Rail billed lcl freight at rail rates. Rail billed truckload freight at truck competitive rates. (T&NO is Texas and Louisiana operation of SP.)

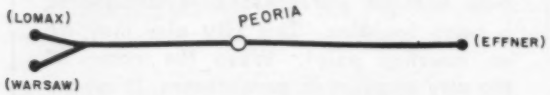
Texas & Pacific Railway

Plans 2, 3, 4, 5. Interline rates through St. Louis and Kansas City gateways in connection with MP; with all lines north thereof that have tofc service; with the IC through Shreveport and New Orleans, La.; the L&N through New Orleans; and the StSF through Memphis from limited origins in the Southeast to and from all stations on the T&P, TNM, and WMW&NW. Executive in Charge of Piggy-Back Development: M. L. Craig, manager-piggy-back sales. Provide transportation for van-type containers which are interchangeable with other forms of transportation only when the shipper owns the containers and these can be carried on standard flatcars. Through service with highway carriers; and interline cars carrying containers with other railroads. (See also Missouri Pacific listing.)

Pacific Lines

Plans 1, 2, 3, 4, 5; interline with AT&SF, GN, NP, NWP, PE, P&SR, SI, UP, TW. Also joint rates with various lines in transcontinental service on limited commodities eastbound and westbound. Transport tank trailers on flatcars. Rail billed lcl freight at rail rates at our convenience when tonnage warrants. Rail billed truckload freight at truck competitive rates. Highway common carrier trailers at a per trailer charge. Transports van-type containers which are interchangeable with other forms of transportation. Complete door-to-door service. Provide service only when the shipper owns the containers and these can be carried on standard flatcars. Interline cars carrying containers with other railroads and participate in a tariff for the movement of containerized household goods.

Toledo, Peoria & Western Railroad Co.



Plans 1, 2, 3, 4, 5; interline. Executive in Charge of Piggy-Back Development: J. R. Coulter, president.

How to Use Guide

Maps used here are not intended to be exact replicas of the official railroad maps; nor do they necessarily show the complete system for each road. They were prepared to give a general idea of the piggy-back area covered by each road, and ramp locations. Service is not restricted to ramp cities. Through substitute motor carrier service, contracts carrier arrangements, etc., most of the roads serve all or most of the off and on-line stations in their territories. Interline agreements extend the number of points served by each railroad to hundreds, and in many cases thousands. Cities in small type (parentheses) are not ramp cities.

NOW! 5 "PIGGY-BACK" PLANS BY WABASH

Fishy-Back Guide

Trailerships and containerships, already well established in service to the 49th and 50th states, also are growing in importance on other foreign trade routes. Each company's service is listed. **130**

Inland Waterway Maps

The inland waterways of the U. S. are illustrated by two maps in this section which show the major port areas along with the waterways which connect to make the system one that is handling an increasing quantity of traffic from main shipping areas. **134**

Directory of U. S. Ports

Gives ports complete with their facilities, the ship lines which use the port and its facilities, warehouses located in and near the port area, and port development groups which provide information. **136**

A limited supply of reprints of this section is available. Additional copies are available by writing to The Editor, DISTRIBUTION AGE, 56th & Chestnut Sts., Philadelphia 39, Pa., on a company letterhead.

Fishy-Back Guide

Here are the results of DA's poling of major steamship lines to find how they treat containerization in their industry and what they are doing to make it more attractive and beneficial to you the shipper

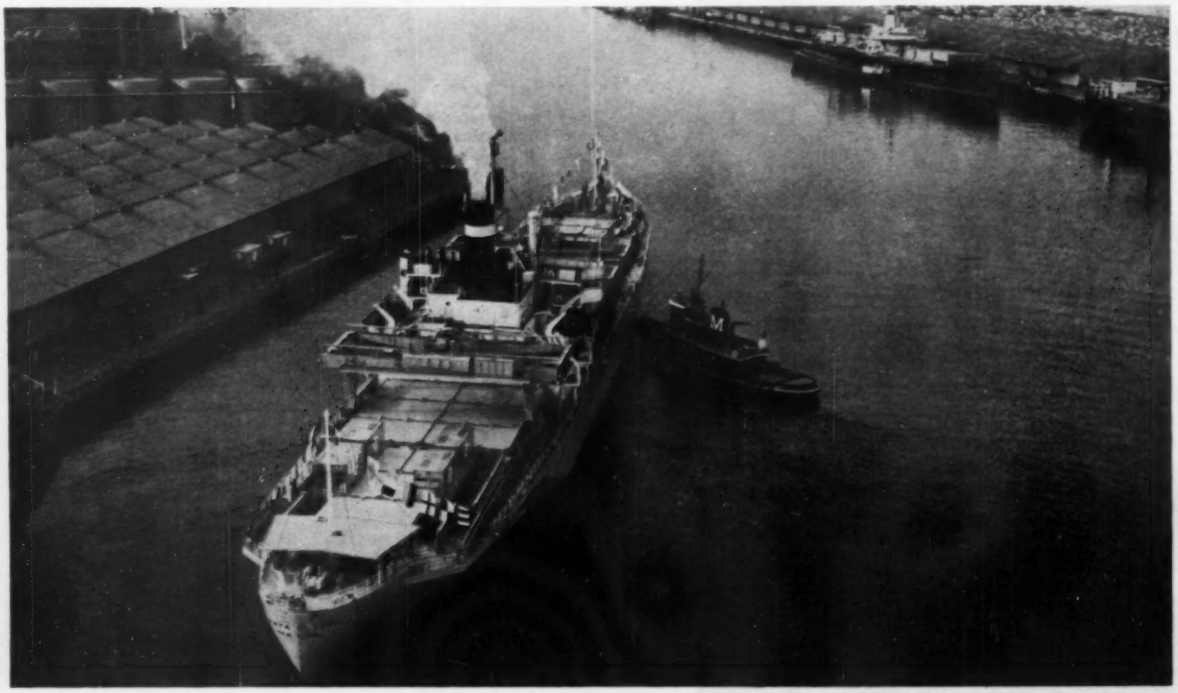
THERE has been much talk about last frontiers and undeveloped opportunities. Certainly among such virgin territory, there will crop up a storm of acceptance for fishy-back. To date, acceptance has been unspectacular, but growing nevertheless.

This Fishy-Back Guide gives DA a chance to make public tabulations from its recent survey of the major steamship lines. We tried first to discover which steamship lines provide transportation for containers or trailers which can be interchanged with other forms of transportation.

There followed a depth investigation into how the containers are handled, whether or not the company's service is of a complete door-to-door nature, and whether the trailers or containers are provided by the steamship lines, etc.

The etcetera is important. From it we find that three of the answering lines handle both trailers and containers; also that six of the lines transport household goods in containerized fashion and three of them provide a complete door-to-door service. Four of the steamship lines provide a coastwise service.

The number of lines mixing



with containerization may seem small, but when related to the problems of bringing a stable containerization program to the steamship lines the difficulty appears in true perspective. Whether the continued interest of many of the lines will be enough to eventually evolve a system remains to be seen.

In fishy-back, the containers are handled on various vessels: containerships, trailerships, below deck on regular ships, as deck cargo on regular ships—even on barges. The methods for the physical handling of the containers vary from on-ship gantry cranes to dock-side fork trucks.

The full benefits of containerization will be apparent when a unit shipment of household goods or other solids can travel across continents without the reopening and heavy documentation now necessary. Costs of handling will drop as speed of handling rises.

What are the things which hinder complete acceptance? They include things like handling arrangements and different tie-down systems. The method of handling is not an easy piece of pie to dish. Hooks, overhead cranes with spreader bars, straddle carriers, fork trucks are some of the means considered and used. The details are graphically illustrated in this section. ●

Fishy-Back Guide . . .

(Continued from Preceding Page)

Alaska Steamship Co.

Transports containers and trailers which can be interchanged with other forms of transportation. Handled as deck cargo on regular ships. Provide trailers and containers for this. Coastwise service. Transports loaded trailers and containers belonging to owners of cargo. Transports household goods overseas in containers loaded at the shipper's residence. Through service under one bill-of-lading for door-to-door transport of general merchandise in cooperation with Alaska Railroad, also truck-lines.

American President Lines

Provides transportation for containers which can be interchanged with other forms of transportation. Handled on containerships, below deck on regular ships, as deck cargo on regular ships. Provides containers. Coastwise container service. Transports loaded containers which belong to the owners of the cargo. Transports household goods overseas in containers loaded at shipper's residence.

Traffic Women Aid Charity

Miss Esther Schabacker (left) of Associated Transport, Inc., chairman of the Ways and Means Committee of the Women's Traffic Club of New York, is shown presenting a $908.13 check to Mrs. J. Truman Bidwell of the New York Arthritis and Rheumatism Foundation. The traffic women raised the amount at their Straw Hat luncheon and card party

Erie & St. Lawrence Corp.

Provides transportation for containers and trailers which can be interchanged for inland transportation. Handled on combination container and trailer ship. Provides trailers and containers for the service. Transports containers and trailers belonging to shippers, also containers and trailers of others. Provides complete door-to-door container service including pick-up and delivery with coastwise container and trailer service. Transports loaded trailers and containers owned by the owners of the cargo. Transports household goods overseas in containers loaded at shipper's residence. Has service under one bill-of-lading for door-to-door transport of general merchandise in cooperation with highway common carriers.

Grace Line, Inc.

Provides transportation for containers which can be interchanged with other forms of transportation. Handled on containerships and below deck on regular ships. Provides containers for the service. Complete door-to-door container service including pick-up and delivery. Transports loaded containers which are owned by owners of cargo. Transport household goods overseas in containers loaded at shipper's residence.

Gulf-Canal Lines, Inc.

Provides transportation for trailers which can be interchanged with other forms of carriage. Handled on trailerships and barges. Provides trailers for this service and transports trailers belonging to shippers. Has complete door-to-door container service including pick-up and delivery. Provides coastwise trailer service. Offers inland waterway transport of trailers performed as substitute services for motor common carriers. Through service under one bill-of-lading for door-to-door transport of general merchandise in cooperation with all connecting common carrier truck lines.

Matson Navigation Co.

Provides transportation for containers and trailers which can be interchanged with other forms of transportation. Trailers are skeletal chassis (detachable). Handled on containerships and as deck cargo on general cargo ships. Trailers and containers provided. Service includes pick-up. Transports loaded trailers and containers which are owned by owners of cargo if they meet Matson specifications.

Panama Steamship Line

Provides transportation for containers which can be interchanged with other forms of transportation. Handled below deck on regular ships. Provides containers for this service. Transports loaded containers which are owned by the owners of the cargo. Transports household goods overseas in containers loaded at shipper's residence.

United Fruit Co.

Provides transportation for containers which can be interchanged with other forms of transportation. Handled below deck on regular ships. Provides containers for this service. This container service is on a limited basis.

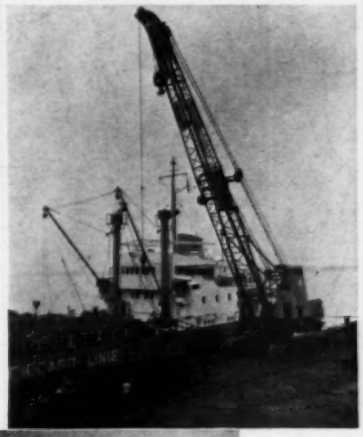
United States Lines

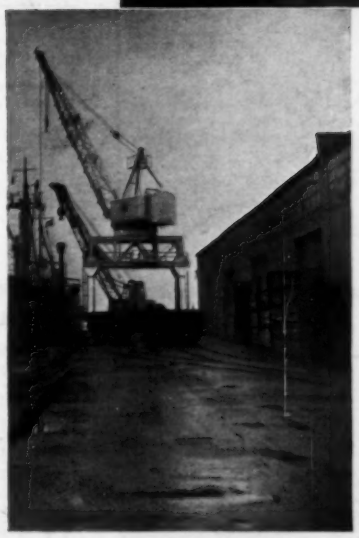
Provides transportation for containers which can be interchanged with other forms of transportation. Handled below deck on regular ships. Provides containers for this service. Transports loaded containers which are owned by owners of cargo. Transports household goods overseas in containers loaded at shipper's residence.

All Containers on Deck

With present deck gear and booms, the Bull Lines has installed a manual-semi-automatic system of spreaders for deck-loading of containers. The containers used in the operation have special corner castings. The fittings lock the containers to the deck. National Malleable and Steel Castings Co. makes the system

Port Gets Equipment



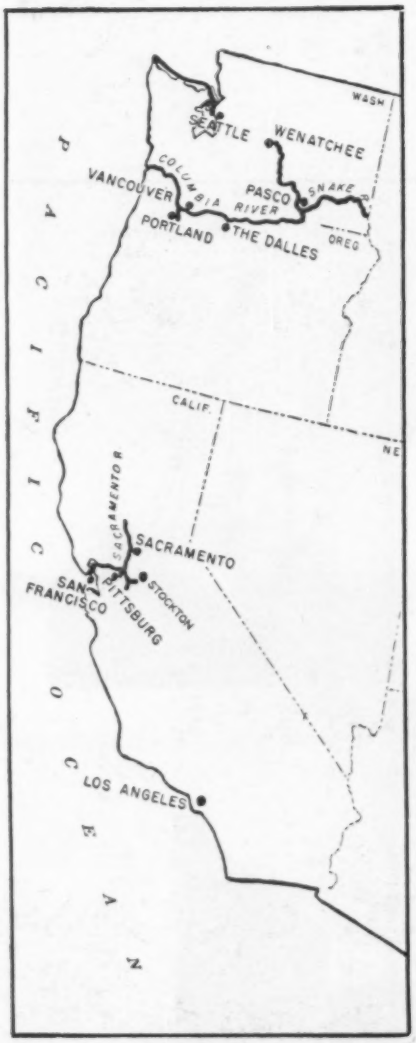


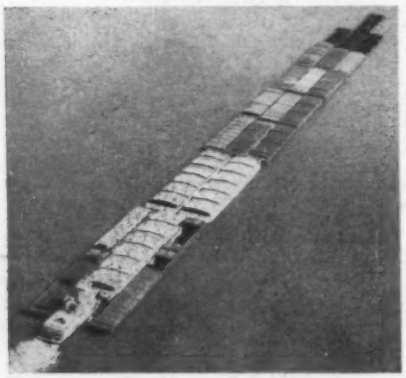
Among new equipment now in use at the Port of Erie are a crawler-type crane and a traveling gantry crane. The 140-ton heavy-lift crawler crane has a 120-ft high boom. The 30-ton traveling gantry crane is electric and travels along the Port's shipside apron

Push-Type Diesel Towboat

The Rockland County is the first modern push-type towboat especially designed for the Hudson River. The twin-screw Dravo Corp.-designed vessel will move barge tows of crushed stone from quarries along the Hudson to New York Harbor. It was built for the Cornell Steamboat Co.

Inland Waterways





NAVIGABLE LENGTHS AND DEPTHS[1] OF UNITED STATES INLAND WATERWAY ROUTES

GROUP	Length in Miles of Waterways					
	Under 6 ft.	6 to 9 ft.	9 to 12 ft.	12 to 14 ft.	14 ft. and over	Total
Atlantic Coast Waterways (exclusive of Atlantic Intracoastal Waterway from Norfolk, Va., to Key West, Fla.) but including New York State Barge Canal System.	1,563	1,445	589	965	1,241	5,803

Grand Total	9,399	4,576	8,008	4,302	2,711	28,996

1 Generally, the mileages are shown by authorized depths. In those instances where no authorized depths were assigned to the waterways, the controlling depths are used. "Authorized Depths" mean depths authorized by the Congress of the United States in legislation authorizing the improvement of waterways.

Source: Based on tabulation of "Mileage of United States Waterways Authorized for Improvement and Improved by the Corps of Engineers", issued June 30, 1952 (latest available) by the Board of Engineers for Rivers and Harbors, Corps of Engineers, United States Army.

TRAFFIC TRANSPORTED ON INLAND WATERWAYS OF U. S. (EXCLUSIVE OF GREAT LAKES), FOR CALENDAR YEARS SHOWN

Year	Net Tons of 2,000 Pounds [1]	Ton-Miles
1931	179,735,000	9,233,369,320
1940	366,835,582	22,411,961,000
1950	[2] 297,694,832	51,656,637,000
1954	[2] 319,780,826	82,503,839,000
1955	[2] 362,555,910	97,662,567,000
1956	[2] 384,097,615	109,313,274,000
1957	[2] 391,889,975	114,561,469,000
1958	366,493,823	109,131,151,000

1 Figures are after elimination of known duplications resulting from reporting of identical shipments over two or more waterways except that the figures for 1947 and subsequent years represent originated traffic.

2 Figures for 1947 and subsequent years appear low as compared with those of previous years for the reason that the traffic for 1947 and subsequent years was compiled by the Corps of Engineers for Rivers and Harbors under a new statistical system with mechanical tabulating processes which analyzed the traffic and eliminated duplications more thoroughly than in the years prior to 1947.

of the United States

Directory of U.S. Ports

Listed below are the centers of U. S. import and export commerce. For each there is a list of facilities, ship lines, warehouses, and promotion groups. These groups will supply additional data

Port of Baltimore

Baltimore's imports totalled 16,721,786 tons in 1958. Her exports totalled 5,702,-678 tons. There were 6597 sailings.

PIERS AND FACILITIES—32 covered and open piers and facilities for loading and/or unloading 90 vessels. 12 piers and wharves for vessels in coastwise trade and for storage.

Public Ore Piers are B&O, Curtis Bay; Canton RR Cottman Pier, Lower Canton; PRR, Lower Canton; WMRwy., Port Covington. Coal Loading Piers are B&O, Curtis Bay; B&O, Locust Point; PRR, Canton; WMRwy., Port Covington.

Grain Elevators are B&O, Locust Point (3,880,000 bu); PRR, Lower Canton (4,-000,000 bu); WMRwy., Port Covington (4,880,000 bu). Fruit Piers B&O United Fruit Co. pier.

Heavy lift pier, B&O Crane Pier, Locust Point (1). Privately Owned Terminals: Rukert Terminals Corp., 1409 Thames St., Baltimore 31. Belt's Wharf Warehouses, Inc., 936 Fell St., Baltimore 31.

SHIP LINES—ANP Line, Alcoa Steamship Co., American & Australian Lines, American & Indian Line, American Export Lines, Inc., American Pioneer Line, American President Lines, American Republics Line, American Scantic Lines, Anchor Line, Ltd., Argentine State Line.

Baltimore Steam Packet Co. (Old Bay Line), Barber Line, Barber West African Line, Baron-Iino Line, Belgian African Line, Belgian Line, Bermuda Line, Black Diamond Lines, Booth Line, Bristol City Line, Thos. & Jno. Brocklebank, Ltd. (Cunard), Brodin Line, Bull Insular Line.

C.T.O. Line, Calmar Line, Caribbean Line, Central Gulf Lines, Chargeurs Reunis, Chilean Line, Coldemar Line, Columbus Line, Compania Espanola de Navegacion Maritima, S.A., Concordia Line, Cosmopolitan Line, Crescent Line, Cunard Steam-Ship Co., Ltd.

Daido Line, Daido-Mediterranean Line, De La Rama Lines, Dodero Lines.

Eckert Line, Elder Dempster Lines, Ltd., Fabre Line, Farrell Lines, Inc., Fern-Ville Mediterranean Lines, Finland Steamship Co., Ltd., Finnlines, French Line. Grace line, Grancolombiana, Ltd.

Hamburg-American Line, Hansa Lines, Head Line & Lord Line, Hellenic Lines, Ltd., Holland-America Line, Holland-Interamerica Line.

Iino Lines, Irish Shipping, Ltd., Isbrandtsen Co., Inc., Isthmian Lines, Isthmian-Matson Joint Service, Ivaran Lines.

Java-New York Line, "K" Line, Khedivial Mail Line, Lamport & Holt Line, Lloyd Brasileiro, Maersk Line, Mamenic Line, Manchester Liners, Ltd., Mexican Line, Meyer Line, Mitsubishi Line, Mitsui Line, Moore-McCormack Lines, Inc.

Naviera Commercial Aspe, S.A., Nedlloyd Line, N.Y.K. Line, Norfolk, Baltimore & Carolina Line, North German Lloyd, Norton Line, O.S.K. Line.

Peninsular & Occidental S.S. Co., Philippine National Lines, Polish Ocean Line, Pope & Talbot Line, Port Line, Ltd., Prince Line, Ltd., Prudential Lines. Quaker Line. Robin Line, Royal Netherlands.

Scandinavian-American Line, The Scindia Steam Navigation Co., Ltd., Seven Stars (Africa) Line, Shinnihon Line, South African Marine Corp., Southern Cross Line, Spanish Line, Stevenson Lines, Swedish American Line & Swedish.

Transatlantic Line, Thorden Lines, Torm Lines, Turkish Cargo Line. United Fruit Co., United States Lines. Vacuba Line, Venezuelan Line, Viking Line.

Ward Line, West Coast Line, Weyerhaeuser Line, Wilhelmsen Line, Wilson Line. Yamashita Line, Yugoslav Line. Zim-Israel American Lines.

PUBLIC MERCHANDISE WAREHOUSES—Baltimore Bonded Warehouse Co., Hillen & Exeter Sts., 2; Belt's Wharf Warehouses, Inc., 936 Fell St., 31.

Inc., 340 Rutherford Ave., 29; Remy Moving & Storage Corp., 727 Shawmut Ave., 19; Service Warehouse Co., 31 Lewis Wharf, 10; Standard Storage Co., 108 Holton St., 35; Suffolk Storage Warehouse Co., 100 Northampton St., 19.

Wiggin Terminals Inc., 50 Terminal St., 29; Commonwealth Ice & Cold Storage Co., 220 Northern Ave.; Quincy Market C. S. & Whse. Co., 173 Atlantic Ave., 10.

PORT DEVELOPMENT GROUPS—Massachusetts Port Authority, 14 Court Sq., Boston, Mass., and Greater Boston Chamber of Commerce, 125 High St., Boston, Mass.

Port of Buffalo

Buffalo is one of the largest Great Lakes ports whose volume of waterborne commerce has been steadily increasing until it now averages over 23 million tons annually.

PIERS AND FACILITIES—74 piers and wharves. Niagara Frontier Port Authority owns and administers the Municipal Piers, operated by Seaway Cargo Handlers, Inc. for bulk storage; the Templeton Terminal; and the Buffalo Port Terminal. Switching railroads are the Buffalo Creek RR and the South Buffalo Ry. Line-haul railroads are the B&O, Erie, LV, DL&W, NYC and PRR. The PRR owns a coal, iron ore and limestone dock and the B&O and DL&W own coal wharves.

SHIP LINES—Bristol City Line Steamships, Ltd., Canadian Pacific-Great Lakes Steamship Service. Fabre Line, Finlake Line, Fjell-Fjord Lines, Fjell-Oranje Line, French Line, Furness Great Lakes Line.

Grace Line. Hamburg-American Line, Hapag Lloyd. Liverpool Liners, Ltd. Manchester Liners, Ltd., Montship-Capo Great Lakes Service.

Niagara Lines, Norton Lilly Company. Saguenay Terminals, Stag Line, Ltd., Swedish-American Line, Swedish-Chicago Lines. Wallenius Line.

PUBLIC MERCHANDISE WAREHOUSES—American Household Storage Co., 305 Niagara St., 1.

Bison Storage & Warehouse Corp., 1502 Niagara St., 13; Buffalo Merchandise Warehouses, Inc., 261 Great Arrow Ave., 7; Buffalo Port Terminal, operated by International Terminal Operating Co., Inc.

O. J. Glenn & Son, Inc., 204 Terrace, 2; Grant Terminal Warehouse Co., Inc., So. Park Ave. & Indiana.

Kencroft Warehouse, Div. Kencroft Malleable Co., Inc., 373 Hertel Ave., 7; The Keystone Warehouse Co., 541 Seneca St., 4; Knowlton Warehouse, Inc., 32 Mississippi St., 3.

Larkin Warehouse, Inc., 189 Van Rensselaer St., 15; Laub Warehouse, 1051 Clinton St., 6; Lederer Terminal Warehouse Co., Niagara Frontier Food Terminal, 6; Lincoln Carting, Inc., 69 Leddy St., 10; Lincoln Storage, 1109 Niagara.

Merchants Refrigerating Co., 975 Fuhrmann Blvd., 5.

National Terminal & Refrigerating Corp., 197 Scott St., 4. Plymouth Ave. Carting & Moving Co., 33 Plymouth Ave. Rogers Carting & Storage Co., 3612 Main St., 14.

Seneca Warehouse & Industrial Center, Inc., 701 Seneca St., 10. Wilson Warehouse, Inc., 290 Larkin St., 10.

PORT DEVELOPMENT GROUPS—Niagara Frontier Port Authority, John A. Ulinski, exec. dir., 432 City Hall, Buffalo 2, N. Y., Ph. MOhawk 4200.

Port of Chicago

Chicago's port facilities are at three different locations: Navy Pier and North Pier Terminal at the mouth of the Chicago River in Chicago Harbor; Chicago Regional Port District at Lake Calumet; and International Steamship Terminals, Inc., at Calumet River and 95th St. Bridge.

PIERS AND FACILITIES—Navy Pier has dock cranes and 1700 ft of berthing. It is on the C&NWRy. North Pier Terminal has 600 ft of berthing, a 15-ton crane, and dock cranes. It is on the ICRR.

The Chicago Regional Port District provide for 6700 ft of berthage at three transit sheds and a backup warehouse. These facilities are operated by the Calumet Harbor Terminals, Inc., North Pier Terminal and Seaway Stevedoring Company, Inc. The CRI&PRR serves this harbor. Two grain elevators with a capacity of 13 million bushels provide space for berthage up to 729 ft. There is also a crane available at Lake Calumet to handle lifts up to 110 tons. This crane is barge mounted.

International Steamship Terminals, Inc., at the Calumet River and 95th St. Bridge has 1050 ft of berthing. It is served by the Chicago Short Line Ry. Co.

SHIP LINES — Adriatic Canada Great Lakes Line, American Export Line. Bristol City Line. Canadian Pacific Steamships, Concordia Line, Crescent Line, Cunard Line.

Ellerman Line. Fabre Line, Fjell Line, Fjell & Fjord Lines, French Line, Furness Great Lakes Line.

Hamburg American Line, Hamburg Chicago Line, Head Line. Hellenic Lines, Hycar Line. Irish Shipping. Lakes Continental Lines, Liverpool Liners. Manchester Liners, Michigan Ocean Line, Midwest Mediterranean Line, Midwest Oceanic Line, Montship-Capo Line. Nedlloyd Line, Niagara Line, Nordlake Line, North German Lloyd.

Oranje Line, Orient Mid-East Great Lakes Service. Poseidon Line. Ernst Russ Line. Swedish American Line, Swedish Chicago Line. Transcaribbean Line. Zim Israel Line.

PUBLIC MERCHANDISE WAREHOUSES—Anchor Storage Co., 251 E. Grand Ave., 11.

Bly Storage Co., 7634 So. Halsted St., 20. C & A Terminal Co., 3636 So. California Ave., 32; Calumet Harbor Terminals, Inc., 12800 Calumet Harbor Dr., 33; Calumet Industrial District Co., 1501 E. 96th St., 19; Central Cold Storage Co., 350 No. Dearborn St., 10; City Products Corp., 33 S. Clark St., 3; Crooks Terminal Warehouses, Inc., 433 W. Harrison St., 7; Currier-Lee Warehouses, Inc., 427-73 W. Erie St., 10.

Don Building Corp. Warehouse Div., 500 W. Cermak, 16; Equipment Storage Corp., 7446 S. Ashland Ave., 36; Expressways Terminals, Inc., 361 N. Sangamon St., 7.

PORT OF BUFFALO—Economical Gateway to the Heart of Industrial America!

Here is the Great Lakes - St. Lawrence Seaway port that's best situated and equipped to receive the world's goods and cargoes . . . store them or tranship them . . . distribute them throughout the heartland of America that lies within the 500-mile radius so adequately served by rail, plane and truck transportation.

Find out the advantages . . . time savings and money savings . . . when you ship to, or from, the Port of Buffalo.

New Deep-Water Port Facilities

Buffalo's newly developed Port Terminal now offers the Great Lakes' most modern and accommodating facilities of all types of cargo. Dock slips are 25 feet deep; adjacent warehouse space available for all types of storage; direct ship-rail, ship-truck, cargo transfer.

Write for literature or a personal call from a representative.

Port of Cleveland

The harbor consists of the outer harbor and an inner harbor. The outer harbor has been formed by the means of some 5½ miles of breakwater. It has a minimum channel of 22 ft. The Pennsylvania, New York Central, Erie and Baltimore & Ohio Railroads own their own docks.

The inner harbor consists of the Cuyahoga River and its old channel, now known as the "old river bed."

SHIP LINES—Orient Mid-East Line.

PORT DEVELOPMENT GROUPS—Board of Commissioners, Walter F. Rayburn, executive general agent, 2 Canal St., New Orleans. Ph: JAckson 2-2551.

Port of New York

In 1959, 59.3 million tons of freight moved by rail into, out of, and through the Port of New York. Of this tonnage, 46.1 million short tons moved into and out of the Port. Six million short tons moved through New York as a gateway for rail interchange, and 17.2 million short tons were transshipped between rails and vessels. In a normal year, 35 million tons of foreign trade moves into and out of New York by vessel.

PIERS AND FACILITIES—A total of 200 piers provide approximately 400 vessel berths including 310 general cargo, 33 specialized and 53 tanker cargo berths along the port's 650 miles of navigable waterfront. Channels are dredged to a minimum of 35 ft throughout most of the port.

Port operations are serviced by 11 railroads, 170 steamship lines and over 300 motor truck carrier companies whose 10,000 long-haul trucks serve the Port District daily. Over 100 floating and stationary heavy-lift derricks and a fleet of 4000 tugboats, carfloats, lighters, and barges provide further essential services.

A Free Foreign Trade Zone consisting of 92 acres of waterfront terminal and storage area located at Stapleton, Staten Island, allows for the importation of any lawful merchandise immune from customs duty until such time as the material is transported to customs territory.

Marine terminal facilities operated by The Port of New York Authority contain 25 per cent of the piers in the New York-New Jersey Harbor. An additional 45 per cent of the general cargo pier facilities are owned by the City of New York, with the remainder owned and operated by private interests.

Work in progress and firm plans of various Port of New York interests provide for an additional investment exceeding $300 million for marine terminal construction within the next few years.

Recently completed terminals for the handling of orange juice, wine, newsprint and bananas have incorporated the latest technological advances in cargo handling methods. Facilities for the handling of grain are provided by a 1,800,000-bu capacity terminal operated by the New York Central System. In addition, the port also has six floating grain elevators.

The Port of New York offers warehousing space to meet any specific need. There are more than 200 public storage units in the Port District. There are 162 general merchandise warehouses providing 18,400,000 sq ft of storage space. Twenty cold storage warehouses have a total capacity of 32,893,000 cu ft.

Railroad-operated facilities, deep-sea facilities operated by the railroads include Central Railroad of New Jersey Pier 7, Jersey City, N. J.; Erie Railroad Pier B, Weehawken, N. J.; Lehigh Valley Claremont Terminal, Jersey City, N. J.; and New York Central System Pier 9, Weehawken, N. J. There are also over 100 railroad-operated or leased auxiliary facilities including freight stations, lighterage piers, produce terminals, carfloat terminals and coal tipples.

Philadelphia and Delaware River Ports

The Port of Philadelphia principal export tonnage for 1959 totaled 2,453,309 short tons. Principal import tonnage for 1959 totaled 44,124,697 short tons.

PIERS AND FACILITIES—Marine Terminal facilities of the Port extend along the right shore of the Delaware River from a point near the mouth of the Schuylkill River northward for a total distance of approximately 22 miles. There are facilities on both banks of the Schuylkill River for a distance of 7.3 miles above its mouth. Within these two stretches there is a total of 169 piers, wharves and docks. Twenty-five terminals handle general cargo in foreign, intercoastal, and coastwise trade.

Bulk handling facilities for the handling of petroleum, bulk sugar, gypsum, and iron ore are situated on both sides of the river and in many cases are private facilities.

In addition to the ordinary equipment to handle miscellaneous general cargo the port area has excellent heavy-lift facilities available for pieces of extraordinary size or weight. The port also has available floating heavy-lift equipment which can lift pieces up to 150 tons. There is in the port a fixed 350 ton capacity crane, one of the largest on the Atlantic Seaboard which can be secured by special permission from the Philadelphia Navy Yard.

The right equipment...

...sure we have the "equipment" but that's only half the story. Portland Harbor has "everything"... facilities, know-how and easy access to one of America's richest markets. And Portland Public Docks are under centralized management which saves shippers dollars and days. Look to Portland, the livewire port that wants your cargo and knows how to serve it!

Port of Savannah

The Port of Savannah handled over four million tons of foreign and domestic commerce in 1959. There are four deep-water terminal facilities. Savannah State Docks and Warehouses-Garden City Terminal, Savannah State Docks and Warehouses-Ocean Terminal, Stevens Shipping Co., and Atlantic Coast Line Railroad Co. Channel depths are 34 ft. m.l.w. from the ocean to the Garden City Terminal and 30 ft. to the upper limit of the harbor. Between Savannah and Augusta, Ga., for a distance of approximately 188 miles there is a 9 ft. m.l.w. channel.

Five Railroads serve the city, Atlantic Coast Line Railroad Co., Central of Georgia Railroad Co., Seaboard Air Line Railroad Co., Savannah and Atlanta Railroad Co., and Southern Railroad Co. Highway access is principally by U. S. 17, the Coastal Highway, and U. S. 80 a transcontinental route.

PORT DEVELOPMENT GROUPS—Seattle Port Commission, Howard M. Burke, general manager, Pier 66, Seattle, Wash. Phone: MA 2-8124.

Port of Toledo

Toledo has a natural harbor with a straight channel about 23 miles long, a width of 500 ft and a controlling depth of 25 ft. There are 17 miles of frontage for port activity.

PIERS AND FACILITIES—Terminal facilities are available for bulk and general cargo handling. Three railroads maintain coal dumping and ore unloading machinery at their docks. The port has a large merchant pig iron plant and is a large volume shipper of grain and petroleum coke. Toledo is served by 12 railroads, one of which connects all by a complete belt system. Six airlines and over 120 trucking companies serve Toledo.

SHIP LINES—American Export Line. Bristol City Line. Canadian Pacific Line, Concordia Line-Great Lakes Service, Crescent Line. Ellerman Great Lakes, Ellerman's Wilson Line Ltd.

Fabre Line, Fjell-Oranje Line (Continental Service), Fjell-Oranje (United Kingdom Service) Fjell-Fjord Line, French Line, Swedish American, Furness Great Lakes Line. Hamburg-American (North German Lloyd, Hapag-Lloyd), Hamburg-Chicago, Head Line, Hellenic Lines Ltd. Ino Lines, Isbrandtsen Line.

Liverpool Liners, Manchester Liners Ltd., Mediterranean Star Line, Michigan Ocean Line, Ltd., Montship CAPA, Niagara Line, Nordlake Line. Orient Mid-East Line. Poseidon Lines. Saguenay Shipping Ltd., States Marine Isthmian Line, Swedish-American Line, Swedish-Chicago Line. Wallenius, Zim.

TRANSPORTATION

Is a warehouseman's lien superior to a mortgage or conditional contract that is not lawfully recorded?

A majority of higher courts hold that if a mortgage or conditional sale contract on merchandise is not lawfully recorded, and the warehouseman has no knowledge that the mortgage or conditional contract existed, the warehouseman's lien is superior to the lien of the mortgage or conditional sale contract.

For example, in S—— v. A——, 79 S. W. (2d) 570, it was shown that a buyer purchased equipment and paid only a portion of the purchase price. He signed a conditional contract of sale which gave the seller the right to repossess the equipment if he failed to pay the installment payments when due and in accordance with the terms of the contract. However, this conditional contract of sale was *not* recorded, as required by state statutes.

The owner of the equipment stored it with a bailee, or warehouseman, named J——. In the meantime, the seller assigned the conditional contract of sale to a finance company. As the owner of the equipment had failed to pay the payments when due, the finance company sued to recover possession of the equipment on the grounds that its rights under the conditional contract were superior to J—— lien for storage and similar charges.

It is interesting to know that the higher court held the bailee's lien to be superior, and said:

"J—— (bailee) had neither constructive nor actual knowledge of this outstanding conditional sale contract.....It clearly appears that J—— had never heard that a conditional sale contract was in existence or that any title or lien of any nature was outstanding in favor of the finance company....."

Another example of this law is found in the case of W——, 224 N. Y. S. 71. Here a warehouseman had accepted two mortgaged articles for storage. The mortgage on one of the articles was recorded, but on the other it was not recorded. The holder of both these mortgages notified the warehouseman that he intended to foreclose the mortgages.

In subsequent litigation, the higher court held the warehouseman entitled to *full payment* of the storage charges due on the article on which the mortgage was *not* recorded, and held that the warehouseman was entitled to payment for storage charges on the other article from the date the notice sent by the mortgage holder was received by the warehouseman.

Other higher courts have established law, as follows: If the warehouseman knows when he accepts merchandise for storage that it is mortgaged, he should have the holder of the mortgage sign a written contract in which the latter obligates himself to pay the charges, if the mortgagee fails to do so. If the warehouseman fails to make this written contract, or have witnesses to testify that the mortgagor promised to pay storage charges on the merchandise, it is unlikely that he can recover any storage charges whether or not the mortgage is properly recorded because the warehouseman's knowledge that stored goods are mortgaged equals a recorded mortgage.

Buffalo Terminal Opens

A new 32-door terminal opened recently in Buffalo, N. Y. Owned and operated by Wilson Freight Forwarding Co., the terminal serves the Buffalo-Niagara Falls area on a 24-hour basis

For comparison, see the leading case of S—— T—— & S—— Co. v. R—— S—— Corp., 58 F. (2d) 511.

The facts of this case are that a man named C—— purchased certain household goods under a conditional sales contract, in which C—— acknowledged the receipt of the goods, and agreed that he would not remove them from their present location without the permission of the seller. This contract was properly acknowledged and duly recorded.

Soon afterward C—— stored the goods with S—— T—— and S—— Co. When C—— failed to pay the balance due on the furniture, the seller demanded that the warehouseman turn over the stored goods to him. The storage company declined to surrender the goods without payment of due storage charges. The seller filed suit. The higher court held the seller entitled to recover possession of the goods without paying storage charges.

For further comparison, see C—— Co. v. A—— Co., 177 N. E. 217. Here it was disclosed that certain merchandise was stored in a warehouse. Later it developed that the merchandise was heavily mortgaged. The holder of the recorded mortgage filed a replevin suit to obtain possession of the merchandise. Litigation developed over the question whether or not the warehouseman lost his right to a lien and, also, whether the warehouseman's lien was superior to the chattel mortgage.

Although the mortgage was prior to the warehouseman's lien, the court held the warehouseman entitled to a lien to receive payment of his storage charges after the mortgage was satisfied. This court said:

"If the holder of a chattel mortgage in a replevin action secures possession of the property, that fact cannot deprive the artisan (warehouseman) of his claim to a lien for work and labor expended. His (warehouseman's) lien is not destroyed by the removal of the chattel property from his possession without this consent. . . ."

Warehouse SPOTLIGHT

Venn Acquires Interest in SWT

The new general manager of the Springfield Warehouse and Transfer Co., Inc., Springfield, Mo., John E. Venn, has acquired an interest in the company. The company, which also appointed Venn vice president and director, specializes in pool car and pool truck distribution and storage in transit.

Williamson Re-Elected to Top Position of NCA at Convention

R. B. Williamson was recently re-elected president of the National Cartage Associates, Inc. He is secretary-treasurer of Texas Express Co., Dallas.

Other cartagemen elected to office were Forrest R. Wilkerson, Jr., Dixie Cartage and Warehousing, Inc., Charlotte, N. C., vice president, and A. Joseph Garner, Central Storage and Transfer Co., Harrisburg, Pa., secretary and treasurer.

—DA—

Men in the Spotlight

Howard M. Hay—elected vice president, Affiliated Warehouse Companies, Inc., and Affiliated Cold Storage Companies, Inc.

George Orlowski — named general eastern sales manager, Associated Warehouses, Inc.

U. S. Intra-Migration Seen As Mover Releases Tabulations

Figures based on transcontinental movements charted by one of the nation's largest movers show a depreciation in the westward movement and a flurry of moves into the Washington, D. C., area.

Aero Mayflower Transit Co., Inc., tabulations record that while household movements to 10 western states have slowed, almost 30 per cent more families are moving into the District of Columbia, Maryland, and Virginia than were emigrating in April, May, and June of this year.

California took the lead over its main competition, Florida and Arizona, in the percentage of families moving in against those moving out; but not enough to halt a slowdown in migration westward.

New Warehouse Wing

Construction has begun on a new wing for Ohio Warehouses, Inc., Columbus. It will increase overall size by 50 per cent. The 100,000-sq ft addition will have a modern heating system, cooler storage space, and dock doors for an additional five freight cars and 10 trucks

AMI Holds First Annual Meeting, Elects Alfred Crowe President

Some 100 members attended the first Annual Meeting of the American Movers Institute, Inc., recently. They met to choose a full slate of officers and elected Alfred E. Crowe president.

Serving with Crowe, who is with Vet Vans of Virginia, are H. C. Owings, Jr., Trans-Vans, Inc., Norfolk, Va., vice-president; Lee J. Sloan, Sloan's Moving and Storage Co., St. Louis, Mo., secretary; and John Bittenbender, American Storage Co., Washington, D. C., treasurer.

During his address to the gathering, President Crowe disclosed that AMI membership has passed well beyond the 750 mark. He predicted that by the time the 1961 Convention convenes, AMI will have more than 2000 members on its rolls.

Another speaker before the three-day convention was the executive director of the National Furniture Warehousemen's Association, Donald R. Markham. He covered containerization and based his remarks on his association's continuing study of containerization. Markham suggested that movers be wary not to "stampede toward a system which is as yet unproven."

Along with Crowe, Owings, Sloan, and Bittenbender, the following were elected as regional trustees: C. W. Kearsley, Suffolk Storage Warehouse Co., Boston; E. Harold Tolbert, Capitol Van Lines, Inc., Washington, D. C.; Albert A. Friedel, Lincoln Moving and Storage Co., Cleveland; V. D. Morgan, V. D. Morgan Van Service Co., Louisville, Ky.; and D. L. Wigington, O. K. Transfer Co., Lawton, Okla. Also, Harry Berman, Amick Transfer and Storage Co., Denver; William E. Hibbitt, Lawrence Moving and Storage Co., Sacramento; and Walter C. Sullivan, J. J. Sullivan The Mover, Inc., Springfield, Mass.

Others include Bruce Bolinger, Boweil Storage and Transit Co., Cincinnati, Ohio; L. P. Donnelly, Continental Van Lines, Inc., Birmingham, Ala.; E. H. White, Topeka Transfer and Storage Co., Topeka, Kan.; W. N. McKinney, American Transfer and Storage

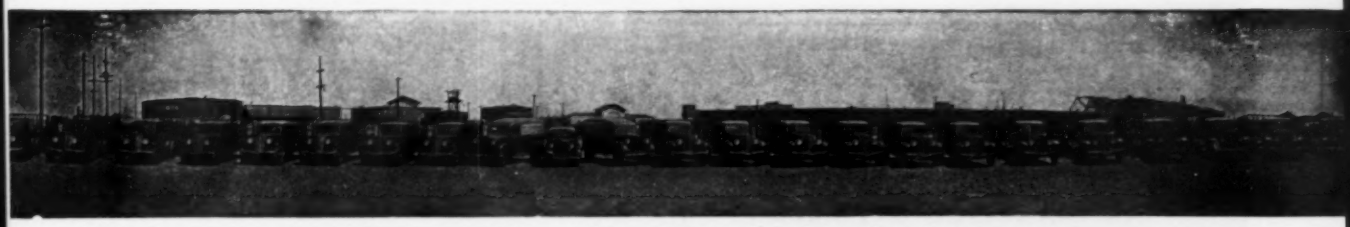
SAN FRANCISCO

VITAL CENTER OF PACIFIC COAST DISTRIBUTION

South End's California warehouse, or main building, at 625 Second Street, contains the general offices. Their Terminal warehouse (not shown here) is located at 660 Third St. All South End's properties are near all railroad depots and steamship docks.



King and Company, drayage division, operates a great fleet of trucks, to meet the requirements of South End's merchandise handling problems. Models range from light delivery trucks to ten-ton jobs.

American Warehouse, 699 Second Street, which contains offices for manufacturers' representatives, also provides an inside spur track, loading platform, driveway and garage. Yard space and paved parking lot is situated between these two buildings.

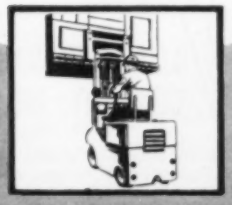
TWO STRATEGIC CHICAGO LOCATIONS

MORE FACILITIES TO BETTER SERVE YOU...

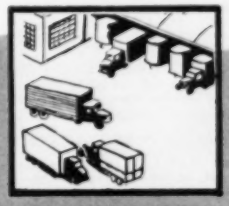
No fixed obligation for space!
No charge for space not used!
Fully mechanized freight handling.
Enclosed truck dock.
Inside rail siding.
Storage in transit.
300,000 square feet of modern warehousing

U.S. Custom bonded warehouse.
Financing and fiduciary agents.
Warehouse receipts honored anywhere in U.S.
18 to 23 foot pile height.
Heated, all-brick construction.
Complete sprinkler and A.D.T. systems.
Low insurance rate.

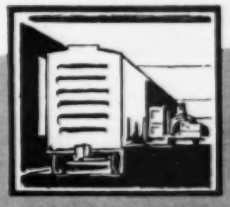


18 TO 23 FOOT PILE HEIGHT saves you space. Fully mechanized equipment plus unlimited floor load permits high stacking to save cost.

ENCLOSED TRUCK DOCK protects your goods from weather. 24 trucks can be spotted at one time. Driveway-level door allows for direct inside handling.



OFF-STREET TRUCK DRIVE keeps trucks free of street congestion. A six-lane drive leads to the dock—cuts costly waiting time—expedites incoming and outgoing shipments.



INSIDE RAIL SIDING is set up so mechanized equipment can roll in the car, pick up the load and store it in one operation. 25 cars a day can be accommodated.

80th YEAR "The Symbol of Service"

CENTRAL STORAGE COMPANY has been serving distributors of merchandise (since 1880) longer than any other public merchandise warehouse in Missouri. There is no real substitute for experience. Our methods are standing the test of time and practical usage. New methods and equipment are being employed and still newer ones will be adopted as their use becomes practical in better serving our customers.

MECHANIZED

From industrial trucks that heft 30,000 pounds of Douglas fir, with ease, to the Delaware Valley's only waterfront bulk-bagging operation . . . the word for Camden Marine is *mechanized.*

Count on this strategically located warehouse operation for fast, professional dispatching into the booming industrial East. Access to major turnpikes, linked to two major railroads.

Look to Camden Marine Terminals, the right spot for *your* cargo. Write for free folder.

We have a proposal that may save you thousands in warehousing and distribution costs . . .

PROVIDE FASTER, MORE EFFICIENT CUSTOMER SERVICE IN THE WORLD'S LARGEST CONSUMER AND INDUSTRIAL MARKET

The increased scramble for new markets and better customer service at reduced cost, has prompted many companies to re-evaluate their present method of warehousing and product distribution against the benefits provided by Federal Warehouses.

Federal Warehouses are serviced by all truck lines and major railroads. You get the most modern buildings and facilities available; pay for only what you use and have immediate flexibility in space and personnel requirements to meet changes in marketing conditions.

Whether you operate your own distribution center or utilize some other means, we are confident we can show you substantial savings, through accurate cost analysis, plus new speed and efficiency. Please contact us so that we can discuss these many benefits in more detail.

Here's how storage at MERCHANTS builds your sales

Store your packaged merchandise at one of the 9 Philadelphia Merchants Warehouses and your profits will increase! Why? Because, due to the wide *diversification* of items we handle, pickups are made *almost daily* by distributors and over-the-road trucks. Result: faster turnover. Generous dock space, mechanized handling, and over 1,300,000 square feet of floor space assure you speed and efficiency. Other Merchants advantages: low insurance rates, modest rentals, direct connections with the Pennsylvania, Reading and B&O Railroads.

MERCHANTS WAREHOUSE COMPANY

10 Chestnut Street • Philadelphia 6, Pa.
WAlnut 5-8070

ONE OF THE CHAIN OF TIDEWATER TERMINALS AND INLAND WAREHOUSES

For 72 years—
Responsibility, Efficiency, Experience

Public warehousing is profitable in

PHILADELPHIA

Yes, we can prove to you that distribution through "Pennsylvania" is more flexible, efficient and economical than branch facilities. Here are 22 big, modern warehouses—strategically located to serve this key marketing area. Over 1,000,000 sq. ft. of free and bonded storage space; low insurance rates.

Workmen are careful and competent. Modern mechanized equipment moves the most difficult commodities safely and swiftly. Exceptional rail and highway facilities. One- to 10-ton trucks for fast store-door delivery. Write us today for full information about the money-saving advantages "Pennsylvania" offers you in Philadelphia.

(Continued from Page 146)

Warehouse Briefs

Pioneer Warehouses was acquired recently by the **Weissberger Group** of moving and storage companies. Pioneer, a record storage facility, is used by many financial institutions in the Wall Street area.

New agents have joined the **United Van Lines** organization. They are **A. S. Austin and Son**, Radford, Va.; **Campbell Moving and Storage Co.**, Fort Walton Beach, Fla.; **Churchill Transportation Co.**, Hemet, Calif.; **Grant Transfer, Inc.**, Scottsbluff, Neb.; **Lyle's Delivery and Moving**, Steubenville, Ohio; **Parker K. Bailey and Sons**, Bangor, Maine; **Pat Dunne Moving and Storage Co.**, Columbus, Miss. United's Convention will be held at the Deauville Hotel, Miami Beach, Fla., November 17-19.

The first tandem trailer unit in the household moving industry is being used by **Allied Van Lines, Inc.** Such a unit handles 6000-cu ft of hhg per trip. It is routed between Boston, New York, Chicago via the Massachusetts Turnpike, New York Thruway, Ohio Turnpike, and Illinois Tollway.

Two agencies are new members of **Aero Mayflower Transit Co., Inc.** They are **Red Ball Moving and Storage** of Johnstown, Johnstown, Pa.; **Taylor Transfer Co.**, Burlington, Ontario.

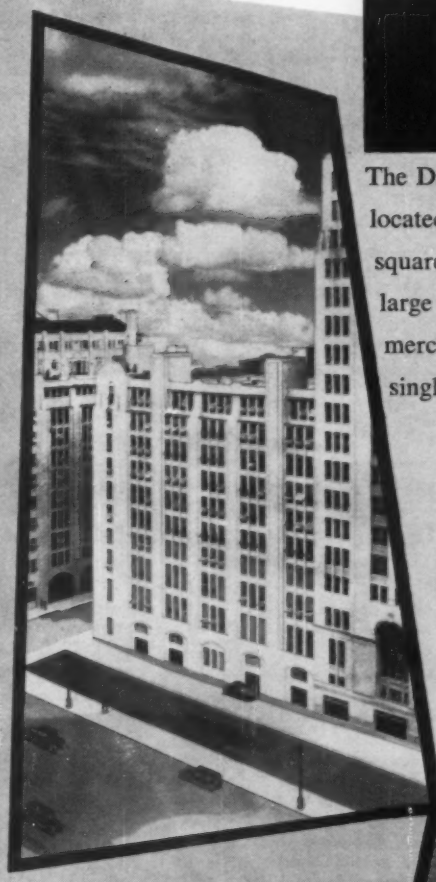
DISTRIBUTION TO THE ENTIRE SOUTHWEST

Great Southwest

Now, for *all* your warehousing-distribution needs, you can have overnight service throughout the Southwest . . . from *one* central location. GSW, in the heart of the Dallas-Fort Worth metropolitan area, offers the efficiencies and economies of a large, integrated warehousing-distribution firm, the swiftness and personal attention of separate divisions. Check GSW first, for the *entire* Southwest.



DALLAS TRANSFER
& TERMINAL WAREHOUSE DIVISION

The Dallas Transfer Division of GSW, founded in 1875, is conveniently located to serve the Dallas Metro area, and the entire Southwest. 466,000 square feet of efficient warehouse, with three Dallas locations, offer you large amounts of modern, fireproof space completely mechanized for merchandise handling. The Latimer and Austin Street warehouses are single-story with large parking and dock areas and ample railroad siding.

GSW ARLINGTON WAREHOUSE

A new and completely mechanized warehouse, 200,000 square feet, located mid-way between Dallas and Fort Worth in the Great Southwest Industrial District. This warehouse is in the heart of a transportation net to all the Southwest, with the Industrial District's own railroad connecting directly to both the Texas & Pacific and Rock Island Railroads. The totally automated Arlington warehouse is a single-story building engineered to permit economical, efficient 18 ft. stacks; it is the first of 12 warehouses, each 200,000 square feet, planned for GSW in the Great Southwest Industrial District.

DENVER CHICAGO TRUCKING CO., INC.
The ONLY direct coast-to-coast carrier!

Financial Responsibility & Stability

D-C's growth has been rapid but sound, dating from 1932 and a two-truck operation between Denver and Chicago. For the past 10 years, D-C has been a nation-wide system with 18 terminals serving points reaching to both coasts. Revenues in 1959 surpassed $40,000,000. Tangible evidence of D-C's financial responsibility is cargo and liability insurance of $5,000,000 per unit—a further guarantee of reliability.

Dependability

Shippers have relied on D-C for almost 30 years. Their confidence in us has been largely responsible for our rapid growth. This confidence stems from experience and is your assurance that your shipment, whether large or small, will be handled with care and delivered swiftly.

Our Guarantee *to you:*

D-C offers you only one kind of service—the best! Whether you're shipping a full trailer load or a small carton—whether the destination is 30 or 3000 miles distant—your shipment is entitled to, and *we guarantee it will get*, the same personal attention and careful handling.

Rigid standards of SAFETY

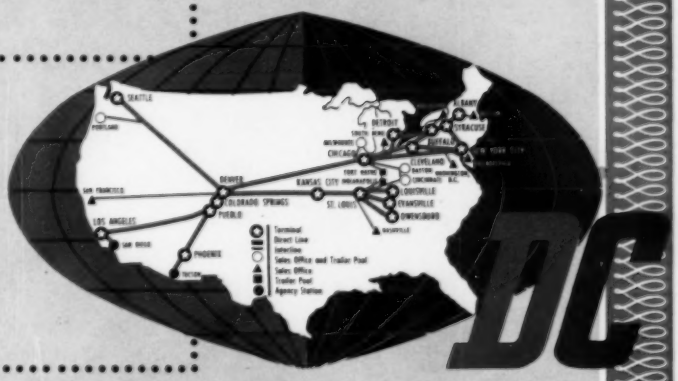
D-C's safety record is consistently among the highest—with award after award a tribute to the skill of D-C drivers. Freight handling practices are constantly being reviewed and revised—handling facilities improved. For years claim-free shipments have averaged well above 99%—your guarantee of safe handling of your shipment.

One-carrier direct service coast-to-coast

D-C's 10,814 mile coast-to-coast system is under single-company ownership and management—giving you true one-carrier direct service. No divided responsibility on service between points served by D-C. One-carrier control and one-carrier handling avoids delay—speeds your shipment—a further guarantee of speedy, safe delivery.

Skilled personnel with personal interest in You

D-C employees are dedicated to this one objective—*to serve you!* From the sales representative who contacts you to the driver, the dockman, the rate clerk, the supervisor and management—each has a friendly, personal and sincere interest in you and the careful handling of your shipment.



Modern, safe equipment

D-C's fleet numbers well over 2,000 highway units. All are kept in top-operating condition by periodic inspections and service checks. Maintenance facilities are located at key points on the system, manned by skilled mechanics. D-C road equipment is new and diversified—to serve both your routine and special shipping needs.

For the finest and fastest in truck service nation-wide—always specify D-C . . . the Dependable Carrier!

DENVER CHICAGO TRUCKING CO., INC.

The ONLY *direct coast-to-coast carrier!*

Here's a brand new reason why you should see your Automatic Dealer...

New center-control stand-up model maneuvers in tight areas

Now you can have the dependability and performance of Automatic trucks in a new compact, convenient center-controlled model. Operator of new Model FFC stands on a platform ahead of the battery. Getting on or off is easy from either side, and he enjoys maximum safety and visibility; even high-type batteries can be substituted without blocking vision. Using one lever, operator can lift and tilt load at same time or control each function independently.

Compact, easy to maneuver, ideally suited for congested areas, the new Model FFC not only offers the greater economy of electric drive over straight gas, but means clean, fume-free operation and low maintenance. Automatic's own Class H motors last longer because they're protected from burn-out by special silicone insulation. Available in 2000 and 3000 lbs. capacities.

Model FFC is in good company. It joins one of the broadest lines of lift trucks in the industry. With this broad line, your Automatic Dealer can give you professional, *unbiased* advice on materials handling. Call him. **WRITE TODAY FOR BULLETIN ON NEW MODEL FFC TRUCK.**
